Past Perceptions:

Self and World Quassim Cassam, 1997-02-20 *Self and World* is an exploration of the nature of self awareness Quassim Cassam challenges the widespread and influential view that we cannot be introspectively aware of ourselves as objects in the world In opposition to the views of many empiricist and idealist philosophers including Hume Kant and Wittgenstein he argues that the self is not systematically elusive from the perspective of self consciousness and that consciousness of our thoughts and experiences requires a sense of our thinking experiencing selves as shaped located and solid physical objects in a world of such objects Awareness of oneself as a physical object involves forms of bodily self awareness whose importance has seldom been properly acknowledged in philosophical accounts of the self and self awareness The conception of self awareness defended in this book helps to undermine the idealist thesis that the self does not belong to the world and also the claim that the existence of subjects or persons is only a derivative feature of reality In the final part of the book Cassam argues that the existence of persons is a substantial fact about the world and that it is not possible to give a complete description of reality without claiming that persons exist This clear original and challenging treatment of one of the deepest of intellectual problems will demand the attention of all philosophers and cognitive scientists who are concerned with the self

Hume's Difficulty Donald L.M. Baxter, 2012-11-12 In this volume the first focused study of Hume on time and identity Baxter focuses on Hume's treatment of the concept of numerical identity which is central to Hume's famous discussions of the external world and personal identity Hume raises a long unappreciated and still unresolved difficulty with the concept of identity how to represent something as a medium betwixt unity and number Superficial resemblance to Frege's famous puzzle has kept the difficulty in the shadows Hume's way of addressing it makes sense only in the context of his

unorthodox theory of time Baxter shows the defensibility of that theory against past dismissive interpretations especially of Hume's stance on infinite divisibility Later the author shows how the difficulty underlies Hume's later worries about his theory of personal identity in a new reading motivated by Hume's important appeals to consciousness Baxter casts Hume throughout as an acute metaphysician and reconciles this side of Hume with his overarching Pyrrhonian skepticism
