Russian Nuclear Shield From Stalin To Yeltsin The Cold War And Beyond:

The Russian Nuclear Shield from Stalin to Yeltsin J. Mathers, 2000-08-09 This book makes extensive use of Soviet sources to provide the first full analysis of Moscow's ballistic missile defence policy from its origins to the most recent post Soviet developments It considers the Soviets motivations for pursuing an anti ballistic missile capability and the extent of their success and reveals that ballistic missile defence policy was used by every political leadership from Krushchev to Yeltsin as a means of sending signals about Moscow's intentions to the West

Russian Foreign Policy toward Missile Defense

Bilyana Lilly, 2014-08-21 This book is devoted to one of the central issues in U S Russian and NATO Russian relations ballistic missile defense Drawing on more than 2 000 primary sources interviews with Russian and NATO officials and a variety of Russian and Western publications this book offers an unparalleled in depth analysis of the reasons behind Russia's policy towards the construction of a U S ballistic missile defense in Europe It provides a critical assessment of the decision making mechanisms that shape Russia's position on ballistic missile defense as well as Russia's strategic relations with the United States and Russia's interaction with European and non European powers Lilly argues that contrary to Moscow's official claims during the Putin era Russian objections to the construction of ballistic missile defense in Europe have not been wholly dictated by security concerns To Russia missile defense is not purely an issue in and of itself but rather a symbol and instrument of broader political considerations At the international level the factors that have shaped Russia's response include Moscow's perception of the overall state of U S Russian relations the Kremlin's capacity to project influence and power abroad and NATO's behavior in the post Soviet space Domestically the issue of missile defense has been a facilitating instrument for strengthening Putin's regime and justifying military modernization Taken together these instrumental considerations and their fluctuating intensity in different periods prompt the Russian leadership to pursue contradictory policy approaches simultaneously On the one hand the Kremlin seeks U S cooperation while on the other hand it threatens retaliation and reinforces Russian offensive capabilities The result is Moscow's incoherence inconsistency and double speak over the issue of missile defense

Facing Down the Soviet Union Kristan Stoddart, 2014-10-16 Facing Down the Soviet Union reveals for the first time the historic deliberations regarding the Chevaline upgrade to Britain's Polaris force the decisions to procure the Trident C 4 and then D 5 system from the Americans in 1980 and 1982 It also details the decision to base Ground Launched Cruise Missiles in the UK in 1983

The Missile Defense Systems of George W. Bush Richard Dean Burns, 2010-09-02 This volume reviews the debates surrounding the anti ballistic missile ABM defense systems and their deployment by George W Bush allowing readers to assess for themselves the significance of Bush's decisions The Missile Defense Systems of George W Bush A Critical Assessment asks and answers a number of pressing questions about Bush's decision to deploy ground based missiles Has the system become reliable If not what are the prospects for it to become effective What have the fiscal costs been What was the political impact of efforts to expand ABM systems to Europe

This is the only major book that brings together all of the factors historical and current to allow readers to assess President Bush's decisions for themselves. Opening with an extensive history of missile defense, the book analyzes Bush's efforts to establish ground-based missiles in Eastern Europe as well as the impact of his decisions. Both the administration's policies and evaluations and those of critical observers are presented. President Obama's program for missile defense is reviewed as well. A final chapter evaluates the technical progress of the various ABM systems and weighs the political dimensions of the deployment decision and the cost of the undertaking to date.

