way for you to see the subject as a multidimensional figure and any change in position will gradually change the manner of how the figure should be outlined The primary outline may overlap replace or replicate the basic figure If the portions of your animal are smoothly spherical circles used to simplify the form then the primary outline would simply overlap or replicate the simplified form but if the part has ridges such as the face of the animal nose eyeholes cheeks etc then the basic form should be modified to illustrate the exact shape of the head The basic forms will be your guide to properly lay out each linear shade Observe the first sphere The linear shades do not bend properly with the contour shape but it can show the dimensions by leaving the center of the sphere unmarked These are hatches that use the point of light as a reference The linear shades on the second sphere bend with the contour shape of the figure The lines show the proportions by interpreting the form by flowing with it These hatches use the point of light and the manner of its bend to show dimensions If you are going to use a single set of hatches to shade the subject use the method of the second sphere and then use the method of the first sphere to darken and enforce the visual depth Thin and light linings are used to portray the dimensional shape Follow the contour figure of the basic form to properly portray the shade values according to its perspective **Pencil Art For the Beginner - Step By Step Guide to Drawing with Pencil** Harriet Kim Anh Rodis,John Davidson,2015-06-11 TABLE OF CONTENTS Introduction Getting Started Drawing tools How to grip a pencil properly Warming up Basics Elements of Drawing Lines Shapes Usual Errors Perspectives 2 point perspective Rule of Thirds Start with the basics Define permanent outlines Show illustrate some texture Rendering Shading Kinds of Shading Hatching Cross hatching Scumbling Stippling Smudging Casting shadows Lighting Sphere Cone Cube Cylinder Layering Design Fabrics Texture Introduction If you are an artist in search for further knowledge about drawing to enhance your skills then this is not the book for you This book is for the individuals who want to be an artist but know nothing about drawing yet I know how it feels when you want to illustrate an idea but you just don t know how to start And when you finally grabbed the confidence to mark that paper but then it turned out really terrible that you don t want to show it to anyone This instructional manual is for making that two circles cat of yours into something more pleasing and distinguishable for enhancing that sheep which looks like a cloud with a face for turning your stick figures into cartoons and more Learn the very basics of drawing easily by following this step by step tutorial and realize that drawing is something that is fun to do and not something that becomes a cause of frustration **Engaging Students in Socially Constructed Qualitative Research Pedagogies** ,2022-05-20 This volume is an innovative practical contribution to the developing field of qualitative research pedagogy It is also applicable more broadly to the active teaching in higher education Based upon constructionist tenets this book contains three parts that offer strategies and approaches to actively engage students in qualitative inquiry Chapter authors with roots in six countries United States Lithuania Canada Israel China and Russia offer practical and creative strategies and theoretical foundations for engaging students in active learning of research The book will be of interest for instructors who wish to enhance their pedagogy and creativity in teaching and for students
