Origins The Emergence And Evolution Of Our Species And Its Possible Future

Livia Kohn

Origins The Emergence And Evolution Of Our Species And Its Possible Future:

Origins Richard E. Leakey, Roger Lewin, 1982 Discusses the evolution of prehistoric ape like creatures into human beings theorizing that the key to this transformation was the ability to share and cooperate in a social context *The Mysterious Origins of Hybrid Man* Susan B. Martinez, 2013-11-02 A provocative challenge to Darwin's theory of evolution Shows there is no missing link because the human race since day one is the result of outright interbreeding among highly diverse types Reveals multiple Gardens of Eden and how each continent has its own independent hominid lineages Explains Homo sapiens mental powers the Great Leap Forward and how we acquired the blood of the gods which endowed us with a soul Did we evolve from apes or are we all descendants of Adam and Eve Why is the missing link still missing Is the dumb luck of natural selection valid Piecing together the protohistory of humanity through anthropology genetics paleolinguistics and indigenous traditions Susan B Martinez offers an entirely original alternative to Darwin's evolution Modern humanity did not evolve but is a mosaic of mixed ancestry the result of eons of cross breeding and retro breeding among different groups including Cro Magnon Neanderthal hobbits giants and Africa's Lucy and Zinj Martinez shows that there were multiple Gardens of Eden and how each continent had its own blend of races prior to the Great Flood which caused the diaspora that brought a renaissance of culture to every division of the Earth Martinez explains Homo sapiens mental powers the Great Leap Forward in cosmological terms how we are the product of both heaven and earth She identifies the Sons of Heaven and the angel engendered races explaining how Homo sapiens acquired the blood of the gods which endowed us with a soul Providing the ultimate resolution to the Evolution versus Creationism debate this landmark study of hybrid man justifies his unexpectedly sudden appearance in the fossil record the curious parallels between oral histories of the world's people and why anatomically modern features are found in the earliest paleontological evidence **The Heart of Listening, Volume 1**

Hugh Milne, 1998-06-18 Originally published as a single volume The Heart of Listening has been re issued as two separate volumes because of public demand for a more concise portable edition Milne a third generation Scottish osteopath begins by explaining the visionary approach to healing and how it may be applied to the realm of craniosacral work He explains the importance of meditation centering and the cultivation of heartfulness in the development of compassionate practice Milne introduces the reader to the story of visionary work its genesis evolution philosophy and practice and explains how a grounding in meditation sensitive touch and intuitive perception can lead to a remarkable unfoldment in skill development

Affective Neuroscience Jaak Panksepp, 2004-09-30 Some investigators have argued that emotions especially animal emotions are illusory concepts outside the realm of scientific inquiry However with advances in neurobiology and neuroscience researchers are demonstrating that this position is wrong as they move closer to a lasting understanding of the biology and psychology of emotion In *Affective Neuroscience* Jaak Panksepp provides the most up to date information about the brain operating systems that organize the fundamental emotional tendencies of all mammals Presenting complex material

in a readable manner the book offers a comprehensive summary of the fundamental neural sources of human and animal feelings as well as a conceptual framework for studying emotional systems of the brain Panksepp approaches emotions from the perspective of basic emotion theory but does not fail to address the complex issues raised by constructionist approaches These issues include relations to human consciousness and the psychiatric implications of this knowledge The book includes chapters on sleep and arousal pleasure and fear systems the sources of rage and anger and the neural control of sexuality as well as the more subtle emotions related to maternal care social loss and playfulness Representing a synthetic integration of vast amounts of neurobehavioral knowledge including relevant neuroanatomy neurophysiology and neurochemistry this book will be one of the most important contributions to understanding the biology of emotions since Darwins *The Expression of the Emotions in Man and Animals* *Darwin's Walk and The Last Wave* Richard Krooth, 2017-08-30 This book describes the reasons humankind may be facing its last moments on Planet Earth Darwin marked the path of species evolution modification and extinction Following Darwin's trajectory of evolution the author reveals how human made technologies have had a devastating impact on Earth's biosphere signaling the continuing disappearance of landscapes and the decline of species life

