Virgil from the early modern period to the present day transcending traditional studies of single translations or particular national traditions in isolation to offer an insightful comparative perspective The twenty nine essays in the collection cover numerous European languages from English French and German to Greek Irish Italian Norwegian Slovenian and Spanish but also look well beyond Europe to include discussion of Brazilian Chinese Esperanto Russian and Turkish translations of Virgil While the opening two contributions lay down a broad theoretical and comparative framework the majority conduct comparisons within a particular language and combine detailed case studies with in depth contextualization and theoretical background showing how the translations discussed are embedded in their own cultures and historical moments The final two essays are written from the perspective of contemporary translators closing out the volume with a profound assessment not only of the influence exerted by the major Roman poet on later literature but also why translation of a canonical author such as Virgil matters not only as a national and transnational cultural phenomenon but as a personal engagement with a literature of enduring power and relevance

Altazor (Revised Edition). Vicente Huidobro, 2003 Revised edition of a Latin American classic in a tour de force translation **Homeric Translation in Theory and Practice** Francis William Newman, 1861 **Collaborative Translation and Multi-Version Texts in Early Modern Europe** Belén Bistué, 2016-05-23 Focusing on team translation and the production of multilingual editions and on the difficulties these techniques created for Renaissance translation theory this book offers a study of textual practices that were widespread in medieval and Renaissance Europe but have been excluded from translation and literary history The author shows how collaborative and multilingual translation practices challenge the theoretical reflections of translators who persistently call for a translation text that offers a single univocal version and maintains unity of style In order to explore this tension Bistué discusses multi version texts in both manuscript and print from a diverse variety of genres the Scriptures astrological and astronomical treatises herbals goliardic poems pamphlets the Greek and Roman classics humanist grammars geography treatises pedagogical dialogs proverb collections and romances Her analyses pay careful attention to both European vernaculars and classical languages including Arabic which played a central role in the intense translation activity carried out in medieval Spain Comparing actual translation texts and strategies with the forceful

theoretical demands for unity that characterize the reflections of early modern translators the author challenges some of the assumptions frequently made in translation and literary analysis The book contributes to the understanding of early modern discourses and writing practices including the emerging theoretical discourse on translation and the writing of narrative fiction both of which as Bistu shows define themselves against the models of collaborative translation and multi version texts

Translation and Minority Lawrence Venuti, 2016-04-29 The premise of this volume is a question What can the concept of minority bring to the practice and study of translation Minority is understood here to mean a cultural or political position that is subordinate whether the social context that so defines it is local national or global This position is occupied by languages and literatures that lack prestige or authority the non standard and the non canonical what is not spoken or read much by a hegemonic culture Yet minorities also include the nations and social groups that are affiliated with these languages and literatures the politically weak or underrepresented the colonized and the disenfranchised the exploited and the stigmatized Translation today is itself a minor use of language a lesser art an invisible craft that commands less cultural capital and fewer legal privileges than original composition Yet the focus in this collection is not on what translators worldwide have in common but on the distinctive forms that translating takes when it is done by or on behalf of minorities The articles in this volume present a variety of case studies that illuminate the linguistic and cultural problems posed by such translating as well as the economic and political agendas it has served Together these pieces show that the concept of minority is worth exploring because it inspires innovation in translation practice and research Minor cultures are coincident with new translation strategies new translation theories and new syntheses of the diverse methodologies that constitute the discipline of translation studies