Surviving the Unipolar Era A.B. Abrams, 2025-01-01

On June 29, 1950, the U.S. launched its first ever air strikes on the North Korean capital, Pyongyang, marking the start of what would become the longest conflict in history between two industrial powers. Four decades later, the end of the Cold War in 1989 and the disintegration of the Soviet Union in 1991 marked the beginning of a new phase of the conflict with a new unipolar world order centered on the power of the U.S. and Western world, leaving North Korea in unprecedented isolation. Now unsupported in its fight against a Western superpower intent on its destruction, the small but technologically adept and heavily militarized East Asian state would need to adopt more radical measures to ensure its security. Over the next 35 years, the conflict would transform from a period of North Korean decline in the face of tremendous economic and military pressure to one of an ascent in its power and decline in the West as international order evolved past the unipolar era. **Surviving the Unipolar Era** elucidates the conflict's transformation, beginning with unprecedented U.S.-led efforts to achieve North Korea's total collapse and elimination through maximum pressure and ending three decades later with a subsiding of Pyongyang's international isolation and the modernization of its economy, armed forces, and nuclear deterrent. A.B. Abrams highlights how the small state has been able to hold its own in multiple standoffs with the world's superpower, successfully weathering economic sanctions and preventing penetration of its information space, and the implications that this has had for the country, the region, and the wider world. He details the strong consistency in American objectives and the evolution of consensus across five separate administrations on how these should be pursued as the circumstances of the conflict transformed. In the context of prevailing geopolitical, economic, and security trends, Abrams projects the future course of the conflict, including aspects such as Western difficulties coming to terms with North Korea's ascent, U.S. policy priorities going forward, and the growing opportunities that an emerging new global cold war is likely to provide. **Pyongyang**

Russian Military Reform, 1992-2002 Anne C. Aldis, Roger N. McDermott, 2004-11-23 Military reform has featured prominently on the agenda of many countries since the end of the Cold War, necessitating a re-evaluation of the strategic role of the armed forces, and nowhere more publicly than in Russia. Not since the 1920s have the Russian Armed Forces undergone such fundamental change. President Boris Yeltsin and his successor Vladimir Putin have both grappled with the issue with varying degrees of success. An international team of experts here considers the essential features of Russian military reform in the decade since the disintegration of the USSR. Fluctuations in the purpose and priorities of the reform process are traced, as well as the many

factors influencing change Chapters analyse the development of Russia's security policy structural reform of the services the social impact of military service and experience of military conflict in Chechnya Critical evaluations of the impact of social change on the Russian Armed Forces capabilities and expectations complement the analysis of the on going debate Russian Military Reform 1992 2002 will prove invaluable to all those interested in civil military relationships and international security as well as to students of military theory and practice

A Global History of the Nuclear Arms Race Richard Dean Burns, Joseph M. Siracusa, 2013-04-23 Written by two preeminent authors in the field this book provides an accessible global narrative of the nuclear arms race since 1945 that focuses on the roles of key scientists military chiefs and political leaders The first book of its kind to provide a global perspective of the arms race this two volume work connects episodes worldwide involving nuclear weapons in a comprehensive narrative fashion Beginning with a discussion of the scientific research of the 1930s and 1940s and the Hiroshima decision the authors focus on five basic themes political dimensions technological developments military and diplomatic strategies and impact The history of the international nuclear arms race is examined within the context of four historical eras America's nuclear monopoly America's nuclear superiority superpower parity and the post Cold War era Information about the historical development of the independent deterrence of Britain France and China as well as the piecemeal deterrence of newcomers Israel India Pakistan and North Korea is also included as is coverage of the efforts aimed at the international control of nuclear weapons and the diplomatic architecture that underpins the global nuclear non proliferation regime

International Affairs, 2001

Nuclear Weapons and Strategy Stephen J. Cimbala, 2006-03-10 Nuclear weapons once thought to have been marginalized by the end of the Cold War have returned with a vengeance to the centre of US security concerns and to a

world bereft of the old certainties of deterrence This is a major analysis of these new strategic realities The George W Bush administration having deposed the regime of Saddam Hussein in Iraq now points to a new nuclear Axis of Evil Iran and North Korea These nations and other rogue states as well as terrorists may pose key threats because they are beyond deterrence which was based on the credible fear of retaliation after attack This new study places these and other developments such as the clear potential for a new nuclear arms race in Asia within the context of evolving US security policy Detailing the important milestones in the development of US nuclear strategy and considering the present and future security dilemmas related to nuclear weapons this is a major new contribution to our understanding of the present international climate and the future Individual chapters are devoted to the key issues of missile defenses nuclear proliferation and Israel's nuclear deterrent This book will be of great interest to all students and scholars of strategic studies international relations and US foreign policy
