Origins Of Islamic Law The Quran The Muwatta And Madinan:

The Origins of Islamic Law Yasin Dutton, 2013-09-05 If the Qur'an is the first written formulation of Islam in general Malik's Muwatta is arguably the first written formulation of the Islam in practice that becomes Islamic law This book considers the methods used by Malik in the Muwatta to derive the judgements of the law from the Qur'an and is thus concerned on one level with the finer details of Qur'anic interpretation However since any discussion of the Qur'an in this context must also include considerations of the other main source of Islamic law namely the sunna or normative practice of the Prophet this latter concept especially its relationship to the terms of hadith and amal traditions and living tradition also receives considerable attention and in many respects this book is more about the history and development of Islamic law than it is about the science of Qur'anic interpretation This is the first book to question the hitherto accepted frameworks of both the classical Muslim view and the current revisionist western view on the development of Islamic law It is also the first study in a European language to deal specifically with the early development of the Madinan later Malik school of jurisprudence as it is also the first to demonstrate in detail the various methods used both linguistic and otherwise in interpreting the legal verses of the Qur'an It will be of interest to all those interested in the underlying bases of Islamic law and culture and of particular interest to those involved in studying and teaching Islamic studies both at undergraduate and research level It will also be of interest to those studying the relationship between orality and literacy in ancient societies and the writing down of ancient law

The Origins of Islamic Law Yasin

Dutton,2017-12-24 This book is about the application of the Quran as law It considers the methods used by Malik in his Muwatta to derive judgements from the Quran and is thus concerned on one level with the finer details of Quranic interpretation However since any discussion of the Quran in the context of the Muwatta must necessarily include consideration of the terms Sunnah hadith ijihad and amal these terms or at least the concepts behind them also receive considerable attention Indeed the argument of this book has more bearing on the history and development of Islamic law of which the above terms are the expression than on the science of Quranic interpretation This study is an attempt to go back before the time of As Shaafi and reconstruct a picture of how the most ancient of the ancient schools i e that of Madina approached the question of applying the Quran as law This study divides naturally into three parts The first gives the general contextual background o Madina which Is essential if one is to place Malik and his muwatta in their proper Madinan setting Part two concerns the more specifically Quranic element in the muwatta Part three is in the nature of a conclusory section where the commonly accepted axiom that Islamic law is based on the two fold source of Quran and sunnah is re examined in the light of the preceding chapters

Laher,2024-12-31 Tawatur is the concept that information yields certainty if acquired through a sufficient number of independent channels Tawatur in Islamic Thought is an attempt to unravel the twisted historical threads of the conception and usage of tawatur across diverse Islamic disciplines in light of both Western academia and debates within Muslim scholarship In the process numerous salient questions in Islamic thought are tackled such as epistemic certitude scholarly consensus ijm and the rationalism traditionalism relationship The study culminates in the question of the extent to which tawatur was used by Muslim scholars to define the boundaries of Islam and of orthodoxy Tawatur in Islamic Thought shows that the majority voices in Muslim scholarship across sectarian boundaries reached a steady state conception of a two tiered orthodoxy corresponding to two tiers of tawatur an outer tier that includes all who affirm a definitive kernel of Islam and an inner tier that is more exclusive

Islamic Natural Law Theories Anver M. Emon,2010-04-08 This book offers the first sustained jurisprudential inquiry into Islamic natural law theory It introduces readers to competing theories of Islamic natural law theory based on close readings of Islamic legal sources from as early as the 9th and 10th centuries CE In popular debates about Islamic law modern Muslims perpetuate an image of Islamic law as legislated by God to whom the devout are bound to obey Reason alone cannot obligate obedience at most it can confirm or corroborate what is established by source texts endowed with divine authority This book shows however that premodern Sunni Muslim jurists were not so resolute Instead they asked whether and how reason alone can be the basis for asserting the good and the bad thereby justifying obligations and prohibitions under Shari'a They theorized about the authority of reason amidst competing theologies of God For premodern Sunni Muslim jurists nature became the link between the divine will and human reason Nature is the product of God's purposeful creation for the benefit of humanity Since nature is created by God and thereby reflects His goodness nature is fused with both fact and value Consequently as a divinely created good nature can be investigated to reach both empirical and normative conclusions about the good and bad They disagreed however whether nature's goodness is contingent upon a theology of God's justice or God's potentially contingent grace upon humanity thus contributing to different theories of natural law By recasting the Islamic legal tradition in terms of legal philosophy the book sheds substantial light on an uncharted tradition of natural law theory and offers critical insights into contemporary global debates about Islamic law and reform

