

**DANIELA DIMITROVA (ED.). GLOBAL JOURNALISM: UNDERSTANDING WORLD MEDIA SYSTEMS. ROWMAN & LITTLEFIELD PUBLISHERS, PP 258. ISBN: 1538146851.**

Many researchers, especially in the Western world, hold that media and thus journalism is in severe crisis, and the profession is threatened by several internal and external phenomena such as the change of the media environment, digitalization, the emergence of social media, political pressure and commercialization. However, if one looks at this claim a bit closer, it might turn out that these statements and the corresponding worries are mostly coming from the Western countries, and typically reflect the values and belief systems of these regions. Therefore, when researchers analyze the field of journalism and media from a one-sided and less flexible Western perspective, the outcomes and conclusions might fail to understand the unique nature of media systems and media cultures that differ not only from region to region, but also from country to country. Without understanding the given region's cultural, historical, economic, political, and societal particularities, our chances to examine complex communicational systems authentically remain close to zero.

In the edited volume entitled *Global Journalism: Understanding World Media Systems* Daniela Dimitrova and her colleagues offer new ways of approaching media systems by taking both the local context and technological changes into account. The editor indicates in the preface that the book's purpose is not to approach world media systems and global journalism with a normative lens:

A basic premise in this book is that there is no ideal media system. While it may be easy to see the media in dichotomous terms—free versus censored, open versus closed, one-sided versus diverse, or objective versus subjective, the book cautions against simple generalizations. (p.14)

Since publications in the field of communication and media research come mostly from the perspective of Western researchers, to avoid ethnocentrism, Dimitrova invited twenty-two authors from twelve countries to offer a geographically more diverse outlook.

The book is structured in three parts. Part one focuses on the key concepts, in which authors address basic concepts in global journalism such as news flows,

Landscape, Process and Power Serena Heckler, 2012 In recent years the field of study variously called local indigenous or traditional environmental knowledge TEK has experienced a crisis brought about by the questioning of some of its basic assumptions This has included reassessing notions that scientific methods can accurately elicit and describe TEK or that incorporating it into development projects will improve the physical social or economic well being of marginalized peoples The contributors to this volume argue that to accurately and appropriately describe TEK the historical and political forces that have shaped it as well as people s day to day engagement with the landscape around them must be taken into account TEK thus emerges not as an easily translatable tool for development experts but as a rich and complex element of contemporary lives that should be defined and managed by indigenous and local peoples themselves

Elenes, 2010-11-15 *Transforming Borders* Chicana o Popular Culture and Pedagogy contributes to transformative pedagogies scholarship by adding the voices of Chicana feminist pedagogies epistemologies and ontologies C Alejandra Elenes develops her conceptualizations of border transformative pedagogies by linking the relationship between cultural practices knowledge and teaching in everyday life She analyzes Chicana feminist cultural workers educational actors re imagining three Mexican figures La Llorona the weeping woman the Virgen of Guadalupe and Malintzin Malinche as epistemological and pedagogical meanings The three figures represent multiple meanings traditional views on femininity religion and nationalist views on women yet at the same time feminists have re imagined these three figures and developed counter narratives that can offer alternatives to the traditional meanings In developing border transformative pedagogies Elenes looks at the significance of historical events such as the creation of the Mexico U S border to understand the experiences of people of Mexican descent in the United States She also examines oral histories of the legend of La Llorona in the Southwest historical documents on the Spanish conquest of Mexico and Chicana artists such as Ester Hernandez Yolanda Lopez Consuelo Jimenez Underwood and Alma Lopez re imagining of the Virgen of Guadalupe The conflicts over the meanings of the three figures can help us understand how Chicanas have used their voices to counter economic and gender inequalities and how pedagogical practices show that cultural productions are sites where forms of domination can be contested and recreated in ways that allow for the creation of alternative identities and subjectivities      Political Nature John M. Meyer, 2001-07-20 Concern over environmental problems is prompting us to reexamine established thinking about society and politics The challenge is to find a way for the public's concern for the environment to become more integral to social economic and political decision making Two interpretations have dominated

Western portrayals of the nature politics relationship what John Meyer calls the dualist and the derivative The dualist account holds that politics and human culture in general is completely separate from nature The derivative account views Western political thought as derived from conceptions of nature whether Aristotelian teleology the clocklike mechanism of early modern science or Darwinian selection Meyer examines the nature politics relationship in the writings of two of its most pivotal theorists Aristotle and Thomas Hobbes and of contemporary environmentalist thinkers He concludes that we must overcome the limitations of both the dualist and the derivative interpretations if we are to understand the relationship between nature and politics Human thought and action says Meyer should be considered neither superior nor subservient to the nonhuman natural world but interdependent with it In the final chapter he shows how struggles over toxic waste dumps in poor neighborhoods land use in the American West and rainforest protection in the Amazon illustrate this relationship and point toward an environmental politics that recognizes the experience of place as central

Private Learning, Public Needs Eric J. Weiner, 2005 The publication *Private Learning Public Needs* looks at the devastating effects neoliberal globalization continues to have on education schooling and literacy development in the United States The book is divided in three parts Part I Neoliberal Globalization and the Question of Adult Literacy Education is broken into two chapters Chapter one is a study of neoliberalism and its relationship to globalization Specially the changing role of the state is examined in terms that bring attention to globalization's capacity to ignore nation state borders especially in the context of finance and culture The role of the state is discussed in light of its influence on local agencies and on local institutions Of issue is the interiorization of neoliberal globalization at the material levels of

educational life namely curriculum standard and development Through the imposition of certain kinds of standards teacher education programs must make some hard decisions about whether they will on the one hand satisfy the needs manufactured by neoliberal interests as they manifest themselves in curricular and pedagogic mandates or on the other will use their authority to challenge and confront that which they know is detrimental to democratic principles and good teaching practices Chapter two examines how neoliberal interests have impeded the goals of adult literacy education Part II The Work of Critical Theory in a Neoliberal Age takes up the work of two prominent critical theorists in and beyond education Erich Fromm and Paulo Freire Chapter three discusses Fromm's important alternative to top down discourses of power and authority In chapter four Freire's work in São Paulo as Secretary of Education is studied for what it can teach us about the importance and possibility of structural transformations
