Sacred Markets, Sacred Canopies Ted G. Jelen, 2003-04-01 Can individual decisions concerning whether or where to attend church to contribute time or money to religious organizations or to forgo certain activities be explained as a special case of economic theory In *Sacred Markets Sacred Canopies* Ted G Jelen brings together the leading scholars in the sociology of religion to debate market theories of religion As the contributors examine whether or not religious choices can be understood as responding to the same laws of supply and demand as other forms of consumer behavior they bring out many of the issues controversies and concerns surrounding this innovative theory The result is a concise source for the arguments evidence and criticism of the market model of religious economies a perfect starting point for students and scholars approaching this set of problems

Salvation Goods and Religious Markets Jörg Stolz, 2008 The idea that religion has to succeed in a market selling salvation goods has proved to be extremely attractive to scholars in sociology and the study of religion Max Weber used the term salvation good to compare different religious traditions Pierre Bourdieu employed the term in order to analyze religious economy And recently an American group of researchers advocating rational choice of religion put the theme at the forefront of current debates This book the fruit of an International Congress in Lausanne in April 2005 brings together leading specialists in the fields of sociology and the study of religion who discuss the terms salvation goods or religious goods and religious market The authors test the applicability of these concepts by using specific examples and they either deliberately advocate or criticize Weberian Bourdieusian or rational choice perspectives

Social scientists sometimes seem not to know what to do with religion In the first century of sociology's history as a discipline the reigning concern was explaining the emergence of the modern world and that brought with it an expectation that religion would simply fade from the scene as societies became diverse complex and enlightened As the century approached its end however a variety of global phenomena remained dramatically unexplained by these theories Among the leading contenders for explanatory power to emerge at this time were rational choice theories of religious behavior Researchers who have spent time in the field observing religious groups and interviewing practitioners however have questioned the sufficiency of these market models Studies abound that describe thriving religious phenomena that fit neither the old secularization paradigm nor the equations predicting vitality only among organizational entrepreneurs with strict orthodoxies In this collection of previously unpublished essays scholars who have been immersed in field research in a wide variety of settings draw on those observations from the field to begin to develop more helpful ways to study religion in modern lives The authors examine how religion functions on the ground in a pluralistic society how it is experienced by individuals and how it is expressed in social institutions Taken as a whole these essays point to a new approach to the study of religion one that emphasizes individual experience and social context over strict categorization and data collection **W.
