Portraiture in South Asia since the Mughals Crispin Branfoot, 2018-06-30 One of the most remarkable artistic achievements of the Mughal Empire was the emergence in the early seventeenth century of portraits of identifiable individuals unprecedented in both South Asia and the Islamic world Appearing at a time of increasing contact between Europe and Asia portraits from the reigns of the great Mughal emperor patrons Akbar Jahangir and Shah Jahan are among the best known paintings produced in South Asia In the following centuries portraiture became more widespread in the visual culture of South Asia especially in the rich and varied traditions of painting but also in sculpture and later prints and photography This collection seeks to understand the intended purpose of a range of portrait traditions in South Asia and how their style setting and representation may have advanced a range of aesthetic social and political functions The chapters range across a wide historical period exploring ideals of portraiture in Sanskrit and Persian literature the emergence and political symbolism of Mughal portraiture through to the paintings of the Rajput courts sculpture in Tamil temples and the transformation of portraiture in colonial north India and post independence Pakistan This specially commissioned collection of studies from a strong list of established scholars and rising stars makes a significant contribution to South Asian history art and visual culture

Images of Thought Gregory Minissale, 2006 Images of Thought is an entirely new approach to understanding non Western art Supported by a wide reading in anthropology theology and philosophy it provides an intellectual context for reading the visual language of Indian and Persian miniature art By decoding artistic conventions and with searching visual analyses the book attempts to transform our understanding of art as an illustration of history to art as a

The Album of the World Emperor Emine Fetvacı, 2020-01-07

The first study of album making in the Ottoman empire during the seventeenth century demonstrating the period's experimentation eclecticism and global outlook The Album of the World Emperor examines an extraordinary piece of art an album of paintings drawings calligraphy and European prints compiled for the Ottoman sultan Ahmed I r 1603-17 by his courtier Kalender Pa a d 1616 In this detailed study of one of the most important works of seventeenth century Ottoman art Emine Fetvacı uses the album to explore questions of style iconography foreign inspiration and the very meaning of the visual arts in the Islamic world The album's thirty-two folios feature artworks that range from intricate paper cutouts to the earliest examples of Islamic genre painting and contents as eclectic as Persian and Persian influenced calligraphy studies of men and women of different ethnicities and backgrounds depictions of popular entertainment and urban life and European prints depicting Christ on the cross that in turn served as models for apocalyptic Ottoman paintings Through the album Fetvacı sheds light on imperial ideals as well as relationships between court life and popular culture and shows that the boundaries between Ottoman art and the art of Iran and Western Europe were much more porous than has been assumed Rather than perpetuating the established Ottoman idiom of the sixteenth century the album shows that this was a time of openness to new models outside sources and fresh forms of expression Beautifully illustrated and featuring all the folios of the original seventy-page album The Album of the World Emperor revives a neglected yet significant artwork to demonstrate the distinctive aesthetic innovations of the Ottoman court
