Origins of Anatomically Modern Humans Doris V. Nitecki, Matthew H. Nitecki, 2013-11-11 This volume is based on the Field Museum of Natural History Spring Systematics Symposium held in Chicago on May 11 1991 The financial support of Ray and Jean Auel and of the Field Museum is gratefully acknowledged When we teach or write we present only those elements that support our arguments We avoid all weak points of our debate and all the uncertainties of our models Thus we offer hypotheses as facts Multiauthored books like ours which simultaneously advocate and question diverse views avoid the pitfalls and lessen the impact of indoctrination In this volume we analyze the anthropological and biological disagreements and the positions taken on the origins of modern humans point out difficulties with the interpretations and suggest that the concept of the human origin can be explained only when we first attempt to define *Homo sapiens sapiens* One of the major controversies in physical anthropology concerns the geographic origin of anatomically modern humans It is undisputed due to the extensive research of the Leakeys and their colleagues that the family Hominidae originated in Africa but the geographic origin of *Homo sapiens sapiens* is less concretely accepted Two schools of thought exist on this topic

Mellars, 2014-07-14 This volume of papers delivered to The Royal Society in February of 1992 explores the debate over the single center hypothesis of human origins versus multi regional evolution Over the last five years there has been growing support for a recent Out of Africa origin of modern humans based on fresh interpretations of the palaeoanthropological and archaeological evidence new applications of physical dating techniques to important sites and a greatly increased genetic data base on recent human variation and its geographical patterning But there has also been a parallel growth of doubts about interpretations of the new evidence from some workers This book provides a review of recent progress and allows some of these doubts to be aired and discussed In addition to the editors the contributors are O Bar Yosef A M Bowcock P Brown H J Deacon L L Cavalli Sforza J D Clark R Gr n J J Hublin A A Lin G H Miller J L Mountain H P Schwarcz N J Shackleton F H Smith and M Stoneking Originally published in 1993 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 **The Origin of Modern Humans** Roger Lewin, 1998 *Origin And Past Of Modern Humans As Viewed From Dna, The: Proceedings Of The Workshop On The Origin And Past Of Homo Sapiens Sapiens As Viewed From Dna - Theoretical Approach* Sydney Brenner, Kazuro Hanihara, 1995-05-09 This book surveys the history of automatic vehicle guidance based on the processing of visual information starting from the very first projects worldwide up to the latest developments It also presents the ARGO prototype vehicle developed at the University of Parma Italy and describes its equipment setup and performance ARGO has been equipped with cameras and processing systems to drive autonomously in real traffic conditions The complete system has been tested on public roads during a tour in which ARGO drove itself along the Italian highway network for more than 2000 km A detailed analysis of this trip is also included *The Origin of Modern Humans* Roger Lewin, 1998-01-01 The tools used to unearth the facts of our prehistoric past have not always been tangible Each fossil discovery and new methods of analysis is met with an avalanche of debate alternate interpretations and the refutation of competing theories This text is a concise and provocative look at some answers to the question Where did we come from *Origins And Past Of Modern Humans, The: Towards Reconciliation* Keiichi Omoto, Phillip Vallentine Tobias, 1998-03-26 **The Emergence of Modern Humans** Erik Trinkaus, 1989 **Modern Humans** John F. Hoffecker, 2017-10-31 Modern Humans is a vivid account of the most recent and perhaps the most important phase of human evolution the appearance of anatomically modern people Homo sapiens in Africa less than half a million years ago and their later spread throughout the world Leaving no stone unturned John F Hoffecker demonstrates that Homo sapiens represents a

major transition in the evolution of living systems in terms of fundamental changes in the role of non genetic information Modern Humans synthesizes recent findings from genetics including the rapidly growing body of ancient DNA the human fossil record and archaeology relating to the African origin and global dispersal of anatomically modern people Hoffecker places humans in the broad context of the evolution of life emphasizing the critical role of genetic and non genetic forms of information in living systems as well as how changes in the storage transmission and translation of information underlie major transitions in evolution He also draws on information and complexity theory to explain the emergence of Homo sapiens in Africa several hundred thousand years ago and the rapid and unprecedented spread of our species into a variety of environments in Australia and Eurasia including the Arctic and Beringia beginning between 75 000 and 60 000 years ago This magisterial work will appeal to all with an interest in the ever fascinating field of human evolution

Conceptual Issues in Modern Human Origins Research Geoffrey A. Clark, Catherine M. Willermet, While those who study human origins now agree that the evolution of modern human form extends back much further in time than the evolution of modern human behavior they disagree sharply as to how to interpret the substantive data Two fundamentally incommensurate interpretations of our origins the Replacement camp and the Continuity camp have now emerged out of pre existing models and theories that go back to the last quarter of the 19th century This book contends that these positions are based on radically different biases and assumptions about what the remote human past was like The purpose of this volume is to examine those conceptual differences not to arrive at a consensus but rather to explore the reasons why a consensus might never be possible

The Evolution of Modern Humans in Africa Pamela R. Willoughby, 2007 Pamela Willoughby provides a wide ranging synthesis of current knowledge about the evolution of fully modern humans in Africa during the Middle Palaeolithic Middle Stone Age According to most scholars our modern ancestors first emerged in Africa and then spread throughout the habitable world Willoughby brings evidence from mitochondrial DNA ancient fossils and archaeological remains including her own research in Tanzania to bear on questions regarding the place of human species in nature the specific origins of Homo Sapiens and the dispersal of these modern humans throughout Africa and around the globe She confronts straightforwardly the problems of dating the earliest modern humans and she discusses the various alternative models of modern human origins which will be debated for years to come
