Strangers to Relatives Sergei Kan, 2001-01-01 Strangers to Relatives is an intimate and illuminating look at a typical but misunderstood part of anthropological fieldwork in North America the adoption and naming of anthropologists by Native families and communities Adoption and naming have long been a common way for Native peoples in Canada and the United States to deal with strangers who are not enemies For over a century adoption and naming have also served as an important means for many Native American and First Nation communities to become connected to the anthropologists visiting and writing about them In this outstanding volume leading anthropologists in the United States and Canada discuss this issue by focusing on the cases of such prominent earlier scholars as Lewis Henry Morgan and Franz Boas They also share personal experiences of adoption and naming and offer a range of stimulating perspectives on the significance of these practices in the

past and today The contributors explore the impact of adoption and naming upon the relationship between scholar and Native community considering in particular two key issues How does adoption affect the fieldwork and subsequent interpretations by anthropologists and in turn how are Native individuals and communities themselves affected by adopting an outside scholar whose aim is to learn and write about them Strangers to Relatives not only sheds valuable light on how anthropology fieldwork is conducted but also makes a seminal contribution to our understanding of the ongoing often troubled relationship between the academy and Native communities

Red Matters Arnold Krupat, 2010-08-03 Arnold Krupat one of the most original and respected critics working in Native American studies today offers a clear and compelling set of reasons why red Native American culture history and literature should matter to Americans more than it has to date Although there exists a growing body of criticism demonstrating the importance of Native American literature in its own right and in relation to other ethnic and minority literatures Native materials still have not been accorded the full attention they require Krupat argues that it is simply not possible to understand the ethical and intellectual heritage of the West without engaging America's treatment of its indigenous peoples and their extraordinary and resilient responses Criticism of Native literature in its current development Krupat suggests operates from one of three critical perspectives against colonialism that he calls nationalism indigenism and cosmopolitanism Nationalist critics are foremost concerned with tribal sovereignty indigenist critics focus on non Western modes of knowledge and cosmopolitan critics wish to look elsewhere for comparative possibilities Krupat persuasively contends that all three critical perspectives can work in a complementary rather than an oppositional fashion A work marked by theoretical sophistication wide learning and social passion Red Matters is a major contribution to the imperative effort of understanding the indigenous presence on the American continents

Ojibwe Singers Michael David McNally, 2009 In the early nineteenth century Protestant missionaries promoted the translation of evangelical hymns into the Ojibwe language regarding this music not only as a shared form of worship but also as a tool for rooting out native cultural identity But for many Minnesota Ojibwe today the hymns emerged from this history of material and cultural dispossession to become emblematic of their identity as a distinct native people Author Michael McNally uses hymn singing as a lens to view culture in motion to consider the broader cultural processes through which Native American peoples have creatively drawn on the resources of ritual to make room for survival integrity and a cultural identity within the confines of colonialism

Jung and Ecopsychology Dennis L. Merritt, 2012 This

volume examines the evolution of the Western dysfunctional relationship with the environment explores the theoretical framework and concepts of Jungian ecopsychology and describes how it could be applied to psychotherapy our educational system and our relationship with indigenous people *The Great Encounter* Jayme A. Sokolow,2016-07-08 Traditional histories of North and South America often leave the impression that Native American peoples had little impact on the colonies and empires established by Europeans after 1492 This groundbreaking study which spans more than 300 years demonstrates the agency of indigenous peoples in forging their own history and that of the Western Hemisphere By putting the story of the indigenous peoples and their encounters with Europeans at the center a new history of the New World emerges in which the Native Americans become vibrant and vitally important components of the British French Spanish and Portuguese empires In fact their presence was the single most important factor in the development of the colonial world By discussing the great encounter of peoples and cultures this book provides a valuable new perspective on the history of the Americas **Literary Arts** Colin Randolph Semeniuk,2006-11-10 Literary arts have developed and continue to evolve with the modern human species These historical based developments have been segregated into pseudo cultures and pseudo traditions in support of political myths utilized to inspire fears and justify regulated legislation and beliefs through ancient myth based symbolism reinforced through commercialized arts that misrepresent historical fact based upon scientific technology and know how Furthermore the educational systems of established and recognized governing bodies exclude scientific based truth in favor of the corrupt foundation of political correct 1 cultural acceptance bound to cultural understanding based upon distorted mythology and propagandized traditions This exclusion is intended to promote fear through misunderstanding and propagate control of the masses This fear excludes groups of humans from one another and limits the ability of two human species to utilize the literary arts to solve problems in every area of academia and practical living Furthermore this continued misuse of the literary arts violates and inhibits the further development of the psychological reasoning ability of the human species and causes further development of inappropriate growth models that aim toward destruction due to their falsely based premises leading to wars against other segregated groups and the destructive exploitation of nature SOLUTION This dissertation will explain the interdisciplinary issues connected to the literary arts indicated in the problem above In the process of this explanation the general background of the Literary Arts will be examined and explained for laymen and scholars Finally through use of working examples this dissertation will show how literary arts are useful in rectifying these problems by helping to build a new foundation of knowledge for the global human species as the species faces universal development Philosophies of Religion Timothy Knepper,2022-11-03 In this global introduction to philosophy of religion you begin not with a single tradition but with religious philosophies from East Asia South Asia West Africa and Native North America alongside the classical Abrahamic and modern European traditions Matching this diversity of traditions chapters are organized around questions that acknowledge there is no single

understanding of any god or ultimate reality Instead you approach six different traditions of philosophizing about religion by asking questions about the journeys of both the self and the cosmos such as What is my path and Where did the cosmos come from Accompanied by introductory materials and an extensive glossary each chapter includes learning objectives questions for discussion and suggested primary and secondary sources The categories of religion and philosophy are interrogated throughout Equipped with study tools and universal questions about the self and the cosmos **Philosophies of Religion A Global and Critical Introduction** shows you how to philosophize about religions around the world **Conflicted Mission**