Encyclopedia of Time Samuel L. Macey, 2013-04-11 In this encyclopedia some 200 international scholars in 360 articles explore subjects such as physics archeoastronomy astronomy mathematics time's measurements and divisions as well as covering other scientific and interdisciplinary areas biology economics and political science horology history medicine geography geology and telecommunications **Human Remains** Helen Patricia MacDonald, 2006-01-01 Until 1832 when an Act of Parliament began to regulate the use of bodies for anatomy in Britain public dissection was regularly and legally carried out on the bodies of murderers and a shortage of cadavers gave rise to the infamous murders committed by Burke and Hare to supply dissection subjects to Dr Robert Knox the anatomist This book tells the scandalous story of how medical men obtained the corpses upon which they worked before the use of human remains was regulated Helen MacDonald looks particularly at the activities of British surgeons in nineteenth century Van Diemens Land a penal colony in which a ready supply of bodies was available Not only convicted murderers but also Aborigines and the unfortunate poor who died in hospitals were routinely turned over to the surgeons This sensitive but searing account shows how abuses happen even within the conventions adopted by civilized societies It reveals how from Burke and Hare to today's televised dissections by German anatomist Dr Gunther von Hagens some people's bodies become other people's entertainment Michael Osborn on Metaphor and Style Michael Osborn, 2018-07-01 This volume features two dimensions of Michael Osborn's work with rhetorical metaphor The first focuses on his early efforts to develop a conception of metaphor to advance the understanding of rhetoric while the second concerns more recent efforts to apply this enriched conception in the analysis and criticism of significant rhetorical practice The older emphasis features four of Osborn's more prominent published essays revealing the personal context in which they were generated their strengths and shortcomings and how they may have inspired the work of

others His more recent unpublished work analyzes patterns of metaphor in the major speeches of Demosthenes the evolution of metaphors of illness and cure in speeches across several millennia the exploitation of the birth death rebirth metaphor in Riefenstahl's masterpiece of Nazi propaganda *Triumph of the Will* and the contrasting forms of spatial imagery in the speeches of Edmund Burke and Barack Obama and what these contrasts may portend Species of Origins Karl W. Giberson, Donald A. Yerxa, 2002-10-09 In *Species of Origins* Karl W. Giberson and Donald A. Yerxa examine America's controversial conversation about creation and evolution While noting that part of the discord stems from the growing cultural and religious diversity of the United States they argue powerfully that the real issue is the headlong confrontation between two seemingly incompatible worldviews upon which millions of Americans rely modern naturalistic science and traditional Judeo-Christian religions *The Extraordinary Story of Human Origins* Piero Angela, 1993-06 How can we know about the lives of our ancestors who lived 30 000 or 300 000 or 3 million years ago In *The Extraordinary Story of Human Origins* Piero and Alberto Angela address the many difficulties and challenges that scientists face in assembling the record of human evolution To piece together the intriguing puzzle of human origins it is necessary to study all clues that are made available by multidisciplinary research including paleontology biochemistry geology genetics physics and climatology Like so many Sherlock Holmeses researchers seek all possible clues and analyze them meticulously in hopes of being able to reconstruct the past These pieces are few and fragmentary ranging from the footprints left in volcanic ash 3.7 million years ago by hominids who walked exactly as we do to a Y pattern on molars and mitochondrial DNA But they all provide information on the diet diseases hunting techniques and art of *Australopithecus* *Homo habilis* *Homo erectus* the Neanderthal and the first *Homo sapiens sapiens* Written in an accessible but authoritative style this study includes many lively reconstructions of the everyday life of our earliest ancestors based on the most reliable data *The Extraordinary Story of Human Origins* makes available to a wide audience a unique look inside the exciting world of research into the beginnings of human life on earth Science and the Dao Livia Kohn, 2016 **Lost Kingdom: Animal Death in the Anthropocene** Wendy A. Wiseman, Burak Kesgin, 2024-03-12 The authors in *Lost Kingdom* grapple with both the catastrophe of mass animal extinction in which the panoply of earthly life is in the accelerating process of disappearing and with the mass death of industrial animal agriculture Both forms of anthropogenic violence against animals cast the Anthropocene as an era of criminality and loss driven by boundless human exceptionalism forcing a reckoning with and an urgent reimagining of human-animal relations Without the sleights of hand that would lump humanity into a singular *Anthropos* of the Anthropocene the authors recognize the differential nature of human impacts on animal life and the biosphere as a whole while affirming the complexity of animal worlds and their profound imbrications in human cultures societies and industries Confronting the reality of the Sixth Mass Extinction and mass animal death requires forms of narrativity that draw on traditional genres and disciplines while signaling a radical break with modern temporalities and norms Chapters in this volume reflect this challenge while embodying the

