

An abstract painting depicting a shipwreck. The scene is dominated by large, angular, and fragmented pieces of what appears to be a ship's hull and internal structure, rendered in shades of blue, green, and brown. These fragments are scattered across a dark, turbulent sea. In the background, a jagged, mountain-like peak rises from the water under a pale, overcast sky. The overall mood is one of desolation and the overwhelming power of nature.

Retreat Of Reason A Dilemma In The Philosophy Of Life:

The Retreat of Reason Ingmar Persson, 2005 **Revisiting Kant's Universal Law and Humanity Formulas** Sven Nyholm, 2015-07-24 This book offers new readings of Kant's universal law and humanity formulations of the categorical imperative. It shows how on these readings the formulas do indeed turn out being alternative statements of the same basic moral law and in the process responds to many of the standard objections raised against Kant's theory. Its first chapter briefly explores the ways in which Kant draws on his philosophical predecessors such as Plato and especially Plato's Republic and Jean Jacques Rousseau. The second chapter offers a new reading of the relation between the universal law and humanity formulas by relating both of these to a third formula of Kant's viz the law of nature formula and also to Kant's ideas about laws in general and human nature in particular. The third chapter considers and rejects some influential recent attempts to understand Kant's argument for the humanity formula and offers an alternative reconstruction instead. Chapter four considers what it is to flourish as a human being in line with Kant's basic formulas of morality and argues that the standard readings of the humanity formula cannot properly account for its relation to Kant's views about the highest human good.

The Blackwell Guide to Ethical Theory Hugh LaFollette, Ingmar Persson, 2013-04-16 Building on the strengths of the highly successful first edition the extensively updated Blackwell Guide to Ethical Theory presents a complete state of the art survey written by an international team of leading moral philosophers. A new edition of this successful and highly regarded Guide now reorganized and updated with the addition of significant new material. Includes 21 essays written by an international team of leading philosophers. Extensive substantive essays develop the main arguments of all the leading viewpoints in ethical theory. Essays new to this edition cover evolution and ethics capability ethics virtues and consequences and the implausibility of virtue ethics. *The Ends of Harm* Victor Tadros, 2011-09-15 Every modern democratic state imprisons thousands of offenders every year depriving them of their liberty causing them a great deal of psychological and sometimes physical harm. Relationships are destroyed jobs are lost the risk of the offender being harmed by other offenders is increased and all at great expense to the state. How can this brutal and costly enterprise be justified? Traditionally philosophers answering this question have argued either that the punishment of wrongdoers is a good in itself retributivism or that it is a regrettable means to a valuable end such as the deterrence of future wrongdoing and thus justifiable on consequentialist grounds. This book offers a critical examination of those theories and advances a new argument for punishment's justification calling it the duty view. On this view the permission to punish offenders is grounded in the duties that they incur in virtue of their wrongdoing. The most important duties that ground the justification of punishment are the duty to recognize that the offender has done wrong and the duty to protect others against wrongdoing. In the light of these duties the state has a permission to punish offenders to ensure that they recognize that what they have done is wrong but also to protect others from crime. In contrast to other justifications of punishment grounded in deterrence the duty view is

developed in the light of a non consequentialist moral theory a theory which endorses constraints on the pursuit of the good It is shown that it is normally wrong to harm a person as a means to pursue a greater good However there are exceptions to this principle in cases where the person harmed has an enforceable duty to pursue the good The implications of this idea are explored both in the context of self defence and then in the context of punishment Through the systematic exploration of the relationship between self defence and punishment the book makes significant progress in defending a plausible set of non consequentialist moral principles that justify the punishment of wrongdoers and marks a significant contribution to the philosophical literature on punishment **Routledge Philosophy GuideBook to Mill on Utilitarianism** Roger

Crisp,2002-09-11 Mill was one of the most important British philosophers of the nineteenth century his Utilitarianism is a pivotal work in ethical thought This book written specifically for students coming to Mill and perhaps philosophy for the first time will be an ideal guide Mill on Utilitarianism introduces and assesses Mill s life and the background of Utilitarianism the ideas and text of Utilitarianism the continuing importance of Mill s work to philosophy This is the first book dedicated to Utilitarianism itself Concisely written and engaging it is perfect reading for those studying Mill or moral philosophy

Armstrong's Materialist Theory of Mind Peter R. Anstey,David Braddon-Mitchell,2022 Armstrong s Materialist Theory of Mind is one of a handful of texts that began the physicalist revolution in the philosophy of mind In this collection distinguished philosophers examine what we still owe to it how to expand it as well as looking back on how it came about

Preference and Information Dan Egonsson,2016-12-05 Is it important to our quality of life that the preferences we satisfy are rational and well informed Standard preferentialist theories allege that a person s preferences and their satisfaction are the correct measure of well being In preference sensitive theories preferences are important but do not count for everything This raises the question of whether we ought to make demands on these preferences In this book Egonsson presents a critical analysis of the Full Information Account of the Good which claims that only the satisfaction of rational and fully informed preferences has value for a person The problems he deals with include how is an information requirement to be formulated and shaped Is it possible to design a requirement that is both neutral to the agent s epistemic situation and reasonable Is the requirement reasonable Does it make sense to claim that some are better off if we satisfy the preferences they would have had in some merely hypothetical circumstances This is an important new book on preference rationality which will be of great interest to academics and students of ethics quality of life and rationality **Oxford Studies in**

