Origins Reconsidered:

Origins Reconsidered Richard E. Leakey, 1993-10-01 Richard Leakey's personal account of his fossil hunting and landmark discoveries at Lake Turkana his reassessment of human prehistory based on new evidence and analytic techniques and his profound pondering of how we became human and what being human really means Method and Theory in the Study of Islamic Origins Herbert Berg, 2003-08-01 This volume deals with the methodological and theoretical issues of the study of Islamic origins Each of the twelve articles examines a different aspect of Islamic origins early Islamic history including the life of the Prophet the Sunna and ad th tafs r and the Qur n and the rise of Islamic law Both sceptical or revisionist scholars and sanguine or traditionalist scholars examine and employ the various contemporary theories on the development of Islam in the first 3 centuries A H In so doing they seek to exemplify the sources and methodologies used to support these theories and to discuss their relative merits *Umberto Eco, The Da Vinci Code, and the Intellectual in the Age of Popular Culture* Douglass Merrell, 2017-06-05 This book provides a philosophical overview of Umberto Eco's historical and cultural development as a unique internationally recognized public intellectual who communicates his ideas to both an academic and a popular audience It describes Eco's intellectual development from his childhood during World War II and student involvement as a Catholic youth activist and scholar of the Middle Ages to his early writings on the openness of modern works such as Joyce's *Finnegans Wake* Merrell also explores Eco's pioneering role in semiotics and his later career as a novelist Ancestral Passions Virginia Morell, 2011-01-11 This biography of the First Family of anthropology reveals how their discoveries collaborations and rivalries contributed to our own knowledge of the origins of humankind In this fascinating and authoritative work acclaimed science writer Virginia Morell brings to vivid life the famous and infamous Leakey family pioneers in the field of paleoanthropology Louis Leakey the patriarch who persisted through initial scientific failures and scandal ridden divorce to achieve spectacular success in digs throughout East Africa Mary his second wife who worked alongside Louis as they made their outstanding discoveries at Olduvai Gorge and elsewhere and Richard their son who ascended to the top of the field in his parents wake only to be threatened with both near fatal illness and fierce professional rivalry Morell transports us into the world of these compelling personalities demonstrating how a small clan of highly talented and fiercely competitive people came to dominate an entire field of science and to contribute immeasurably to our understanding of the origins of humanity *Origins* Ariel Adrean Roth, 1998 Are the worlds of science and religion irreconcilable Has modern science with its theory of evolution disproved the biblical account of the origin of life If one accepts the biblical account of origins does one then have to reject science Scientist and Christian believer Ariel A Roth argues that taken together science and religion give us a more complete and sensible understanding of the world around us our place in it and our ultimate meaning and fate Roth examines such topics as the evidence for evolution and creation the Flood the strengths and limitations of the scientific method and the reliability of Scripture He concludes that the biblical

model of a recent creation by God leaves fewer unanswered questions than either science's evolutionary model or any view between the two positions such as progressive creation or theistic evolution Back cover *Maps of Time* David Christian, 2004-02-23 An introduction to a new way of looking at history from a perspective that stretches from the beginning of time to the present day *Maps of Time* is world history on an unprecedented scale Beginning with the Big Bang David Christian views the interaction of the natural world with the more recent arrivals in flora and fauna including human beings Cosmology geology archeology and population and environmental studies all figure in David Christian's account which is an ambitious overview of the emerging field of Big History *Maps of Time* opens with the origins of the universe the stars and the galaxies the sun and the solar system including the earth and conducts readers through the evolution of the planet before human habitation It surveys the development of human society from the Paleolithic era through the transition to agriculture the emergence of cities and states and the birth of the modern industrial period right up to intimations of possible futures Sweeping in scope finely focused in its minute detail this riveting account of the known world from the inception of space time to the prospects of global warming lays the groundwork for world history and Big History true as never before to its name Unexpected Affinities Pablo Meninato, 2018-05-23 While the concept of type has been present in architectural discourse since its formal introduction at the end of the eighteenth century its role in the development of architectural projects has not been comprehensively analyzed This book proposes a reassessment of architectural type throughout history and its impact on the development of architectural theory and practice Beginning with Laugier's 1753 *Essay on Architecture* *Unexpected Affinities* The History of Type in the Architectural Project from Laugier to Duchamp traces type through nineteenth and twentieth century architectural movements and theories culminating in a discussion of the affinities between architectural type and Duchamp's concept of the ready-made Includes over sixty black and white images

Forbidden Fruit Richard Ned Lebow, 2010-02-07 Could World War I have been averted if Franz Ferdinand and his wife hadn't been murdered by Serbian nationalists in 1914 What if Ronald Reagan had been killed by Hinckley's bullet Would the Cold War have ended as it did In *Forbidden Fruit* Richard Ned Lebow develops protocols for conducting robust counterfactual thought experiments and uses them to probe the causes and contingency of transformative international developments like World War I and the end of the Cold War He uses experiments surveys and a short story to explore why policymakers historians and international relations scholars are so resistant to the contingency and indeterminism inherent in open-ended nonlinear systems Most controversially Lebow argues that the difference between counterfactual and so-called factual arguments is misleading as both can be evidence-rich and logically persuasive A must-read for social scientists *Forbidden Fruit* also examines the binary between fact and fiction and the use of counterfactuals in fictional works like Philip Roth's *The Plot Against America* to understand complex causation and its implications for who we are and what we think makes the social world work *Israel's Ethnogenesis* Avraham Faust, 2016-04-01 Winner for best semi-popular book of the

2008 Irene Levi Sala Prize for publications on the archaeology of Israel The emergence of Israel in Canaan is a central topic in biblical Syro Palestinian archaeology However the archaeology of ancient Israel has rarely been subject to in depth anthropological analysis until now Israel s Ethnogenesis offers an anthropological framework to the archaeological data and textual sources Examining archaeological finds from thousands of excavations the book presents a theoretical approach to Israel s ethnogenesis that draws on the work of recent critics The book examines Israelite ethnicity ranging from meat consumption decorated and imported pottery Israelite houses circumcision and hierarchy and traces the complex ethnic negotiations that accompanied Israel s ethnogenesis Israel s Ethnogenesis is unique in its contribution to the archaeology of ethnicity offering an anthropological study that will be of interest to students of history Israelite culture and religion and the evolution of ethnic groups

Lowly Origin Jonathan Kingdon, 2021-01-12 Our ability to walk on two legs is not only a characteristic human trait but one of the things that made us human in the first place Once our ancestors could walk on two legs they began to do many of the things that apes cannot do cross wide open spaces manipulate complex tools communicate with new signal systems and light fires Titled after the last two words of Darwin s Descent of Man and written by a leading scholar of human evolution Lowly Origin is the first book to explain the sources and consequences of bipedalism to a broad audience Along the way it accounts for recent fossil discoveries that show us a still incomplete but much bushier family tree than most of us learned about in school Jonathan Kingdon uses the very latest findings from ecology biogeography and paleontology to build a new and up to date account of how four legged apes became two legged hominins He describes what it took to get up onto two legs as well as the protracted consequences of that step some of which led straight to modern humans and others to very different bipeds This allows him to make sense of recently unearthed evidence suggesting that no fewer than twenty species of humans and hominins have lived and become extinct Following the evolution of two legged creatures from our earliest lowly forebears to the present Kingdon concludes with future options for the last surviving biped A major new narrative of human evolution Lowly Origin is the best available account of what it meant and what it means to walk on two feet
