Painter, 2005 This second edition brings the collection up to date including the newest research from the Communist side of the Cold War and the most recent debates on culture race and intelligence **Origins of the Cold War** Melvyn P. Leffler, 2005 This second edition brings the collection up to date including the newest research from the Communist side of the Cold War and the most recent debates on culture race and intelligence **Eight Controversial Questions of History** Bob Doti, 2024-04-24 Is history written by the victors It should not be Nor should it be based on opinions but what do writers in the field tell us about the questions we are posing We will not engage in conspiracy theory but facts to discuss these questions We will look at everyone from Pat Buchanan to the writings of Joseph Stalin to answer the eight controversial questions of history Did the Treaty of Versailles trigger German extremism Did the British policy of appeasement toward Germany before WW2 help trigger the Cold War after WW2 Is isolationism a good policy or not Why didn't Canada revolt in 1776 with the US Could the takeover by the communists in Russia have been prevented Did Mao want to fight the USA in the Korean War Did FDR act out of racial animus with Japanese internment Did Reagan accelerate or hinder the end of the Cold War Indeed in writing history it constantly undergoes revision as new primary documents or new perspectives from secondary sources emerge as the historians constantly write to this day This new perspective as the culture changes informs us better These questions concern the current world we live in for the rest of our lives So this is not the final word on these questions Eight essays have four themes war and peace nationalism and imperialism democracy and dictatorship and impactful presidents and controversy *British Nuclear Mobilisation Since 1945* Jonathan Hogg, Kate Brown, 2021-05-18 This book explores aspects of the social and cultural history of nuclear Britain in the Cold War era 1945 1991 and contributes to a more multivalent exploration of the consequences of nuclear choices which are too often left unacknowledged by historians of post war Britain In the years after 1945 the British government mobilised money scientific knowledge people and military industrial capacity to create both an independent nuclear deterrent and the generation of electricity through nuclear reactors This expensive and vast technopolitical project mostly top secret and run by small sub committees within government was central to broader Cold

War strategy and policy Recent attempts to map the resulting social and cultural history of these military industrial policy decisions suggest that nuclear mobilisation had far reaching consequences for British life The chapters in this book were originally published as a special issue of Contemporary British History Origins of the Black Atlantic Laurent Dubois,Julius S. Scott,2013-01-11 Between 1492 and 1820 about two thirds of the people who crossed the Atlantic to the Americas were Africans With the exception of the Spanish all the European empires settled more Africans in the New World than they did Europeans The vast majority of these enslaved men and women worked on plantations and their labor was the foundation for the expansion of the Atlantic economy during the seventeenth and eighteenth centuries Until relatively recently comparatively little attention was paid to the perspectives daily experiences hopes and especially the political ideas of the enslaved who played such a central role in the making of the Atlantic world Over the past decades however huge strides have been made in the study of the history of slavery and emancipation in the Atlantic world This collection brings together some of the key contributions to this growing body of scholarship showing a range of methodological approaches that can be used to understand and reconstruct the lives of these enslaved people New Approaches to the Governance of Natural Resources J. Grant,W. Compaoré,M. Mitchell,2014-12-22 The book provides an in depth analysis of the governance of Africa s natural resource sectors oil biofuels forestry fisheries minerals and new insights for readers as they navigate the burgeoning research on global governance initiatives and regional national strategies that seek to improve the governance of the continent s natural resources **Practicing History** Gabrielle M. Spiegel,2005 This essential new collection of key articles from critical thinkers and practicing historians focuses on where history is now in terms of its theory and practice For students teachers and historians alike this is an indispensable reader *Program of the Annual Meeting - American Historical Association* American Historical Association,2006 Some programs include also the programs of societies meeting concurrently with the association **The French Revolution** Gary Kates,2006 Collating key texts at the forefront of new research and interpretation this updated second edition adds new articles on the Terror and race colonial issues and studies all aspects of this major event from its origins through to its consequences **The Renaissance** John Jeffries Martin,2003 The Renaissance paradigm in crisis Politics language and power Individualism identity and gender Art science and humanism Religion tradition and innovation Medieval Religion Constance H. Berman,2005 Constance Hoffman Berman presents an indispensable collection of the most influential and revisionist work to be done on religion in the Middle Ages in the last two decades Bringing together an authoritative list of scholars from around the world this book is a comprehensive compilation of the most important work in this field Medieval Religion provides a valuable service for all those who study the Middle Ages church history or religion Revolutionary Russia Rex A. Wade,2004-07-31 This collection presents the major recent writings on the Russian Revolution and its context It brings together key texts to illustrate new interpretive approaches and covers the central topics and themes Together the chapters in this volume form a coherent representation of both the events

