Sinclair, 2014-07-31 In *The New Masters of Capital* Timothy J Sinclair examines a key aspect of the global economy the rating agencies In the global economy trust is formalized in the daily operations of such firms as Moody s and Standard Poor s which continuously monitor the financial health of bond issuers ranging from private corporations to local and national governments Their judgments affect unimaginably large sums approximately 30 trillion in outstanding debt issues according to a recent Moody s estimate The difference between an AA and a BB rating may cost millions of dollars in interest payments or determine if a corporation or government can even issue bonds Without bond rating agencies there would be no standard means to compare risks in the global economy and international investment would be problematic Most observers assume that the agencies are neutral and scientific and that they interpret their role in narrowly economic terms But these agencies by their nature wield extraordinary power and exert massive influence over public policy Sinclair offers a highly accessible account of these institutions their origins and the rating processes they use to judge creditworthiness Illustrated with a wide range of cases this book offers a fresh assessment of the role of an often overlooked institution in the dynamics of modern global capitalism **Business Research Handbook** Shimpock, 2004-11-23 *Business Research Handbook* is the best strategic approach to research It gives you ready to adapt strategies that streamline and focus your information search complete with Procedures that progressively sift and regroup your research decision points that allow you to evaluate which steps remain The most cost effective ways to take advantage of today s electronic media resources Efficient ways to retrieve

The Death of Gentlemanly Capitalism

Philip Augar,2008-12-04 A revolution took place in the City in the 80s and 90s The cosy club of British merchant banking collapsed in a series of sell outs closures and scandals This left the City dominated by US and European giants Was this the inevitable result of globalization or did mismanagement play a part This is the first book to look at how and why the British merchant banks and brokers sold out and where that leaves us Augar tells this fascinating story with pace and drama taking us through the Thatcher years the crash of 1987 Big Bang and the aggressive invasion of the American banks He looks at why the British banks failed to keep pace with the Americans what this says about the way they were run and what this means for the future

International Finance Hal S. Scott, Philip A. Wellons,1996

Technology Buyouts Tilmann

Pohlhausen,2012-12-06 Foreword The public market valuation of technology companies throughout the 1990s is probably one of the most interesting phenomena in recent financial history No sector has generated more enthusiasm among investors and no sector has created more millionaires albeit mostly on paper Once the bubble burst the correction process was brutal The price of technology companies dropped by over 70 percent on average and a significant number of companies went out of business while others were simply avoided by the investment community I Tilman Pohlhausen asks a valid question Did this downturn in valuation lead to some companies being unjustly undervalued given their past and expected cash flows If so he continues would such companies be suitable for a concept rarely heard of previously for technology companies a buyout possibly even financed to a high degree by debt The idea is not new In contrast to Europe a number of well financed private equity funds in the United States exclusively target the technology sector for buyouts What is new however is that many more technology companies because of their lower valuation could become targets of buyout investors in Europe as well Ultimately with his analysis of the buyout attractiveness of European technology companies the author attempts to estimate the validity of this perception
