Kathleen Armour

Origin Diet How Eating Like Our Stone Age Ancestors Will Maximize Your Health:

The Origin Diet Elizabeth Somer, 2002 From a leading nutrition expert comes a proven health and weight loss plan that takes readers back to age old nutritional basics Includes recipes menus and lifestyle tips 25 illustrations **Food Faiths** Catherine L. Newell, 2023-08-29 Food Faiths Diet Religion and the Science of Spiritual Eating explores how individuals internalize scientific knowledge regarding health and diet and then incorporate that information into their lives as the basis of a personal spiritual practice In this book Catherine L Newell examines how science is used to justify a dietary lifestyle and investigates the world of spiritual eating which is comprised of practitioners who identify themselves not by a religion but by their diet These diets are based in diverse sciences such as anthropology ecology systems biology nutritional studies biomedicine and physiology adherents view their diet as a lifestyle a path to enlightenment and a nebulously defined point of health This in turn enables the practitioner to locate themselves in relation to other members of their community to older traditions suffused with religious practice and to understand their praxis in relation to the entire biosphere While on one level this project explores how food health and diet can be a source of spiritual fulfillment on another level Food Faiths illustrates how science and religion are subsumed into a culture and merged to form the basis of an individual's lived spiritual practice *Diet and the Disease of Civilization* Adrienne Rose Bitar, 2018-01-26 Diet books contribute to a 60 billion industry as they speak to the 45 million Americans who diet every year Yet these books don't just tell readers what to eat they offer complete philosophies about who Americans are and how we should live Diet and the Disease of Civilization interrupts the predictable debate about eating right to ask a hard question what if it's not calories but concepts that should be counted Cultural critic Adrienne Rose Bitar reveals how four popular diets retell the Fall of Man as the narrative backbone for our national consciousness Intensifying the moral panic of the obesity epidemic they depict civilization itself as a disease and offer diet as the one true cure Bitar reads each diet the Paleo Diet the Garden of Eden Diet the Pacific Island Diet the detoxification or detox diet as both myth and manual a story with side effects shaping social movements driving industry and constructing fundamental ideas about sickness and health Diet and the Disease of Civilization unearths the ways in which diet books are actually utopian manifestos not just for better bodies but also for a healthier society and a more perfect world

Evolution of the Human Diet Peter S. Ungar, 2007 We are interested in the evolution of hominin diets for several reasons One is the fundamental concern over our present day eating habits and the consequences of our societal choices such as obesity prevalent in some cultures and starvation in others Another is that humans have learned to feed themselves in extremely varied environments and these adaptations which are fundamentally different from those of our closest biological relatives have to have had historical roots of varying depth The third and the reason why most paleoanthropologists are interested in this question is that a species trophic level and feeding adaptations can have a strong effect on body size locomotion life history strategies geographic range habitat choice and social behavior Diet is key to

understanding the ecology and evolution of our distant ancestors and their kin the early hominins A study of the range of foods eaten by our progenitors underscores just how unhealthy many of our diets are today This volume brings together authorities from disparate fields to offer new insights into the diets of our ancestors Paleontologists archaeologists primatologists nutritionists and other researchers all contribute pieces to the puzzle This volume has at its core four main sections Reconstructed diets based on hominin fossils tooth size shape structure wear and chemistry mandibular biomechanics Archaeological evidence of subsistence stone tools and modified bones Models of early hominin diets based on the diets of living primates both human and non human paleoecology and energetics Nutritional analyses and their implications for evolutionary medicine New techniques for gleaning information from fossil teeth bones and stone tools new theories stemming from studies of paleoecology and new models coming from analogy with modern humans and other primates all contribute to our understanding When these approaches are brought together they offer an impressive glimpse into the lives of our distant ancestors The contributions in this volume explore the frontiers of our knowledge in each of these disciplines as they address the knowns the unknowns and the unknowables of the evolution of hominin diets