and the theories and debates that relate to them Twentieth-Century China Jeffrey N. Wasserstrom, 2013-10-14 *Twentieth Century China New Approaches* is an important revisionist study of China's recent past. The chapters throw light on a variety of subjects within the field which has recently undergone considerable change. The three major parts of this reader take into account the historical shape of the century, local perspectives on national history and reflections on cultural history. The chapters in this volume reflect a move away from a Western-centred analysis of Chinese history as well as the new wealth of archival material made accessible over the last decade. They highlight in challenging ways important topics that have generated considerable excitement among historians. Subjects discussed include the watershed date of 1949, feminism, the revolutions, the discourse of the communist party and political theatre in modern China. **From Roman Provinces to Medieval Kingdoms** Thomas F.X. Noble, 2006-04-07 This is a prestigious collection of revisionist thinking on the key question of how the middle ages began. Including a wealth of material on the origins of the Barbarian people and their tribes and a clear introduction to each section, this is an invaluable student reference. *International Cold War Military Records and History* William W. Epley, 1996 Haitian History Alyssa Goldstein Sepinwall, 2013 Despite Haiti's proximity to the United States and its considerable importance to our own history, Haiti barely registered in the historic consciousness of most Americans until recently. Those who struggled to understand Haiti's suffering in the earthquake of 2010 often spoke of it as the poorest country in the Western hemisphere but could not explain how it came to be so. In recent years, the amount of scholarship about the island has increased dramatically. Whereas once this scholarship was focused on Haiti's political or military leaders, now the historiography of Haiti features lively debates and different schools of thought. Even as this body of knowledge has developed, it has been hard for students to grasp its various strands. *Haitian History* presents the best of the recent articles on Haitian history by both Haitian and foreign scholars, moving from colonial Saint Domingue to the aftermath of the 2010 earthquake. It will be the go-to volume introduction to the field of Haitian history, helping to explain how the promise of the Haitian Revolution dissipated and presenting the major debates and questions in the field today. The Origins of the Cold War Thomas G. Paterson, 1974 Reformation to Revolution Margo Todd, 2002-01-31 Few periods of English history have been so subject to revisionism as the Tudors and Stuarts. This volume offers a full introduction to the complex historiographical debates currently raging about politics and religion in early modern England. It draws together thirteen articles culled from familiar and also less accessible sources, embraces revisionist and counter revisionist viewpoints, combines controversial works on both politics and religion, covers Tudor as well as early Stuart England, includes helpful glossary, explanatory headnotes and suggestions for further reading. These carefully edited and introduced essays draw on the new evidence of newsletters and ballads and ritual as well as the more traditional sources to offer a new and broader understanding of this transformative era of English history. **Nazism and German Society, 1933-1945** David Crew, 2013-05-13 The image of the Third Reich as a monolithic state presiding over the brainwashed fanatical masses retains

a tenacious grip on the general public's imagination. However, a growing body of research on the social history of the Nazi years has revealed the variety and complexity of the relationships between the Nazi regime and the German people. This volume makes this new research accessible to undergraduate and graduate students alike.