Metaethics Russ Shafer-Landau,2011 Oxford Studies in Metaethics is the only publication devoted exclusively to original philosophical work in the foundations of ethics It provides an annual selection of much of the best new scholarship being done in the field Its broad purview includes work being done at the intersections of ethical theory with metaphysics epistemology philosophy of language and philosophy of mind The essays included in the series provide an excellent basis for understanding recent developments in the field those who would like to acquaint themselves with the current state of play in

metaethics would do well to start here Emotion and Reason Warren TenHouten,2014-06-23 Although much academic work has been done on the areas of mind brain and society a theoretical synthesis of the three levels of analysis the biological the mental and the social has not until now been put forward In Emotion and Reason Warren TenHouten presents a truly comprehensive classification of the emotions The book analyzes six key emotions anger acceptance aggressiveness love joy and happiness and anticipation It places them in historical context relates them to situations of work and intimacy and explains their functioning within an individuated autonomous character structure Divided into four parts the book presents a socioevolutionary theory of the emotions Affect spectrum Theory AST which is based on a synthesis of three models of the emotions of social relationships and of cognition This book will be of value to undergraduate and postgraduate students as well as researchers with an interest in the sociology of emotions anthropology of emotions social psychology affective neuroscience political science behavioral neuroeconomics and philosophy **Inclusive Ethics** Ingmar Persson,2017 Inclusive Ethics brings together two ideas which are part of our everyday morality namely that we have a moral reason to benefit or do good to other beings and that justice requires these benefits to be distributed equally Ingmar Persson explores the difficulties of accepting a morality which combines both of these principles Moral Error Theory Jonas Olson,2014-01-23 Jonas Olson presents a critical survey of moral error theory the view that there are no moral facts and so all moral claims are false In Part I History he explores the historical context of the debate and discusses the moral error theories of David Hume and of some more or less influential twentieth century philosophers including Axel H gerstr m Bertrand Russell Ludwig Wittgenstein and Richard Robinson He argues that the early cases for moral error theory are suggestive but that they would have been stronger had they included something like J L Mackie s arguments that moral properties and facts are metaphysically queer Part II Critique focuses on these arguments Olson identifies four queerness arguments concerning supervenience knowledge motivation and irreducible normativity and goes on to establish that while the first three are not compelling the fourth has considerable force especially when combined with debunking explanations of why we tend to believe that there are moral properties and facts when in fact there are none One conclusion of Part II is that a plausible error theory takes the form of an error theory about irreducible normativity In Part III Defence Olson considers challenges according to which that kind of error theory has problematic ramifications regarding hypothetical reasons epistemic reasons and deliberation He ends his discussion with a consideration of the implications of moral error theory for ordinary moral thought and talk and for normative theorizing *Religion, Intolerance, and Conflict* Steve Clarke,Russell Powell,Julian Savulescu,2013-05-30 The relationship between religion intolerance and conflict has been the subject of intense discussion particularly in the wake of the events of 9 11 and the ongoing threat of terrorism This book contains original papers written by some of the world s leading scholars in anthropology psychology philosophy and theology exploring the scientific and conceptual dimensions of religion and human conflict Authors investigate the following themes the role of

religion in promoting social cohesion and the conditions under which it will tend to do so the role of religion in enabling and exacerbating conflict between different social groups and the conditions under which it will tend to do so and the policy responses that we may be able to develop to ameliorate violent conflict and the limits to compromise between different religions The book also contains two commentaries that distill synthesize and critically evaluate key aspects of the individual chapters and central themes that run throughout the volume The volume will be of great interest to all readers interested in the phenomenon of religious conflict and to academics across a variety of disciplines including religious studies philosophy psychology theology cognitive science anthropology politics international relations and evolutionary biology **Actual**

Consciousness Ted Honderich, 2014-07-10 What is it for you to be conscious There is no agreement whatever in philosophy or science it has remained a hard problem a mystery Is this partly or mainly owed to the existing theories not even having the same subject not answering the same question In *Actual Consciousness* Ted Honderich sets out to supersede dualisms objective physicalisms abstract functionalism externalisms and other positions in the debate He argues that the theory of Actualism right or wrong is unprecedented in nine ways 1 It begins from gathered data and proceeds to an adequate initial clarification of consciousness in the primary ordinary sense This consciousness is summed up as something's being actual 2 Like basic science Actualism proceeds from this metaphorical or figurative beginning to what is wholly literal and explicit constructed answers to the questions of what is actual and what it is for it to be actual 3 In so doing the theory respects the differences of consciousness within perception consciousness that is thinking in a generic sense and consciousness that is generic wanting 4 What is actual with your perceptual consciousness is a subjective physical world out there very likely a room differently real from the objective physical world that other division of the physical world 5 What it is for the myriad subjective physical worlds to be actual is for them to be subjectively physical which is exhaustively characterized 6 What is actual with cognitive and affective consciousness is affirmed or valued representations The representations being actual which is essential to their nature is their being differently subjectively physical from the subjective physical worlds 7 Actualism naturally enough when you think of it but unlike any other existing general theory of consciousness is thus externalist with perceptual consciousness but internalist with respect to cognitive and affective consciousness 8 It satisfies rigorous criteria got from examination of the failures of the existing theories In particular it explains the role of subjectivity in thinking about consciousness including a special subjectivity that is individuality 9 Philosophers and scientists have regularly said that thinking about consciousness requires just giving up the old stuff and starting again Actualism does this Science is served by this main line philosophy which is concentration on the logic of ordinary intelligence clarity consistency and validity completeness generality Autonomy, Rationality, and Contemporary Bioethics Jonathan Pugh, 2020 What should we do when autonomy and rationality seem to be in conflict in medical decision making as when there seems no good reason for a patient's wishes Jonathan Pugh offers a new framework for thinking about the concept of autonomy grounded in

