Harvey, 2023-05-31 P D A Harvey is a historian of medieval rural England with a wide interest in the history of cartography this collection of his essays brings together both these strands It first looks at the English countryside from the 10th century to the 15th investigating problems in particular documents in the village community and in underlying long term changes How landlords drew profits from their property in the eleventh and twelfth

centuries how and why there followed changes in the way landed estates were run and in the written records they produced what new light their personal seals can throw on medieval peasants are all among the topics discussed while the local management of large estates and the development of the peasant land market are themes that recur throughout There follow essays on the way maps were brought into the management of landed estates in the 16th and 17th centuries starting with the introduction of consistent scale into mapping a new concept crucially important in the general history of topographical maps The collection closes by looking at some of the traps that both documents and maps set for the historian of the English countryside

The English Rising of 1381 R. H. Hilton, T. H. Aston, 1987-08-28 This volume eschews general narrative history and consists of articles most of which were presented to a conference organized in 1981 by the Past and Present Society

The Estates of the English Crown, 1558-1640 R. W. Hoyle, 2002-08-08 This collection of essays is the first full account of the largest estate in early modern England against which the fortunes of all other estates may be judged Previous accounts have tended to regard the Crown lands as a resource to be plundered by successive monarchs in times of need much of the monastic land confiscated by Henry VIII had been sold by the time of his death and the estates had mostly been liquidated to meet the demands of expenditure by 1640 It is not denied in these essays that the estates suffered from the attrition of periodic sale but the estates are also seen as a continuing enterprise of complexity and sophistication Each essay is concerned with the dialogue between the Exchequer and its local administrators and tenants The success and failure of initiatives launched by the Exchequer is illustrated by examples drawn from many communities throughout England

Chapters from the Agrarian History of England and Wales: Volume 2, Rural Society: Landowners, Peasants and Labourers, 1500-1750 Joan Thirsk, 1990-03 Material from The Agrarian History of England and Wales in paperback with new introductions

The Commercialisation of English Society, 1000-1500 R. H. Britnell, 1996 The commercialisation of English society offers a major new interpretation of social and economic change in England over five centuries By 1500 English livelihoods depended more upon money and commercial transactions than ever before the institutional framework of markets had been transformed and urban development was more pronounced These changes were not however caused by any unilinear development of population output or money supply This pioneering study examines both institutional and economic transformation and the social changes that resulted and stresses the limited importance of formal trading institutions for the development of local trade Commercial transition is throughout analysed from a broader perspective that looks at the changing power relations within medieval society which might loosely be described as feudal and considers how these relations were affected by such commercial development

Peasant and Community in Medieval England, 1200-1500 P. Schofield, 2002-12-17 In recent years work on the medieval English peasant has tended to stress the degree of interaction between the village and the world beyond its bounds This book not only provides an overview of this research but also develops this approach Phillipp R Schofield describes the traditional world of the peasant with attention given to such

issues as relations between lord and tenant and the nature of the peasant family and places the peasantry of the late middle ages within the wider political legal ecclesiastical and commercial world of the medieval community *English Political Culture in the Fifteenth Century* Michael Hicks, 2003-09-02 A new and original study of how politics worked in late medieval England throwing new light on a much discussed period in English history **Culture of Christendom** Marc A. Meyer, 1993-07-01 The Culture of Christendom brings together original essays by distinguished historians on medieval European history Their range reflects the breadth of Denis Bethell's own interests which though centred on the high medieval church encompassed the culture of the middle ages as a whole **Early Tudor Government, 1485-1558** Steven Gunn, 1995-05-10 This marvellous new book sets the developments in the government of England under the early Tudors in the context of recent work on the fifteenth century and on continental Europe **The Oxford History of the Laws of England Volume II** John Hudson, 2012-03-22 This volume in the landmark Oxford History of the Laws of England series spans three centuries that encompassed the tumultuous years of the Norman conquest and during which the common law as we know it today began to emerge The first full length treatment of all aspects of the early development of the English common law in a century featuring extensive research into the original sources that bring the era to life and providing an interpretative account a detailed subject analysis and fascinating glimpses into medieval disputes Starting with King Alfred 871-899 this book examines the particular contributions of the Anglo Saxon period to the development of English law including the development of a powerful machinery of royal government significant aspects of a long lasting court structure and important elements of law relating to theft and violence Until the reign of King Stephen 1135-54 these Anglo Saxon contributions were maintained by the Norman rulers whilst the Conquest of 1066 led to the development of key aspects of landholding that were to have a continuing effect on the emerging common law The Angevin period saw the establishment of more routine royal administration of justice closer links between central government and individuals in the localities and growing bureaucratization Finally the later twelfth and earlier thirteenth century saw influential changes in legal expertise The book concludes with the rebellion against King John in 1215 and the production of the Magna Carta Laying out in exhaustive detail the origins of the English common law through the ninth to the early thirteenth centuries this book will be essential reading for all legal historians and a vital work of reference for academics students and practitioners The Crown Lands 1461-1536 B.P. Wolffe, 2021-07-25 Originally published in 1970 this volume examines the history of the Yorkist and early Tudor royal landed estate conducted in the light of its role in earlier medieval history and especially in Lancastrian government It provides material with which to understand the nature and origins of the changes that took place in the late 15th and early 16th centuries in Tudor chamber finance Many of the documents had not been previously published when this book first appeared The book also questions fundamental assumptions in the wider field of English constitutional history for example that the revenues of medieval kings of England were divided into ordinary and extra ordinary and that they were

expected to live of their own on their ordinary revenues **An Illustrated History of Late Medieval England** Chris Given-Wilson, 1996 The late Middle Ages c 1200 1500 was an age of transition The major events of this period the Black Death the Hundred Years War the rise of Parliament the depositions of five English kings between 1327 and 1483 are examined in detail in this book The Politics of Magnate Power in England and Wales, 1389-1413 Alastair Dunn, 2003 This book offers a dramatic revision to the historical understanding of the events surrounding the fall of Richard II and the establishment of the Lancastrian regime Rather than halting at 1399 it charts the shifting balance of power between crown and nobility until the death of Henry IV in 1413 The first major work ever to analyse the financial element of land forfeitures for treason it concludes that Richard II experienced only limited success in profiting from the destruction of his enemies This work is also the first for more than thirty years to chart the political resistance to Henry IV and assess the reasons for his avoiding the fate of his predecessor It draws the radically new conclusions that Henry IV recognized the practical limitations of his power as a usurper and in coming to a modus vivendi with his many enemies traded actual security for a diminution in the Crown's authority to command the obedience of its subjects
