**The House of Rothschild in Spain, 1812-1941** Miguel A. Lopez-Morell, 2016-03-09 Amongst the serried ranks of capitalists who drove European industrialisation in the nineteenth century the Rothschilds were amongst the most dynamic and the most successful Establishing businesses in Germany Britain France Austria and Italy the family soon became leading financiers bankrolling a host of private and government businesses ventures In so doing they played a major role in fuelling economic and industrial development across Europe providing capital for major projects particularly in the mining and railway sectors Nowhere was this more apparent than in Spain where for more than a century the House of Rothschild was one of the primary motors of Spanish economic development Yet despite the undoubted importance of the Rothschild's role questions still remain regarding the actual impact of these financial activities and the effect they had on financial sectors companies and Spanish markets It is to such questions that this book turns its attention utilising a host of archive sources in Britain France and Spain to fully analyse the investments and financial activities carried out by the Rothschild House in Spain during the nineteenth and early twentieth centuries In so doing the book tackles a variety of interrelated issues Firstly fixing the period when the main capital entries sprung from the initiatives taken by the Rothschild family how consequential they really were and the sectors they affected Secondly quantifying the importance of these investments and financial activities and the weight they had on financial sectors companies and Spanish markets as well as in foreign investment in each period Thirdly outlining the steps followed and means used by the Rothschild House in order to achieve the success in each of their businesses Finally analysing the consequences of this phenomenon in the actual growth of Spanish contemporary economy both in a general and in a partial scale By exploring these crucial questions not only do we learn much more about the working of one of the leading financial institutions and the development of the Spanish economy but a greater understanding of the broader impact of international finance and the flow of capital in the nineteenth century is achieved

**International Financial Centres in the Twentieth Century** Youssef Cassis, Eric Bussière, 2005-01-20 London and Paris

the world's two leading financial centres in the nineteenth century experienced differing fortunes during the twentieth century. While London remained an international financial centre, Paris influence declined. Yet over the last twenty years deregulation, internationalization and the advent of the single currency have reactivated their competition in ways reminiscent of their old rivalry before the First World War. This book provides a long term perspective on the development of each centre with special attention devoted to the pre 1914 years and to the last decades of the twentieth century in order to contrast these two eras of globalization. The chapters include both archive based and synthetic surveys and are written by the leading specialists of the field. This comparison between Europe's two leading capital cities will also provide new insights into two important subjects: the political economy of Britain and France in the twentieth century and the history of international financial centres. As much as a comparison between London and Paris as international financial centres, this book is an Anglo-French comparison. In other words, it considers through the prism of finance several aspects of the two countries' economic, business, social and political histories. It includes contributions from leading banking, financial and economic historians and will be of interest to academics, researchers and students of Financial and Economic History and the role of London and Paris in particular.