interdisciplinary nature of inquiry into non human animality at the edge of the abyss historiography cultural anthropology post colonial studies literary criticism critical animal studies ethics religious studies Anthropocene studies and extinction studies entwine to illuminate what is arguably the greatest crisis for all creatures in the past 65 million years **Heart of Listening** Hugh Milne,1998 This deluxe hardcover editions contains both Volume I and II of The Heart of Listening Milne a third generation Scottish osteopath begins by explaining the visionary approach to healing and how it may be applied to the realm of craniosacral work He explains the importance of meditation centering and the cultivation of heartfulness in the development of compassionate practice Milne introduces the reader to the story of visionary work its genesis evolution philosophy and practice and explains how a grounding in meditation sensitive touch and intuitive perception can lead to a remarkable unfoldment in skill development In the second volume Milne details the anatomy physiology energetics and techniques that are the essential core of visionary craniosacral work His particular genius lies in his ability to weave a delicate tapestry of narrative poetry and scientific fact into a fascinating and insightful exposition of the visionary healing arts **Primal Body, Primal Mind** Nora Gedgaudas,2011-05-27 Combining your body s Paleolithic needs with modern nutritional and medical research for complete mind body wellness Provides sustainable diet strategies to curb sugar cravings promote fat burning and weight loss reduce stress and anxiety improve sleep and moods increase energy and immunity and enhance memory and brain function Shows how our modern diet leads to weight gain and diseases of civilization such as cancer osteoporosis metabolic syndrome heart disease and ADD Explains how diet affects the brain hormone balance and the aging process and the crucial role of vitamin D in cancer and disease prevention Examining the healthy lives of our pre agricultural Paleolithic ancestors and the marked decline in stature bone density and dental health and the increase in birth defects malnutrition and disease following the implementation of the agricultural lifestyle Nora Gedgaudas shows how our modern grain and carbohydrate heavy low fat diets are a far cry from the high fat moderate protein hunter gatherer diets we are genetically programmed for leading not only to lifelong weight gain but also to cravings mood disorders cognitive problems and diseases of civilization such as cancer osteoporosis metabolic syndrome insulin resistance heart disease and mental illness Applying modern discoveries to the basic hunter gatherer diet she culls from vast research in evolutionary physiology biochemistry metabolism nutrition and chronic and degenerative disease to unveil a holistic lifestyle for true mind body health and longevity Revealing the primal origins and physiological basis for a high fat moderate protein starch free diet and the importance of adequate omega 3 intake critical to our brain and nervous system but sorely lacking in most people s diets she explains the nutritional problems of grains gluten soy dairy and starchy vegetables which natural fats promote health and which such as canola oil harm it the crucial role of vitamin D in cancer and disease prevention the importance of saturated fat and cholesterol and how diet affects mental health memory cognitive function hormonal balance and cellular aging With step by step guidelines recipes and meal recommendations this book offers sustainable strategies for