Reading the Qur'an Ziauddin Sardar,2011-08-30 I grew up reading the Qur'an on my mother's lap writes Ziauddin Sardar It's an experience I share with most Muslim children And so it is that our connection to the Qur'an is infused with associations of the warmest and most enduring of human bonds In Reading the Qur'an Sardar one of Europe's leading public intellectuals laments that for far too many Muslims the Qur'an he had learned in his mother's lap has become a stick used for ensuring conformity and suppressing dissenting views Indeed some find in the Qur'an

justification for misogyny validation for hatred of others an obsession with dress and mindless ritual rules for running modern states Arguing passionately but reasonably against these trends Sardar speaks out for a more open less doctrinaire approach to reading the Qur'an He contends that the Qur'an is not fixed in stone for all time but a dynamic text which every generation must encounter anew and whose relevance and implications for our time we have yet to fully discover The words of the Qur'an imply movement the religious life it tells us is not about standing still but always striving to make our life our society the entire world around us a better place for everyone Sardar explores the Qur'an from a variety of perspectives from traditional exegesis to hermeneutics critical theory and cultural analysis drawing fresh and contemporary lessons from the Sacred Text He also examines what the Qur'an says about such contemporary topics as power and politics rights of women suicide domestic violence sex homosexuality the veil freedom of expression and evolution Ziauddin Sardar opens a new window on this remarkable Sacred Text in a book that will engage all devout Muslims and will interest anyone curious about the Qur'an and Islam today **The Message and the Book** John Bowker, Atlantic Books, an imprint of Grove Atlantic Ltd., 2012-03-27 Grand in its sweep this survey of the sacred writings of the major religions of the world offers a thoughtful introduction to the ideas and beliefs upon which great faiths are built Under the expert guidance of John Bowker a religious scholar and author of international stature readers explore the key texts of Jewish Christian Muslim Hindu Jain Sikh Buddhist Parsi Confucian Daoist and Shinto traditions The author discusses some 400 books among them such well known sacred texts as the Bible and the Quran but also spiritual writings by theologians philosophers poets and others Bowker provides clear and illuminating commentary on each text describing the content and core tenets of the work and quoting pertinent passages He also sets the writings in religious and historical contexts showing how they have influenced and in many cases continue to influence artistic musical literary and political traditions The Message and the Book is essential reading for anyone who wishes to understand the meaning and the deep significance of primary religious texts of civilizations around the globe

Shari'a Scripts Brinkley Messick, 2018-01-02 A case study in the textual architecture of the venerable legal and ethical tradition at the center of the Islamic experience Shar'a Scripts is a work of historical anthropology focused on Yemen in the early twentieth century There while colonial regimes late Ottoman reformers and early nationalists wrought decisive changes to the legal status of the shar'a significantly narrowing its sphere of relevance the Zayd school of jurisprudence rooted in highland Yemen for a millennium still held sway Brinkley Messick uses the richly varied writings of the Yemeni past to offer a uniquely comprehensive view of the shar'a as a localized and lived phenomenon Shar'a Scripts reads a wide spectrum of sources in search of a new historical anthropological perspective on Islamic textual relations Messick analyzes the shar'a as a local system of texts distinguishing between theoretical or doctrinal juridical texts or the library and those produced by the shar'a courts and notarial writers termed the archive Attending to textual form he closely examines representative books of madrasa instruction formal opinion giving by muftis and imams the structure of court judgments and the drafting of contracts

Messick's intensive readings of texts are supplemented by retrospective ethnography and oral history based on extensive field research. Further, the book ventures a major methodological contribution by confronting anthropology's longstanding reliance upon the observational and the colloquial. Presenting a new understanding of Islamic legal history, *Shar'a Scripts* is a groundbreaking examination of the interpretative range and historical insights offered by the anthropologist as reader.

Philanthropy in the Muslim World Shariq A. Siddiqui, David A. Campbell, 2023-06-01 Philanthropy plays an essential role in Muslim practice around the world. Using a new framing, *Philanthropy in the Muslim World* contributes to the literature by adding Muslim majority countries that have not been previously included in cross-national philanthropy volumes as well as countries that have important Muslim minority communities. *The Oxford Handbook of Comparative Law* Mathias Reimann, Reinhard Zimmermann, 2019-03-26 This fully revised and updated second edition of *The Oxford Handbook of Comparative Law* provides a wide-ranging and diverse critical survey of comparative law at the beginning of the twenty-first century. It summarizes and evaluates a discipline that is time-honoured but not easily understood in all its dimensions. In the current era of globalization, this discipline is more relevant than ever, both on the academic and on the practical level. The Handbook is divided into three main sections. Section I surveys how comparative law has developed and where it stands today in various parts of the world. This includes not only traditional model jurisdictions such as France, Germany, and the United States, but also other regions like Eastern Europe, East Asia, and Latin America. Section II then discusses the major approaches to comparative law, its methods, goals, and its relationship with other fields such as legal history, economics, and linguistics. Finally, section III deals with the status of comparative studies in over a dozen subject-matter areas, including the major categories of private, economic, public, and criminal law. The Handbook contains forty-eight chapters written by experts from around the world. The aim of each chapter is to provide an accessible, original, and critical account of the current state of comparative law in its respective area, which will help to shape the agenda in the years to come. Each chapter also includes a short bibliography referencing the definitive works in the field. Exploring Islam Salih Sayilgan, 2021 *Exploring Islam* is a comprehensive yet accessible introduction to the foundations of the Islamic faith, including its history, theology, and spiritual practice. The book also deals with issues such as jihad, the status of women, and the various sectarian divisions in Islam. Most distinctive about this work is its analysis of the lived experience of Muslims in modern American life. The book explores questions such as: What are the foundations of Islam? How do Muslims relate to and interpret the Qur'an? Who is the Prophet Muhammad? What does Shari'a law really mean? What are the major themes of Islamic theology? What are the theological and political issues that led to divisions among Muslims? Do Muslims and Christians believe in the same God? How do Muslims practice Islam in America? What are the challenges and opportunities for American Muslims? In addressing these questions, Sayilgan offers readers a perspective that is scholarly, judicious, and engaging.
