FOULET,2018

Old French and Comparative Gallo-Romance Syntax Frede Jensen,2012-01-02 The book series Beihefte zur Zeitschrift f r romanische Philologie founded by Gustav Gr ber in 1905 is among the most renowned publications in Romance Studies It covers the entire field of Romance linguistics including the national languages as well as the lesser studied Romance languages The editors welcome submissions of high quality monographs and collected volumes on all areas of linguistic research on medieval literature and on textual criticism The publication languages of the series are French Spanish Portuguese Italian and Romanian as well as German and English Each collected volume should be as uniform as possible in its contents and in the choice of languages **Petite syntaxe de l'ancien français** Lucien Foulet,1923 From NP to DP: The syntax and semantics of noun phrases Martine Coene,Yves d'. Hulst,2003-01-01 This is the first of a two volume selection of refereed and revised papers originally presented at the international conference From NP to DP at the University of Antwerp The papers address issues in the syntax and semantics of the noun phrase in particular the so called DP hypothesis which takes noun phrases to be headed by a functional head D eterminer The major concerns can be grouped around 3 subthemes the internal syntax of noun phrases the syntax and semantics of bare nouns and indefinites and the expression of measurement in noun phrases The wealth of data coming from over 40 different languages combined with a thorough introduction to the current issues in the field of NPs DPs and some alternative syntactic and semantic analyses provide a comprehensive reference work from both a descriptive and a theoretical point of view The second volume is concerned exclusively with the expression of possession in noun phrases Alain Chartier Joan E. McRae,2004-08-02 Belle dame sans merci Beautiful lady with no mercy 1424 is not readily available in moden English translation elsewhere making this an essential addition to any library with a medieval literature or French literature collection **Expletive and Referential Subject Pronouns in Medieval French** Michael Zimmermann,2014-09-12 Medieval French usually analyzed as a null subject language differs considerably from modern Romance null subject languages such as Spanish in the availability of non expressed subject pronouns specifically it shows characteristics reminiscent of non null rather than null subject languages such as the expression of expletive subject pronouns The central goal of this book is to put forward an account of these

differences On the basis of the analysis of an extensive newly established data corpus the development of the expression of both expletive and referential subject pronouns until the 17th c is determined Following a thorough discussion of previous approaches an alternative approach is presented which builds on the analysis of Medieval French as a non null subject language The non expression of subject pronouns licit in specific contexts in non null subject languages is shown to be restricted to configurations generally involving left peripheral focalization These configurations and concomitantly non expressed subject pronouns are finally argued to be eventually lost for good in the wake of the initial observation by 17th c writers of pertinent instructions campaigned for in highly influential works of language use

Studies in Romance Linguistics Carl Kirschner, Janet Ann DeCesaris, 1989-01-01 The papers collected in this volume reflect the numerous interests in the field of Romance languages and Romance linguistics today A far ranging amount of Romance data are presented French Italian and Spanish dialect data are crucial to several authors arguments Rumanian is the focus of two papers and many of the papers included discuss overall Romance developments It is noteworthy that formal approaches to syntax are here regularly applied to historical data three papers specifically deal with pro drop phenomena in Old French Of the papers on phonology syllabification and linking processes receive much attention

Syntactic Change in Medieval French Barbara S. Vance, 2012-12-06 1 0 V2 AND NULL SUBJECTS IN THE HISTORY OF FRENCH The prototypical Romance null subject language has certain well known characteristics verbal inflection is rich distinguishing six person/number forms subject pronouns are generally emphatic and when there is no need to emphasize the subject the pronoun is not expressed at all Spanish and Italian for example fit this description rather well Modern French however provides a striking contrast to these languages it does not allow subjects to be missing and not unexpectedly it has a verbal agreement system with few overt endings and subject pronouns which are not emphatic One of the goals of the present work is to examine null subjects in two dialects of Romance that fit neither the Italian nor the French model later Old French 12th 13th centuries and Middle French 14th 15th centuries Old French has null subjects only in contexts where the subject would be postverbal if expressed cf Foulet 1928 and Middle French has null subjects in a wider range of syntactic contexts but does not freely allow all persons of the verb to be null The work of Vanelli Renzi and Beninca 1985 along with many other works by these authors individually shows that a number of other geographically proximate medieval dialects had similar systems though it appears that there are significant differences in detail among them

A History of the French Language Through Texts Wendy Ayres-Bennett, 2005-06-27 This new history of the French language allows the reader to see how the language has evolved for themselves It combines texts and extracts with a readable and detailed commentary allowing the language to be viewed both synchronically and diachronically Core texts range from the ninth century to the present day highlight central features of the language whilst a range of shorter texts illustrate particular points The inclusion of non literary as well as

literary texts serves to illustrate some of the many varieties of French whether in legal scientific epistolary administrative or liturgical or in more popular domains including attempts to represent spoken usage This is essential reading for the undergraduate student of French

Rethinking Verb Second Rebecca Woods, Sam Wolfe, 2020-03-25 This volume provides the most exhaustive and comprehensive treatment available of the Verb Second property which has been a central topic in formal syntax for decades While Verb Second has traditionally been considered a feature primarily of the Germanic languages this book shows that it is much more widely attested cross linguistically than previously thought and explores the multiple empirical theoretical and experimental puzzles that remain in developing an account of the phenomenon Uniquely formal theoretical work appears alongside studies of psycholinguistics language production and language acquisition The range of languages investigated is also broader than in previous work while novel issues are explored through the lens of the more familiar Germanic data chapters also cover Verb Second effects in languages such as Armenian Dinka Tohono O odham and in the Celtic Romance and Slavonic families The analyses have wide ranging consequences for our understanding of the language faculty and will be of interest to researchers and students from advanced undergraduate level upwards in the fields of syntax historical linguistics and language acquisition

Syntactic Structures and Morphological Information Uwe Junghanns, Luka Szucsich, 2011-11-21 The book contains ten papers discussing issues of the relation between syntax and morphology from the perspective of morphologically rich languages including among others Indo European languages indigenous languages of the Americas Turkish and Hungarian The overall question discussed in this book is to what extent morphological information shows up in syntactic structures and how this information is represented The authors adopt different theoretical frameworks such as the Derivational Theory of Morphology Distributed Optimality Head driven Phrase Structure Grammar Lexical Functional Grammar Lexical Decomposition Grammar combined with Linking Theory and OT like constraints Paradigm Based Morphosyntax as well as the Principles and Parameters Approach of Generative Grammar

Historical Linguistics 2007 Monique Dufresne, Fernande Dupuis, Etleva Vocaj, 2009-11-30 For more than three decades the International Conference on Historical Linguistics ICHL has been characterized by diversity both in terms of the theoretical frameworks used by its researchers and the wide variety of languages that are analyzed ICHL 18 which took place at the Universit du Qu bec Montr al in August 2007 was no exception to the continuation of this tradition The articles in the present volume encompass many different approaches and a wide range of theories including grammaticalization generative approaches to linguistic change and variation reanalysis the use of analogy and the interplay between internal and external factors The volume is divided into four sections dealing with phonology with syntax morphology and semantics with external factors in linguistic change and with tools and methodologies This way this volume

aims to be a reflection of the diverse trends in current historical linguistic study **The syntax of medieval Occitan** Frede Jensen, 2015-08-31 No detailed description available for The syntax of medieval Occitan **Verb Second in Medieval Romance** Sam Wolfe, 2019 This volume provides the first book length study of the controversial topic of Verb Second and related properties in a range of Medieval Romance varieties The findings have widespread implications for the understanding of both the key typological property of Verb Second and the development of Latin into the modern Romance languages