a primally based yet modern approach to diet and exercise to reduce stress and anxiety lose weight improve sleep and mood increase energy and immunity enhance brain function save money on groceries and live longer and happier *The Case Against Women Raising Children* Kathleen A. Ryan Carlsson, 2002-03-08 For information about the book go to www.GroenendaelPress.com Evolution and culture produce a body and mind to suit a creature's role in the world Whether care of the young is provided by males females or both each species has evolved caregiver traits suited to that task The result is caring women and provider men In other words you are what you do However with the honing of each trait a creature pays a price In the case of a woman who specialized her body and mind to childcare the price was a failure to develop skill at financial self sufficiency and individual direction which in turn made it more likely that such a woman will live in a subordinate relationship Women as primary parents perpetuated gender roles Women internalized this definition of themselves and they became somewhat comfortable with it Even when they wanted more power over their lives they found themselves trapped from within But human beings have also evolved the trait of educability We can learn We can choose the direction in which we develop our abilities and traits The case against women raising children is the case for parents raising children Human Prehistory in Fiction Charles De Paolo, 2015-09-11 What was the world like for people thousands of years ago How can we know Through fiction This is a work of literary criticism and more It begins with a discussion of the problem of authenticity and then considers twelve pieces of fiction that depict human prehistory H G Wells *The Island of Doctor Moreau* Pierre Boulle's *The Planet of the Apes* Jules Verne's *The Village in the Treetops* Edgar Rice Burroughs *The Land That Time Forgot* the struggle for legitimacy in Wells *The Grisly Folk* the Tasmanian analogue in Lester Del Rey's *The Day Is Done* William Golding's *The Inheritors* the promise of humanity in Arthur C Clarke's 2001 *A Space Odyssey* the theme of a god among the heathen in Wells *The Lord of the Dynamos* and other works Jean Auel's *The Clan of the Cave Bear* J H Rosny Aine's *Quest for Fire* and Wells *The Time Machine* An Invention A final chapter considers the paleoanthropologist as literary critic

The Roots of Transcendence Edward Bruce Bynum, 2006-09-01 Critical Acclaim for *The Roots of Transcendence* From the Scholars This is a powerful book A true picture of the cross fertilization of human history and culture A major book one of the signposts of the time Molefi Kete Asante PhD Chairman Department of African American Studies Temple University Author *Afrocentricity and Rhythms* *Unity From the Psychiatrists* A PIONEERING TEXT in Transego Psychology The author envisions the next step in the development of human psychology He raises the new question that the self is not localized in the mind but is non local a field of interconnected relations A valuable model is presented to define psychopathological diagnostic issues and therapeutic treatment issues Truly wonderful Richard D King MD From the Preface Author *African Origin of Biological Psychiatry* From the Consciousness Researchers A daring leap involving new conceptual models Discusses the anxieties and stresses of our time while IT PROVIDES READERS THE TOOLS BY WHICH ANXIETIES AND STRESSES CAN BE ADDRESSED Stanley Krippner PhD Distinguished Professor of Psychology California Institute of Integral

Studies Author Dreamtime and Dreamwork and Your Personal Mythology A mighty synthesis of knowledge and feeling science and poetry clinical observation and spiritual insight which SPEAKS POWERFULLY TO LAY AND PROFESSIONAL PEOPLE ALIKE An important contribution to our understanding of the mind and its operation in the world John White MAT Author Future Science and Kundalini Evolution and Enlightenment Here is the epic adventure of the rise and unfolding of human consciousness from its earliest days millennia ago on through the first civilizations and down to contemporary times The mythic Mitochondrial DNA mother of humanity of 10 000 generations ago is used to personalize this journey for readers a journey seen to be an integral part of each of us This includes not only her shared African gene pool but also the neuro biologically interwoven evolutionary impulse How different personalities deal with this intelligent and luminous current is the primary thrust of this groundbreaking book that readers will find of extraordinary value in the exploration of human consciousness Edward Bruce Bynum PhD is a clinical psychologist family therapist and Director of the Behavioral Medicine and Biofeedback Clinic University of Massachusetts Health Services He is the author of The Family Unconscious and Families and the Interpretation of Dreams He has published widely in both popular and professional journals Some of his work has been translated into German Japanese and Russian He is a student and a practitioner of Kundalini Yoga

