**Guidelines on irrigation investment projects** Food and Agriculture Organization of the United Nations, 2019-04-15 Irrigation has been and will continue to be an agricultural and rural investment priority Development of the irrigation sector faces multiple challenges including water scarcity and degradation competition over shared resources and the impact of climate change Innovations are needed to address these challenges as well as emerging needs and to promote productive equitable and sustainable water management These guidelines produced by an inter agency team highlight experiences and

lessons learned from global irrigation investment operations They introduce innovative approaches tools and references and provide practical guidance on how to incorporate or apply them at each stage of the investment project cycle The guidelines will be a useful resource for national and international professionals involved in irrigation investment operations

*Organization, Operation and Maintenance of Irrigation Schemes* J. A. Sagardoy, G. O. Uittenbogaard, 1982 *Irrigation Management* Martin Burton, 2010 In many countries irrigated agriculture consumes a large proportion of the available water resources often over 70% of the total There is considerable pressure to release water for other uses and as a sector irrigated agriculture will have to increase the efficiency and productivity of its water use This is particularly true for manually operated irrigation systems managed by government agencies which provide water for a large number of users on small landholdings and represent 60% of the total irrigated area worldwide Drawing on the author's 30 years of experience in some 28 countries this book offers knowledge of the management of irrigation and drainage systems including traditional technical areas of systems operation and maintenance and expanding managerial institutional and organizational aspects Chapters provide guidelines to improve management operation and maintenance processes which move management thinking out of traditional public sector mindsets to a more customer focused performance oriented service delivery As a practical guide to improve efficiency and productivity in irrigated agriculture this book will be essential reading for irrigation managers and technicians as well as students and policy makers in water management agriculture and sustainable development

**Organization, Operation and Maintenance of Irrigation Schemes** Juan A. Sagardoy, 1986 Materials for Subsurface Land Drainage Systems L. C. P. M. Stuyt, W. Dierickx, J. Martínez Beltrán, 2005 Reliable subsurface drainage systems for groundwater table and salinity control are needed to maintain or enhance the productivity of irrigated lands and to contribute to the rural development of lowlands in the humid tropic This publication presents guidelines to assess the need for envelopes and for the selection of appropriate materials i.e pipes and envelopes for the proper and lasting performance of subsurface drainage systems In addition it also contains guidelines for adequate installation and maintenance of drainage materials as well as the required specifications and standards of such materials which may be used in tender documents for implementation of subsurface drainage works Practical guidelines for the implementation of laboratory and field investigations to evaluate the performance of drainage materials have also been included Publisher's description

**Generic Typology for Irrigation Systems Operation** Daniel Renault, Godaliyadda Gedara Ariyaratne Godaliyadda, 1999 This report presents a methodology for identifying the main features constraints and opportunities of gravity fed irrigation systems which influence management and operation of the system for the purpose of water delivery It presents the development of a generic for improving irrigation system operations A case study of 64 irrigation systems in Sri Lanka is presented illustrating the practical application of the proposed typology *Organization, Operation and Maintenance of Irrigation Schemes* J. **Water Resource Management** Neil S. Grigg, 2016-10-25 This book addresses the enormous global challenge of providing balanced and sustainable solutions to urgent water problems The author explores our dependence on access to safe water and other water related services and how driving forces of the human and natural worlds are degrading this access The greatest challenges involve conflicts between people and interest groups across all countries as well as the economic and political difficulties in finding solutions through infrastructure development The book takes an interdisciplinary approach to Integrated Water Resources Management or IWRM which provides a set of tools for policy development planning and organization assessment systems analysis finance and regulation The author suggests that IWRM is challenging because of the human element but that no other process can reconcile the conflicting agendas involved with water management The broad range of topics covered here as well as 25 case summaries will be of interest to scientists engineers practitioners and advanced level students interested in the integrated management of water as a resource *Towards Sustainable Food*

*Production in Africa* Morris Fanadzo, Nothando Dunjana, Hupenyu Allan Mupambwa, Ernest Dube, 2023-07-10 This edited book is focused on Sustainable Development Goal 2 It offers a comprehensive and topical collection of practices technologies and innovations in the field of sustainable food production and security under a changing climate It is a one stop handbook for farmers researchers extensionists policy makers and other stakeholders seeking to identify and disseminate best fit technologies for local and regional landscapes It offers an understanding of the challenges risks and uncertainties as well as opportunities to foster productive and sustainable food production Smallholder farming and agriculture in general is facing a serious threat from climate change that has resulted in erratic and unpredictable rainfall and increased temperatures among other abiotic stresses These climate change induced pressures have reduced productivity mainly among the smallholder farmers who are critical in driving the attainment of sustainable development goals like SDG 2 12 and 13 The objective of the book is to document effective and practicable practices and technologies that can be adopted by smallholder African farmers

as mitigation measures against the effects of climate change This book is of interest to researchers agricultural scientists climate change scientists capacity builders and policymakers *Typology for Irrigation System Operation Generic Approach and Application in Sri Lanka* Godaliyadde Gedara Ariyaratne Godaliyadda,1998 **Institutional Reform for Irrigation and Drainage** Fernando J. Gonzalez,Salman M. A. Salman,2002-01-01 If sustainable management of tropical forests is to be accomplished and deforestation brought under control the on the ground performance of existing forest concessions along with the allocation of new concessions will have to be strengthened This study examines the failures of forest concessions and the loss of tropical forests due to mismanagement during the last two decades It also emphasizes the potential gains resulting from strengthening the allocation management and supervision of concessions by concentrating on improving procedures introducing performance incentives and monitoring key performance elements **Modern Land Drainage** Lambert K. Smedema,Willem F. Vlotman,David Rycroft,2004-08-15 Fully renewed and extended this edition is a valuable source of information for anyone involved in drainage engineering and management It provides new theories technologies knowledge and experiences in combination with traditional land development practices in the humid temperature zone Aspects covered include management and maintenance Managing Salinization Waltina Scheumann,2012-12-06 Salinization of soils is a major threat to irrigated agriculture and counteracts the targets of costly public infrastructure investments In this study salinization is regarded as the outcome of an institutional arrangement which impedes the effective implementation of well known and well established control measures be they technical managerial or economic In public irrigation systems neither the management units nor the farmers are offered any incentives towards the control of high groundwater levels and salinization if the management units are embedded in a highly centralized non market institutional setting The author answers the question under which conditions management units and irrigators are active in halting and reversing the process of salinization

This book delves into Organization Operation Maintenance Of Irrigation Schemes Fao Irrigation And Drainage Paper. Organization Operation Maintenance Of Irrigation Schemes Fao Irrigation And Drainage Paper is an essential topic that must be grasped by everyone, from students and scholars to the general public. The book will furnish comprehensive and in-depth insights into Organization Operation Maintenance Of Irrigation Schemes Fao Irrigation And Drainage Paper, encompassing both the fundamentals and more intricate discussions.

1. This book is structured into several chapters, namely:
  - Chapter 1: Introduction to Organization Operation Maintenance Of Irrigation Schemes Fao Irrigation And Drainage Paper
  - Chapter 2: Essential Elements of Organization Operation Maintenance Of Irrigation Schemes Fao Irrigation And Drainage Paper
  - Chapter 3: Organization Operation Maintenance Of Irrigation Schemes Fao Irrigation And Drainage Paper in Everyday Life