Linda M. Clemmons, 2014 From the mid 1830s to the 1860s the missionaries sent to Minnesota by the American Board of Commissioners for Foreign Missions ABCFM wrote thousands of letters to their supervisors and supporters claiming success in converting the Dakota people But author Linda M Clemmons reveals that the reality of the situation was far more conflicted than what those written records would suggest In fact in the rough Minnesota territory missionaries often found themselves looking to the Dakota for support The missionaries and their wives struggled to define what it meant to convert and civilize Dakota people And although many scholars depict missionaries as working hand in hand with the federal government Clemmons reveals discord over the Dakota people's treatment especially after the U S Dakota War of 1862 when many missionaries spoke out against exile The missionaries found that work with the Dakota was rarely as heroic romantic or successful as what they read about in the evangelical press but at the same time they themselves painted a rosier picture of their own work **Routledge Handbook of Indigenous Wellbeing** Christopher Fleming, Matthew Manning, 2019-04-18

The Routledge Handbook of Indigenous Wellbeing consists of five themes namely physical social and emotional economic cultural and spiritual and subjective wellbeing It fills a substantial gap in the current literature on the wellbeing of Indigenous people and communities around the world This handbook sheds new light on understanding Indigenous wellbeing and its determinants and aids in the development and implementation of more appropriate policies as better evidence informed policymaking will lead to better outcomes for Indigenous populations This book provides a reliable and convenient source of information for policymakers academics and students and allows readers to make informed decisions regarding the wellbeing of Indigenous populations It is also a useful resource for non government organizations to gain insight into relevant global factors for the development of stronger and more effective international policies to improve the lives of Indigenous communities

International Relations in Uncommon Places J. Beier, 2005-06-10 The central claim developed in this book is that disciplinary International Relations IR is identifiable as both an advanced colonial practice and a postcolonial subject The starting problematic here issues from disciplinary IR's relative dearth of attention to indigenous peoples their knowledges and the distinctive ways of knowing that underwrite them The book begins by exploring how IR has internalized many of the enabling narratives of colonialism in the Americas evinced most tellingly in its failure to take notice of indigenous peoples More fundamentally IR is read as a conduit for what the author terms the hegemonologue of the dominating society a knowing hegemonic Western voice that owing to its universalist pretensions speaks its knowledge to the exclusion of all others

Religion and the New Immigrants Helen Rose Ebaugh, Janet Saltzman Chafetz, 2000-10-18 New immigrants those arriving since the Immigration Reform Act of 1965 have forever altered American culture and have been profoundly altered in turn Although the religious congregations they form are often a nexus of their negotiation between the old and new they have received little scholarly attention Religion and the New Immigrants fills this gap Growing out of the carefully designed Religion Ethnicity and the New Immigration Research project Religion and the New Immigrants combines in depth studies of thirteen congregations in the Houston area with seven thematic essays looking across their diversity The congregations range from Vietnamese Buddhist to Greek Orthodox a Zoroastrian center to a multi ethnic Assembly of God presenting an astonishing array of ethnicity and religious practice Common research questions and the common location of the congregations give the volume a unique comparative focus Religion and the New Immigrants is an essential reference for scholars of immigration ethnicity and American religion

The Plains Sioux and U.S. Colonialism from Lewis and Clark to Wounded Knee Jeffrey Ostler, 2004-07-05 This volume first published in 2004 presents an overview of the history of the Plains Sioux as they became increasingly subject to the power of the United States in the 1800s Many aspects of this story the Oregon Trail military clashes the deaths of Crazy Horse and Sitting Bull and the Ghost Dance are well known Besides providing fresh insights into familiar events the book offers an in depth look at many lesser known facets of Sioux history and culture Drawing on theories of colonialism the book shows how the Sioux creatively responded to the challenges of US expansion and domination while at the same time revealing how US power increasingly limited the autonomy of Sioux communities as the century came to a close The concluding chapters of the book offer a compelling

reinterpretation of the events that led to the Wounded Knee massacre of December 29 1890

The Encyclopedic

Sourcebook of New Age Religions James R. Lewis, 2004-08-30 In the late 1980s the New Age movement became the focus of both media attention and widespread ridicule as some of the more outlandish aspects of the movement such as channeling and the use of crystals for healing briefly piqued the public's curiosity While the movement was at its height scholars of religion generally sneered at what was perceived to be a daffy shallow craze and ignored it as a subject of serious study Professor James R Lewis was among the first to examine this growing religious phenomenon scientifically In previous books he has investigated the New Age as the most visible manifestation of a significant spiritual subculture the roots of which reach back to Theosophy Spiritualism and New Thought The present collection pursues this theme bringing together some of the best recent scholarship on new religions Since the height of its popular influence the New Age has declined in strength but has given rise to a plethora of new denominations all shaped by New Age ideas and spirituality Reflecting the emergence of this new denominational structure the core chapters of this book focus on specific groups Other chapters examine the movement's historical roots A unique feature of Dr Lewis's work is his inclusion of extensive selections from New Age literature thus allowing readers to experience firsthand the unusual perspectives of the various groups This is a fascinating examination of a significant and persistent religious and social phenomenon
