*The Telescopic Tourist's Guide to the Moon* Andrew May, 2017-06-29 Whether you're interested in visiting Apollo landing sites or the locations of classic sci fi movies this is the tourist guide for you This tourist guide has a twist it is a guide to a whole different world which you can visit from the comfort of your backyard with the aid of nothing more sophisticated than an inexpensive telescope It tells you the best times to view the Moon the most exciting sights to look out for and the best equipment to use allowing you to snap stunning photographs as well as view the sights with your own eyes Have you ever been inspired by stunning images from the Hubble telescope or the magic of sci fi special effects only to look through a small backyard telescope at the disappointing white dot of a planet or faint blur of a galaxy Yet the Moon is different Seen through even a relatively cheap scope it springs into life like a real place with mountains and valleys and rugged craters With a bit of imagination you can even picture yourself as a sightseeing visitor there which in a sense you are

**Our Moon** Rebecca Boyle, 2025-06-03 LONGLISTED FOR THE NATIONAL BOOK AWARD NATIONAL BESTSELLER A riveting feat of science writing that recasts that most familiar of celestial objects into something eerily extraordinary pivotal to our history and awesome in the original sense of the word Ed Yong New York Times bestselling author of *An Immense World* WINNER OF THE LOS ANGELES TIMES BOOK PRIZE A NEW YORKER AND SMITHSONIAN BEST BOOK OF THE YEAR A New York Times Book Review Editors Choice Many of us know that the Moon pulls on our oceans driving the tides but did you know that it smells like gunpowder Or that it was essential to the development of science and religion Acclaimed journalist Rebecca Boyle takes readers on a dazzling tour to reveal the intimate role that our 4.51 billion year old companion has played in our biological and cultural evolution Our Moon's gravity stabilized Earth's orbit and its climate It drew

nutrients to the surface of the primordial ocean where they fostered the evolution of complex life The Moon continues to influence animal migration and reproduction plants movements and possibly the flow of the very blood in our veins While the Sun helped prehistoric hunters and gatherers mark daily time early civilizations used the phases of the Moon to count months and years allowing them to plan farther ahead Mesopotamian priests recorded the Moon s position in order to make predictions and in the process created the earliest known empirical scientific observations In Our Moon Boyle introduces us to ancient astronomers and major figures of the scientific revolution including Johannes Kepler and his influential lunar science fiction Our relationship to the Moon changed when Apollo astronauts landed on it in 1969 and it s about to change again As governments and billionaires aim to turn a profit from its resources Rebecca Boyle shows us that the Moon belongs to everybody and nobody at all