Peoples and Environment in India K.K. Misra, 2001 Contents Environment Culture and Development in India The Environment in Prehistoric Research Environment and Stone Age Cultures of Kalahandi Orissa Cultural Ecology of the Eastern Ghats South India from Prehistoric Times to the Ethnographic Present Biodiversity and Society Forest Policies and Forest Communities in India Forest Ecology and Sustainable Tribal Development in India Mohua Plantation and its Socio Economic Importance in Tribal Ecosystem People and Environment in Himachal Himalaya Ethnoecological System of the Gond Approaches and Methods The Paradox of Harmony Will the Paradise Lost be Regained Environment Health and Nutrition in Tribal India Perceived Environmental Changes and Adaptive Strategies **Primal Nutrition** Ron Schmid, 2015-09-17 Explores how the traditional foods of ancient cultures can naturally help prevent and treat degenerative disease and chronic conditions Examines the protective nutrients inherent in primal foods such as wild seafood grass fed meat and raw dairy explaining how they differ from Western refined foods Explains how to create your own commonsense primal diet tailored to your specific needs and conditions such as allergies eczema arthritis and even cancer Builds upon the work of Dr Weston A Price Dr Francis Pottenger and other nutritional health pioneers The human body's innate mechanisms for healing and immunity extend beyond the mending of cuts and broken bones or recovery from colds and flu Given the foods we evolved to thrive on foods our ancestors knew well the body can naturally prevent and overcome a host of degenerative conditions and chronic illnesses from allergies eczema and arthritis to dental caries heart attack and even cancer Drawing on the work of Dr Weston A Price Dr Francis Pottenger and other nutritional health pioneers Dr Ron Schmid demonstrates that the strongest and most disease resistant indigenous cultures around the world lived on whole natural

foods seafood wild game healthy grass fed domestic animals and in some cases whole grains and raw dairy He explores how modern refined diets differ from ancestral ones the dramatic declines in health seen in indigenous cultures that adopt modern diets and the steps you can take to build health with traditional foods He observes that the foods considered essential and sacred in native cultures the foods around which rituals and ceremonies evolved and that were emphasized prior to and during pregnancy were invariably animal source foods such as seafood liver and raw milk products thus underscoring the importance of these foods to overall health and immunity a fact that modern nutritional science has overwhelmingly proved true Blending the wisdom of traditional eating patterns with modern scientific knowledge Dr Schmid explains how to apply these principles to create your own commonsense primal diet tailored to your specific needs to rebuild health and improve longevity

Foods of the Gods Gary Westfahl, George Edgar Slusser, Eric S. Rabkin, 1996 Gluttony and starvation pleasure and pain growth and decay These and other extremes of our condition related to food though all but banned from the civilized tables of mainstream fiction are ideal topics for the undomesticated free roaming modes of fantasy As acts and ideas food and eating are fundamental to all that makes us human and dominate our symbolic realms of art literature and cuisine These essays show us the power of speculative modes of fiction to help us look anew at prehistorical and psychomylthical attitudes toward food and eating historical Western cultural attitudes toward the material fact of food and the necessity of eating and the relationship between attitudes toward food and how how much when and where we eat The contributors come from a variety of backgrounds including anthropology film and French Russian English and medieval literature Ranging in their focus from shamans to cannibals utopias to social Darwinism muscle magazines to supermarket tabloids the contributors discuss the theory and practice of science fictional eating the dialectic at the level of eating between individual needs and collective norms and the ways that eating habits and the availability and choice of food serve to contextualize and demarcate modern fictional genres In addition to discussing such writers as C S Lewis Stephen King Octavia Butler Jonathan Swift and Anne Rice the contributors also consider such films as Indiana Jones and the Temple of Doom and Cocteau s Beauty and the Beast

Immerse yourself in the artistry of words with Crafted by is expressive creation, **Origins The Emergence And Evolution Of Our Species And Its Possible Future** . This ebook, presented in a PDF format (PDF Size: *), is a masterpiece that goes beyond conventional storytelling. Indulge your senses in prose, poetry, and knowledge. Download now to let the beauty of literature and artistry envelop your mind in a unique and expressive way.

