## **Russian On Location Languages On Location Ser:**

**The Russian Orthodox Community in Hong Kong** Loretta E. Kim, Chengyi Zhou, 2021-08-23 Hong Kong has been a unique society from its establishment as a political region separate from mainland China in the nineteenth century under British colonial rule until the present day as a special administrative region of the People's Republic of China. A hub of interregional and international migration it has been the temporary and long term home of people belonging to many racial ethnic and cultural groups. This book examines the evolution of the community established by clergy and congregants of the Russian Orthodox Church. This community was first developed in the 1930s and then revived after a hiatus of over two decades from the 1970s to the 1990s with the founding of the Orthodox Parish of Apostles Saints Peter and Paul OPASPP at the turn of the twenty first century. This study demonstrates how the OPASPP has become a vital provider of knowledge about Russian language and culture as well as a religious institution serving both heritage and convert believers. The community formed by and around the OPASPP is important to foster Sino Russian relations based on individual to individual contact and mutual exposure to Chinese and Russian cultures in a region of China which allows spiritual and social diversity with minimal political constraints. Large Language Models in Cybersecurity Andrei Kucharavy, Octave Plancherel, Valentin Mulder, Alain Mermoud, Vincent Lenders, 2024-05-31 This open access book provides cybersecurity practitioners with the knowledge

needed to understand the risks of the increased availability of powerful large language models LLMs and how they can be mitigated. It attempts to outrun the malicious attackers by anticipating what they could do. It also alerts LLM developers to understand their work's risks for cybersecurity and provides them with tools to mitigate those risks. The book starts in Part I with a general introduction to LLMs and their main application areas. Part II collects a description of the most salient threats LLMs represent in cybersecurity be they as tools for cybercriminals or as novel attack surfaces if integrated into existing software. Part III focuses on attempting to forecast the exposure and the development of technologies and science underpinning LLMs as well as macro levers available to regulators to further cybersecurity in the age of LLMs. Eventually in Part IV mitigation techniques that should allow safe and secure development and deployment of LLMs are presented. The book concludes with two final chapters in Part V one speculating what a secure design and integration of LLMs from first principles would look like and the other presenting a summary of the duality of LLMs in cyber security. This book represents the second in a series published by the Technology Monitoring TM team of the Cyber Defence Campus. The first book entitled *Trends in Data Protection and Encryption Technologies* appeared in 2023. This book series provides technology and trend anticipation for government industry and academic decision makers as well as technical experts. ,2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions      **Foreign-Born; A Bulletin of International Service** ,1919      Nationalism Liah Greenfeld,1992 Nationalism is a movement and a state of mind that brings together national identity consciousness and collectivities A five country study that spans five hundred years this historically oriented work in sociology bids well to replace all previous works on the subject      **Languages in a Globalising World** Jacques Maurais,Michael A. Morris,2003-04-10 Throughout human history the fate of languages has been closely linked to political power relationships Political shifts in the international system continue to affect linguistic patterns which today are still in a state of flux following the end of the Cold War This book considers the effects of present day trends in global politics on the relative status of languages and the directions in which the linguistic hierarchy might

develop in the future It will appeal to researchers and students of sociolinguistics and language planning as well as of international relations     Interpreter Release ,1921     *StarBriefs Plus* Andre Heck,2004-04-30 With about 200 000 entries *StarBriefs Plus* represents the most comprehensive and accurately validated collection of abbreviations acronyms contractions and symbols within astronomy related space sciences and other related fields As such this invaluable reference source and its companion volume *StarGuides Plus* should be on the reference shelf of every library organization or individual with any interest in these areas Besides astronomy and associated space sciences related fields such as aeronautics aeronomy astronautics atmospheric sciences chemistry communications computer sciences data processing education electronics engineering energetics environment geodesy geophysics information handling management mathematics meteorology optics physics remote sensing and so on are also covered when justified Terms in common use and or of general interest have also been included where appropriate     *Subject Index of the Modern Works Added to the British Museum Library* British Museum.
