Florida Law Review, 2006 Critical Perspectives on Entrepreneurship Caroline Essers, Pascal Dey, Deirdre Tedmanson, Karen Verduyn, 2017-02-17 Entrepreneurship is largely considered to be a positive force driving venture creation and economic growth Critical Perspectives on Entrepreneurship questions the accepted norms and dominant assumptions of scholarship on the matter and reveals how they can actually obscure important questions of identity ideology and inequality The book's distinguished authors and editors explore how entrepreneurship study can privilege certain forms of economic action whilst labelling other more collective forms of organization and exchange as problematic Demystifying the archetypal vision of the white male entrepreneur this book gives voice to other entrepreneurial subjectivities and engages with the tensions paradoxes and ambiguities at the heart of the topic This challenging collection seeks to further the momentum for alternate analyses of the field and to promote the growing voice of critical entrepreneurship studies It is a useful tool for researchers advanced students and policy makers

The Entrepreneurship Dynamic Claudia Bird Schoonhoven, Elaine Romanelli, 2001 New organizations do not emerge full blown from the idiosyncratic minds of individual entrepreneurs Their ideas for new organizations their ability to acquire capital and other essential resources and their likelihood of survival as entrepreneurs derive from the contexts in which they live and work The Entrepreneurship Dynamic explores the conditions that prompt the founding of large numbers of new organizations or entirely new industries and the effects on existing industries economies and societies

Schumpeterian Dynamics and Metropolitan-Scale Productivity Yeonwoo Lee, 2018-05-08 This title was first published in 2003 Schumpeter first put forward the premise that the incessant turbulence of an economy in motion carrying out new combinations of products production

methods with new technologies and the opening of new markets is capable of explaining patterns of economic growth and change Focusing on US industrialized urban areas this volume tests this theory empirically Localized employment churn registered as job creation destruction dynamics is used to account for variations in US metro regional economic productivity performances during the 1986 1999 period The results suggest that the employment turnover and replacement dynamics have large and significant positive effects on localized productivity growth independent of a variety of industrial restructuring processes occurring simultaneously While employment churn effects are robust across US Census regions they do not exert a uniform influence on metro regional productivity performances across time Until 1996 job creation and destruction dynamics often cancelled each other out as metro regions underwent continued industrial restructuring Since 1996 however positive effects on metro region productivity growth have been consistently strong In addition to a strong positive effect on productivity of the emergence of a localized IT sector both an expanding service sector share of regional employment and a rising public spending share of regional output exert powerful downward pressure of localized productivity growth rates
