**The Conundrum of Russian Capitalism** Ruslan Dzarasov,2013-12-06 The fall of the Soviet Union and the emergence of contemporary Russian capitalism are often all too often read as a juncture with the past In reality Russia's current capitalist system originated in the degenerated Soviet bureaucracy alongside the pressures of global capital From Roman Abramovich to Leonid Mikhelson the reign of the CEO in Russia corporations mirrors the autocracy of the Soviet Union's leaders the Russian tradition of the Cult of Personality lives on The conception of the massive corporations and the autocrats that lead them occurred towards the end of the Soviet Union when the would be owners seized corporate assets and taking advantage of Gorbachev's reforms transformed publicly owned industry into private enterprises with themselves at the helm By comparing the practices of Russian corporate governance labour practices and investment strategies to the typical models of corporate governance and investment behaviour of big firms in the West Ruslan Dzarasov exposes the parallels between the core and the periphery of the capitalist world system Drawing on the theory of Leon Trotsky as well as Immanuel Wallerstein and Robert Brenner this study disrupts many of the myths about Russia's political economy *The Palgrave Handbook of Critical International Political Economy* Alan Cafruny,Leila Simona Talani,Gonzalo Pozo Martin,2016-07-05 Challenging the assumptions of mainstream International Political Economy IPE this Handbook demonstrates the considerable value of critical theory to the discipline through a series of cutting edge studies The field of IPE has always had an inbuilt vocation within Historical Materialism with an explicit ambition to make sense from a critical standpoint of the capitalist mode of production as a world system of sometimes paradoxically and sometimes smoothly overlapping states and markets Having spearheaded the growth of a vigorous critical scholarship in the 1960s and 1970s however Marxism and neo Gramscian approaches became increasingly marginalized over the course of the 1980s The authors respond to the exposure of limits to mainstream contemporary scholarship in the wake of the onset of the Global Financial Crisis and provide a comprehensive overview of the field of Critical International Political Economy Problematising socioeconomic and political structures and considering these as potentially transitory and subject to change the contributors aim not simply to understand a world of conflict but furthermore to uncover the ways in which purportedly objective analyses reflect the interests of those in positions of privilege and power [Research Anthology on Small Business Strategies for Success and Survival](#) Management Association, Information Resources,2021-06-25 Running a small business provides opportunity for greater success increased growth and potentially the chance to move to the global business arena yet also much more risk Small businesses not only have less employment but also less annual revenue than a regular sized business

Unique and insightful this book takes a look at Russia's development through the Tsarist and Soviet periods. Rather than make the more familiar comparisons between Russia and the West, Russia and Development focuses on political and social mobilization in adjacent Central Asia. It examines the role of local government and civil society in development as well as popular responses to the policies of Putin and Medvedev aimed at modernizing Russia and forging a new Eurasia alliance in Russia's development neighbourhood. The book uses local sources and case studies to pose important questions about the role of empire, revolution, nationalism and democratization in the twenty-first century. With unique insider knowledge, Charles Buxton ultimately places Russia's current development model in an international context where Russia is increasingly becoming a competitor to Western-led development practices. Essential reading for anyone interested in the region or development thought and practice.

*University Theses in Russian, Soviet and East European Studies, 1907-2006* Gregory Piers Mountford Walker, John Simon Gabriel Simmons, 2008. The bibliography records doctoral and selected masters theses over 3,300 in all from British and Irish universities in the field of Russian, Soviet and East European studies. This is broadly interpreted to include all disciplines in the humanities and social sciences as they relate to the area of Russia, the former USSR and Eastern Europe. Taken as a whole, the work probably forms the fullest and longest record of British and Irish postgraduate research in any sector of area studies. Besides its primary function as a bibliographic tool, it makes it possible to trace the effects of academic developments, institutional policies and the changes in direction in this highly diversified field of study over the last hundred years. Entries are arranged by subject and area, supported by full author and subject indexes to aid searching. Dr Gregory Walker is a former Head of Slavonic and East European Collections at the Bodleian Library, University of Oxford. The late John S. G. Simmons OBE was Senior Research Fellow and Librarian, All Souls College, Oxford.

Eira Varis, 2000. *Marginality in Space - Past, Present and Future* Heikki Jussila, Roser Majoral, Chris C. Mutambirwa, 2019-01-15. Published in 1999, this book discusses the role that marginality has had in the past, has today and will have in the future. The Commission on Dynamics of Marginal and Critical Regions held its annual conference in Harare, Zimbabwe, in July 1997. This volume represents a carefully selected, revised and reviewed selection of the papers presented at this conference. The articles reflect the various aspects of marginality currently existing in the world, and it is the intention of the Commission to pursue research that would eventually result in a more coherent approach towards the issues of marginality in space. The articles in the book are grouped into three main parts. The first part discusses the role of theory and also methodological aspects and approaches towards the question of marginality. The second part gives a time-space perspective by examining the past, present and future aspects of marginality. The third part is dedicated to empirical evidence about the changes in existing marginality and its possible future implementations. The conclusions of the book summarize the various and sometimes conflicting aspects of marginality and its images both in space and in time.