Gorgeous Skin Erica Angyal, 2014-10-29 REISSUE Finally there is a quick easy and comprehensive program to help you achieve healthy vibrant and youthful skin in 30 days A revolution in nutrition the 30 day Gorgeous Skin lifestyle program debunks all the beauty myths of our time showing you how to be beautiful from the inside out Using up to date clinical research you ll find information on all the latest antioxidants vitamins minerals and supplements to slow down the ageing process and to improve the texture tone and health of your skin It also includes valuable lifestyle management tools and relaxation techniques to help you maintain lifelong health beauty and vitality The program includes A safe three day cleansing and detoxification plan to rid the body of toxins eradicate blemishes reduce fine lines and create an even skin tone All the current information on skin superfoods and nutritional supplements for anti ageing and wrinkle fighting to enhance repair and regeneration of your skin cells subdue inflammation and boost collagen production Hundreds of delicious new recipes facts and healthy skin tips as part of a complete program for natural health and beauty How to identify and use the skin protectors to reverse or slow the ageing process and avoid harmful food lifestyle and environmental factors that accelerate ageing A 28 day beautiful skin plan for the bride to be or anyone who wants to prepare for a special occasion Erica gives you the secrets of beauty from within If you follow her dietary and lifestyle recommendations your skin will show the difference within 30 days Dr Barry Sears author of The Zone Those really interested in vital skin will find this book compelling and entertaining Dr Mike Roizen author of New York Times 1 bestseller Real Age Are You As Young As You Can Be

Anxious Eaters Janet Chrzan, Kima Cargill, 2022-08-30 What makes fad diets so appealing to so many people How did there get to be so many different ones often with eerily similar prescriptions Why do people cycle on and off diets perpetually searching for that one simple trick that will solve everything And how did these fads become so central to conversations about food and nutrition Anxious Eaters

shows that fad diets are popular because they fulfill crucial social and psychological needs which is also why they tend to fail Janet Chrzan and Kima Cargill bring together anthropology psychology and nutrition to explore what these programs promise yet rarely fulfill for dieters They demonstrate how fad diets help people cope with widespread anxieties and offer tantalizing glimpses of attainable self transformation Chrzan and Cargill emphasize the social contexts of diets arguing that beliefs about nutrition are deeply rooted in pervasive cultural narratives Although people choose to adopt new eating habits for individual reasons broader forces shape why fad diets seem to make sense Considering dietary beliefs and practices in terms of culture nutrition and individual psychological needs *Anxious Eaters* refrains from moralizing or promoting a right way to eat Instead it offers new ways of understanding the popularity of a wide range of eating trends including the Atkins Diet and other low or no carb diets beliefs that ingredients like wheat products and sugars are toxic allergenic or addictive food avoidance and Clean Eating practices and paleo or primal diets *Anxious Eaters* sheds new light on why people adopt such diets and why these diets remain so attractive even though they often fail *The Hadza* Frank Marlowe, 2010-03-23 In *The Hadza* Frank Marlowe provides a quantitative ethnography of one of the last remaining societies of hunter gatherers in the world The Hadza who inhabit an area of East Africa near the Serengeti and Olduvai Gorge have long drawn the attention of anthropologists and archaeologists for maintaining a foraging lifestyle in a region that is key to understanding human origins Marlowe ably applies his years of research with the Hadza to cover the traditional topics in ethnography subsistence material culture religion and social structure But the book's unique contribution is to introduce readers to the more contemporary field of behavioral ecology which attempts to understand human behavior from an evolutionary perspective To that end *The Hadza* also articulates the necessary background for readers whose exposure to human evolutionary theory is minimal

Food for Life Julie Metcalf Cull, 2003 Annual Review of Anthropology, 2007 Annual compilation of critical articles from all areas of the discipline of anthropology La paleoZona Aronne Romano, 2015-04-16 Perdere fino a un chilo a settimana senza mai soffrire la fame avere più energia dormire meglio essere più concentrati sul lavoro e migliorare le proprie performance atletiche Questa la promessa della rivoluzionaria PaleoZona Il suo segreto Semplice scegliere e combinare gli alimenti che ci fanno stare meglio quelli che costituiscono la benzina più adatta al nostro corpo Perch da un punto di vista genetico l'uomo non cambiato dal Paleolitico in poi quando si nutriva solo di carni magre pesce noci radici frutta fresca e vegetali I nuovi cibi quelli comparsi successivamente con l'avvento dell'agricoltura e dell'allevamento come cereali legumi e latticini ci fanno male non sono compatibili con il nostro organismo e sono all'origine di fastidi come mal di testa disturbi gastrici allergie fino alla celiachia all'infarto e al cancro In questo libro il dottor Aronne Romano ci illustra i fondamenti del ritorno alle origini alimentari e combina i principi della Zona con quelli della dieta del Paleolitico Un manuale chiaro e facile da consultare con un inserto di ricette da portare sempre con sè per iniziare subito a cucinare e mangiare in modo diverso e più consapevole Perch raggiungere la forma perfetta si può e il cibo la cura migliore per la propria salute e per una bellezza