an understanding of the different roles that rational beliefs and rational desires have to play Egalitarianism Nils Holtug, Kasper Lippert-Rasmussen, 2006-11-30 Egalitarianism the view that equality matters attracts a great deal of attention amongst contemporary political theorists And yet it has turned out to be surprisingly difficult to provide a fully satisfactory egalitarian theory The cutting edge articles in Egalitarianism move the debate forward They are written by some of the leading political philosophers in the field Recent issues in the debate over equality are given careful consideration the distinction between telic and deontic egalitarianism prioritarianism and the so called levelling down objection to egalitarianism whether egalitarian justice should have whole lives or some subset thereof as its temporal focus the implications of Scanlon's contractualist account of the value of choice for egalitarian justice and the question of whether non human animals fall within the scope of egalitarianism and if so what the implications are Numerous classic issues receive a new treatment too how egalitarianism can be justified and how if at all this value should be combined with other values such as desert liberty and sufficiency how to define the worst off for the purposes of Rawls difference principle Elizabeth Anderson's feminist account of equality of relations how equality applies to risky choices and in particular whether it is justifiable to restrict the freedom of suppliers who wish to release goods that confer different levels of risk on consumers depending on their ability to pay Finally the implications of egalitarianism and prioritarianism for health care are scrutinized The contributors to the volume are Richard Arneson Linda Barclay Thomas Christiano Nils Holtug Susan Hurley Kasper Lippert Rasmussen Dennis McKerlie Ingmar Persson Bertil Tungodden Peter Vallentyne Andrew Williams and Jonathan Wolff

Persons, Interests, and Justice Nils Holtug, 2010-04-22 In our lives we aim to achieve welfare for ourselves that is to live good lives But we also have another more impartial perspective where we aim to balance our concern for our own welfare against a concern for the welfare of others This is a perspective of justice Nils Holtug examines these two perspectives and the relations between them The first part of the book is concerned with prudence more precisely with what the necessary and sufficient conditions are for having a self interest in a particular benefit It includes discussions of the extent to which self interest depends on preferences personal identity and what matters in survival It also considers the issue of whether it can benefit or harm a person to come into existence and what the implications are for our theory of self interest A prudential view is defended according to which a person has a present self interest in a future benefit if and only if she stands in a relation of continuous physical realization of appropriate psychology to the beneficiary where the strength of the self interest depends both on the size of the benefit and on the strength of this relation The second part of the book concerns distributive justice and so how to distribute welfare or self interest fulfilment over individuals It includes discussions of welfarism egalitarianism and prioritarianism population ethics the importance of personal identity and what matters for distributive justice and the importance of all these issues for various topics in applied ethics including the badness of death Here a version of prioritarianism is defended according to which roughly the moral value of a benefit to an individual at a time

depends on both the size of the benefit and on the individual's self interest at that time in the other benefits that accrue to her at this and other times *Harming Future Persons* Melinda A. Roberts, David T. Wasserman, 2009-07-31 Melinda A Roberts and David T Wasserman 1 Purpose of this Collection What are our obligations with respect to persons who have not yet and may not ever come into existence Few of us believe that we can wrong those whom we leave out of existence altogether that is merely possible persons We may think as well that the directive to be fruitful and multiply and replenish the earth 1 does not hold up to close scrutiny How can it be wrong to decline to bring ever more people into existence At the same time we think we are clearly obligated to treat future persons persons who don't yet but will exist in accordance with certain stringent standards Bringing a person into an existence that is truly awful not worth having can be wrong and so can bringing a person into an existence that is worth having when we had the alternative of bringing that same person into an existence that is substantially better We may think as well that our obligations with respect to future persons are triggered well before the point at which those persons commence their existence We think it would be wrong for example to choose today to turn the Earth of the future into a miserable place even if the victims of that choice do not yet exist *Personal Value* Toni Rønnow-Rasmussen, 2011-06-23 Certain things like justice have impersonal value other things like your parents carry personal value their value is related to you and they are in a sense good or bad for you Rønnow Rasmussen examines the notion of good for and provides a new analysis of personal value that justifies its inclusion within our classical value taxonomy **Grazer Philosophische Studien** Johannes L.
