**Russian Archaism** Irina Shevelenko, 2024-08-15 Russian Archaism considers the aesthetic quest of Russian modernism in relation to the nation building ideas that spread in the late imperial period Irina Shevelenko argues that the cultural milieu in Russia where the modernist movement began as an extension of Western trends at the end of the nineteenth century soon became captivated by nationalist indoctrination Members of artistic groups critics and theorists advanced new interpretations of the goals of aesthetic experimentation that would allow them to embed the nation building agenda within the aesthetic one Shevelenko's book focuses on the period from the formation of the World of Art group 1898 through the Great War and encompasses visual arts literature music and performance As Shevelenko shows it was the rejection of the Russian westernized tradition informed by the revival of populist sensibilities across the educated class that played a formative role in the development of Russian modernist agendas particularly after the 1905 revolution Russian Archaism reveals the modernist artistic enterprise as a crucial source of insight into Russia's political and cultural transformation in the early twentieth century and beyond *Cultures of Forgery* Judith Ryan, Alfred Thomas, 2013-05-13 In *Cultures of Forgery* leading literary studies and cultural studies scholars examine the double meaning of the word forge to create or to form on the one hand and to make falsely on the other **The National Union Catalog, Pre-1956 Imprints** Library of Congress, American Library Association. This book presents the proceedings of HCET 2022 the 7th International Technical Conference on Frontiers of Hydraulic and Civil Engineering Technology originally due to be held in Sanya China from 25-27 September 2022 but instead held as a fully virtual event on Zoom due to continued uncertainty related to the Covid 19 pandemic. A total of 275 submissions were received from international contributors and all were subjected to a rigorous peer review process with each paper reviewed by a minimum of two experts. Papers were also checked for quality and plagiarism after which 163 papers were accepted for presentation and publication. Topics covered include the research and development of concrete structure design and analysis, structural mechanics and structural engineering, geological exploration and earthquake engineering, building technology, urban planning, energy, environment and advanced engineering science and applications. **World Fairs and the Global Moulding of National Identities**, 2021-11-01. This volume examines the role of the broad variety of international exhibitions between 1851 and 1958 in two programmatic essays and twelve case studies covering not just France and the United States but also among others Sweden, Romania, Colombia, Japan and the nascent European Community. World fairs were global platforms for the construction of national identities. The mix of national self-profiling and commercial exoticism turned the nation into a brand while reframing the nation-state from its nineteenth-century positioning amidst neighbouring enemies towards being a competitor in a global consumer-oriented trade and entertainment economy. By presenting national identities in banal form as feel-good factors, world fairs helped the nation to maintain its grassroots appeal across the century of totalitarianism and internationalism. Contributors are Joep Leerssen, Eric Storm, Florian Gro, Anthony Swift, Cosmin Minea, Claire Hendren, Taka Oshikiri, Robert W. Rydell, Sven Schuster, Miriam Oesterreich, Bartosz Dziwanowski, Stefa Czyk, Christina Romlid, Jonathan Voges and Anastasia Remes.
