

## ***Aspects of Coleridge's theory of imagination***

In Coleridge's works there are surprisingly few references to his theory of the imagination. His famous remarks that climax Book XIII of Biographia Literaria are inadequate as an exposition of a theory of the imagination: he does not define imagination *per se* at all, but instead subdivides it into two categories, primary and secondary imagination. For a more concise account of imagination itself one must turn to a statement in "The Statesman's Manual", in which Coleridge describes imagination as "that reconciling and mediatory power, which incorporating the reason in images of the sense, and organizing (as it were) the flux of the senses by the permanent and self-circling energies of the reason, gives birth to a system of symbols, harmonious in themselves, and consubstantial with the truths of which they are the conductors."

This statement reveals first that imagination is not a "faculty" of the mind, but is instead a process of activity within the mind, in which diverse elements in the external world are harmonized into a "gestalt". In this process the universal truths are connected with the concrete images and percepts then formed, with the aid of reason, into ideas. Thus these ideas are formed when the concrete form and the associated universal truth are processed together. Coleridge defines an idea as an "educt of the imagination actuated by pure reason."<sup>2</sup>

This remark involves four major elements: the universal truths; the concrete forms of the natural world; the mind and senses of the individual; and the end product of the interaction of the first three elements, namely the symbols, or ideas, or art. Coleridge defined the symbol as the "conductor" of truth, which should be "characterized by a translucence of the special in the individual, or of the general in the special, or of the universal in the general; above all by the translucence of the eternal through and in the temporal."<sup>3</sup> This seems to say, rather clumsily, that the symbol reveals the universal truth and the particular expression of that truth at the one time. All of this points to the central creed of the great romantic poets in England, Germany and France, namely "the great endeavour to overcome the split between subject and object, the self and the world, the conscious and the unconscious."<sup>4</sup>

Side-stepping the issue of "reason" temporarily, it is necessary to examine further the nature of the process of imagination. Coleridge called the imagination an *esemplastic* power, an adjective which he coined from the Greek words meaning "to shape into one."<sup>5</sup> Thus imagination operates *esemplastically*, unifying normally separated elements in the universe of perception. This is clarified by other statements by Coleridge: "The imagination modifies images, and gives unity to variety; it sees all things in one."<sup>6</sup> This basic principle is expressed forcefully in The Friend: "Every power in nature and in spirit must evolve an opposite, as the sole means and condition of its manifestation: and all opposition is a tendency to re-union . . . The identity of thesis and antithesis is the substance of all being."<sup>7</sup>

**From Chinese Cosmology to English Romanticism** Yu Liu, 2023-04-27 A culturally sensitive and rewarding new understanding of the cross cultural interaction between China and Europe In this important new work author Yu Liu argues that confined by a narrow English and European conceptual framework scholars have so far obscured the radical innovation and revolutionary implication of Samuel Taylor Coleridge and William Wordsworth's monistic philosophy Liu's innovative intellectual history traces the organic westward movement of the Chinese concept of *tianren heyi* or humanity's unity with heaven This monistic idea enters the European imaginary through Jesuit missionary Matteo Ricci's understanding of Chinese culture travels

through Spinoza's identification of God with nature becomes ingrained in eighteenth century English thought via the landscaping theory and practice of William Kent and Horace Walpole and emerges in the poetry and thought of Coleridge and Wordsworth. In addition to presenting a significantly different reading of the two English poets, Liu contributes to scholarship about English literary history, history of European philosophy and religion, English garden history and cross-cultural interactions between China and Europe in the sixteenth, seventeenth and eighteenth centuries.

**Nature Loves to Hide:**

**An Alternative History of Philosophy** Paul S. MacDonald, 2018-11. An alternative history of philosophy has endured as a shadowy parallel to standard histories although it shares many of the same themes. It has its own founding texts in the late ancient Hermetica from whence flowed three broad streams of thought: alchemy, astrology and magic. These thinkers' attitude toward philosophy is not one of detached speculation but of active engagement, even intervention. It appeared again in the European Middle Ages in the Renaissance with Rabelais, Paracelsus, Agrippa, Ficino and Bruno and in the early modern period with John Dee, Robert Fludd, Jacob Boehme, Thomas Browne, Kenelm Digby, van Helmont and Isaac Newton. In the 18th and 19th centuries, this book considers Lichtenberg's Fragments, Berkeley's Siris, Swedenborg, Hegel, von Baader and great Romantics such as Novalis, Goethe, S. T. Coleridge and E. A. Poe as well as Nietzsche and in the 20th century it turns to the great

modernist literature of Fernando Pessoa, Robert Musil, Ernst Bloch and P. K. Dick. **The Personalist**, 1959. **The Design of Biographia Literaria** Catherine M. Wallace, 2016-06-17. First published in 1983, this book examines a work whose intricacies have baffled and infuriated generations of readers and proposes a theory of Coleridge's writing habits that explains his explanation. The author painstakingly analyses the Biographia's organising structure, distinguishing between the daring conception and often inept execution of Coleridge's idea of critical discourse. It is argued that Coleridge's autobiographical format presents a richly metaphorical self whose literary life has led to the now famous doctrine of secondary imagination. The author's command of Coleridge scholarship will shed new light on the Biographia for specialists and non-specialists alike.

The GAM/DP Theory of Personality and Creativity William A. Therivel, 2001. In Volume IV the author continues his discussion of his theory of the development of personality and creativity, applying his theory to other interesting subjects. In saying something new, valid and important about each, he expands his theory. Many of his connections are positive comparisons while others are contrasting. Further research led the author to expand on themes initially presented in Volume I. The author uses 16 pages of photos to illustrate his points. *Hawthorne on the Imagination* Richard Joseph Coanda, 1960.
