Origine Byzantine De La Notation Neumatique De Leglise Latine:

Origine byzantine de la notation neumatique de l'église latine Jean-Baptiste Thibaut, 1907 **Western Plainchant**
David Hiley, 1995 Plainchant is the oldest substantial body of music that has been preserved in any shape or form It was first written down in Western Europe in the wake of the Carolingian renaissance of the 8th and 9th centuries Many thousands of chants have been sung at different times or places in a multitude of forms and styles responding to the differing needs of the church through the ages This book provides a clear and concise introduction designed both for those to whom the subject is new and those who require a reference work for advanced studies It begins with an explanation of the liturgies which plainchant was designed to serve All the chief genres of chant different types of liturgical book and plainchant notations are described The later chapters are complemented by plates with commentary and transcriptions After an exposition of early medieval theoretical writing on plainchant a historical survey follows the constantly changing nature of the repertory through from the earliest times to the restoration of medieval chant a century ago The historical relations between Gregorian Old Roman Milanese Spanish and other repertories is considered Important musicians and centre of composition are discussed together with the establishment of Gregorian chant in all the lands of medieval Europe and the reformations and revisions carried out by the religious orders and the humanists Copiously illustrated with over 200 musical examples transcribed from original sources the book highlights the diversity of practice and richness of the chant repertory characteristic of the Middle Ages As both a self contained summary and also with its many pointers to further reading a handbook for research it will become an indispensable reference book on this vast subject *Monuments de la notation ekphonétique et neumatique de l'église latine* Jean-Baptiste Thibaut, **Origine Byzantine de la Notation Neumatique de L'église Latine. [With Facsimiles.]** Jean-Baptiste Thibaut, 1907 Performing the Gospels in Byzantium Roland Betancourt, 2021-05-13 Tracing the Gospel text from script to illustration to recitation this study looks at how illuminated manuscripts operated within ritual and architecture Focusing on a group of richly illuminated lectionaries from the late eleventh century the book articulates how the process of textual recitation produced marginalia and miniatures that reflected and subverted the manner in which the Gospel was read and simultaneously imagined by readers and listeners alike This unique approach to manuscript illumination points to images that slowly unfolded in the mind of its listeners as they imagined the text being recited as meaning carefully changed and built as the text proceeded By examining this process within specific acoustic architectural spaces and the sonic conditions of medieval chant the volume brings together the concerns of sound studies liturgical studies and art history to demonstrate how images texts and recitations played with the environment of the Middle Byzantine church
Grundriss Der Musikwissenschaft Hugo Riemann, 1914 Byzantine Music and Hymnography Henry Julius Wetenhall Tillyard, 1923 *Gregorian Chant and the Carolingians* Kenneth Levy, 2020-12-08 A world renowned scholar of plainchant Kenneth Levy has spent a portion of his career investigating the nature and ramifications of this repertory s shift

from an oral tradition to the written versions dating to the tenth century In Gregorian Chant and the Carolingians which represents the culmination of his research Levy seeks to change long held perceptions about certain crucial stages of the evolution and dissemination of the old corpus of plainchant most notably the assumption that such a large and complex repertory could have become and remained fixed for over a century while still an oral tradition Levy portrays the promulgation of an authoritative body of plainchant during the reign of Charlemagne by clearly differentiating between actual evidence hypotheses and received ideas How many traditions of oral chant existed before the tenth century Among the variations noted in written chant can one point to a single version as being older or more authentic than the others What precursors might there have been to the notational system used in all the surviving manuscripts where the notational system seems fully formed and mature In answering questions that have long vexed many scholars of Gregorian chant s early history Levy offers fresh explanations of such topics as the origin of Latin neumes the shifting relationships between memory and early notations and the puzzling differences among the first surviving neume species from the tenth century which have until now impeded a critical restoration of the Carolingian musical forms Music & Letters ,1922

Writing Sounds in Carolingian Europe Susan Rankin,2018-11-08 Musical notation has not always existed in the West musical traditions have often depended on transmission from mouth to ear and ear to mouth Although the Ancient Greeks had a form of musical notation it was not passed on to the medieval Latin West This comprehensive study investigates the breadth of use of musical notation in Carolingian Europe including many examples previously unknown in studies of notation to deliver a crucial foundational model for the understanding of later Western notations An overview of the study of neumatic notations from the French monastic scholar Dom Jean Mabillon 1632 1707 up to the present day precedes an examination of the function and potential of writing in support of a musical practice which continued to depend on trained memory Later chapters examine passages of notation to reveal those ways in which scripts were shaped by contemporary rationalizations of musical sound Finally the new scripts are situated in the cultural and social contexts in which they emerged **La théorie de la musique antique et médiévale** Michel Huglo,2023-07-28 This is the final volume in the set of four collections of Michel Huglo s articles to be published in the Variorum series and focuses on medieval music theory The point of departure for Huglo s research was his doctoral dissertation on tonaries published in 1971 as a consequence he studied the manuscripts of music theory concerning plainchant and later those with writings on music by authors of Late Antiquity as well as the Liber glossarum with its many definitions of musical terms In this volume certain articles consider the interpretation or dissemination of texts instruction in the art of plainchant and musical instruction at the university Others concern the manuscripts of St Augustine s De musica and of the writings of Calcidius Macrobius Helisachar Hucbald Gerbert of Aurillac Abbo of Fleury John of Afflighem and Hieronymus de Moravia amongst others The volume closes with a bibliography of Michel Huglo complementing that published in 1993 and a summary list of his reviews of books on music and liturgy Ce

Theory and Method in Historical Ethnomusicology Jonathan McCollum, David G. Hebert, 2014-09-11 Historical ethnomusicology is increasingly acknowledged as a significant emerging subfield of ethnomusicology due to the fact that historical research requires a different set of theories and methods than studies of contemporary practices and many historiographic techniques are rapidly transforming as a result of new technologies In 2005 Bruno Nettl observed that the term historical ethnomusicology has begun to appear in programs of conferences and in publications Nettl 2005 274 and as recently as 2012 scholars similarly noted an increasing concern with the writing of musical histories in ethnomusicology Ruskin and Rice 2012 318 Relevant positions recently advanced by other authors include that historical musicologists are all ethnomusicologists now and that all ethnomusicology is historical Stobart 2008 yet we sense that such arguments while useful and theoretically correct may ultimately distract from careful consideration of the kinds of contemporary theories and rigorous methods uniquely suited to historical inquiry in the field of music In Theory and Method in Historical Ethnomusicology editors Jonathan McCollum and David Hebert along with contributors Judah Cohen Chris Goertzen Keith Howard Ann Lucas Daniel Neuman and Diane Thram systematically demonstrate various ways that new approaches to historiography and the related application of new technologies impact the work of ethnomusicologists who seek to meaningfully represent music traditions across barriers of both time and space Contributors specializing in historical musics of Armenia Iran India Japan southern Africa American Jews and southern fiddling traditions of the United States describe the opening of new theoretical approaches and methodologies for research on global music history In the Foreword Keith Howard offers his perspective on historical ethnomusicology and the importance of reconsidering theories and methods applicable to this field for the enhancement of musical understandings in the present and future
