Leonard Barron,2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1906 edition Excerpt CHAPTER VIII Roses For Spec1al Purposes Abbreviations B Bourbon D Damask F French or Gallica H B Hybrid Bourbon H C Hybrid China H N Hybrid Noisette HP Hybrid Perpetual including some of the hybrid Bourbons H T Hybrid Tea M Multiflora N Noisette P Prairie roses derived from R setigera R H Rambler hybrids Crimson Rambler one parent T Tea scented W H Wichuraiana hybrid We can have roses almost anywhere It is even possible to have them in poor sandy soil but it is not possible to have the best double varieties without the best soil and the best care There can be roses on walls on trellises on tree trunks on arbours in the city garden at the seashore and about the mountain home where your summer is enjoyed There are roses that bloom in the summer others that make the garden glow in autumn and some that are so lavish with flower that they repeat their gifts of colour and fragrance through the season As a whole the rose family asks for a deep rich and heavy soil but the Burnet or Scotch roses will thrive in sand so will the Memorial or Wichuraiana and there are a score of excellent varieties derived from this which make rampant growth with almost no soil at all and seem not to ask much care We have been so long trained to think and speak of roses as only for their individual flowers that whole groups and families of kinds that do not make a great display of specimen individual flowers have been almost lost to the sight of the ordinary individual It is not true that all roses are ugly plants to be regarded only as the means of producing glorious roses and that therefore their proper place is in an out of the way corner where they will never      **Manual of Gardening** Liberty Hyde Bailey,1918