- Interactive and Gamified eBooks

Origins The Emergence And Evolution Of Our Species And Its Possible Future Introduction

In this digital age, the convenience of accessing information at our fingertips has become a necessity. Whether its research papers, eBooks, or user manuals, PDF files have become the preferred format for sharing and reading documents. However, the cost associated with purchasing PDF files can sometimes be a barrier for many individuals and organizations. Thankfully, there are numerous websites and platforms that allow users to download free PDF files legally. In this article, we will explore some of the best platforms to download free PDFs. One of the most popular platforms to download free PDF files is Project Gutenberg. This online library offers over 60,000 free eBooks that are in the public domain. From classic literature to historical documents, Project Gutenberg provides a wide range of PDF files that can be downloaded and enjoyed on various devices. The website is user-friendly and allows users to search for specific titles or browse through different categories. Another reliable platform for downloading Origins The Emergence And Evolution Of Our Species And Its Possible Future free PDF files is Open Library. With its vast collection of over 1 million eBooks, Open Library has something for every reader. The website offers a seamless experience by providing options to borrow or download PDF files. Users simply need to create a free account to access this treasure trove of knowledge. Open Library also allows users to contribute by uploading and sharing their own PDF files, making it a collaborative platform for book enthusiasts. For those interested in academic resources, there are websites dedicated to providing free PDFs of research papers and scientific articles. One such website is Academia.edu, which allows researchers and scholars to share their work with a global audience. Users can download PDF files of research papers, theses, and dissertations covering a wide range of subjects. Academia.edu also provides a platform for discussions and networking within the academic community. When it comes to downloading Origins The Emergence And Evolution Of Our Species And Its Possible Future free PDF files of magazines, brochures, and catalogs, Issuu is a popular choice. This digital publishing platform hosts a vast collection of publications from around the world. Users can search for specific titles or explore various categories and genres. Issuu offers a seamless reading experience with its user-friendly interface and allows users to download PDF files for offline reading. Apart from dedicated platforms, search engines also play a crucial role in finding free PDF files. Google, for instance, has an advanced search feature that allows users to filter results by file type. By specifying the file type as "PDF," users can find websites that offer free PDF downloads on a specific topic. While downloading Origins The Emergence And Evolution Of Our Species And Its Possible Future free PDF files is convenient, its important to note that copyright laws must be respected. Always ensure that the PDF files you download are legally available for free. Many authors and publishers voluntarily provide free PDF versions of their work, but its essential to

be cautious and verify the authenticity of the source before downloading Origins The Emergence And Evolution Of Our Species And Its Possible Future. In conclusion, the internet offers numerous platforms and websites that allow users to download free PDF files legally. Whether its classic literature, research papers, or magazines, there is something for everyone. The platforms mentioned in this article, such as Project Gutenberg, Open Library, Academia.edu, and Issuu, provide access to a vast collection of PDF files. However, users should always be cautious and verify the legality of the source before downloading Origins The Emergence And Evolution Of Our Species And Its Possible Future any PDF files. With these platforms, the world of PDF downloads is just a click away.

FAQs About Origins The Emergence And Evolution Of Our Species And Its Possible Future Books

1. Where can I buy Origins The Emergence And Evolution Of Our Species And Its Possible Future books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Origins The Emergence And Evolution Of Our Species And Its Possible Future book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Origins The Emergence And Evolution Of Our Species And Its Possible Future books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Origins The Emergence And Evolution Of Our Species And Its Possible Future audiobooks, and where can I

find them? Audiobooks: Audio recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.

8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Origins The Emergence And Evolution Of Our Species And Its Possible Future books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
