Making Laws for a Christian Society Roy Flechner, 2021-03-30 This is the first comprehensive study of the contribution that texts from Britain and Ireland made to the development of canon law in early medieval Europe The book concentrates on a group of insular texts of church law chief among them the Irish Hibernensis tracing their evolution through mutual influence their debt to late antique traditions from around the Mediterranean their reception and occasional rejection by clerics in continental Europe their fusion with continental texts and their eventual impact on the formation of a European canonical tradition Canonical collections penitentials and miscellanies of church law and royal legislation are all shown to have been living texts which were continually reshaped through a process of trial and error that eventually gave rise to a more stable and more coherent body of church laws Through a meticulous text critical study Roy Flechner argues that the growth of church law in Europe owes as much to a serendipitous conversation between texts as it does to any deliberate plan overseen by bishops and popes

Uneasy Subjects Silke Stroh, 2011-01-01 Scottish and Celtic fringe postcolonialism has caused much controversy and unease in literary studies Can the non English territories and peoples of the British Isles faced with centuries of English hegemony be meaningfully compared to former overseas colonies This book is the first comprehensive study of this topic which offers an in depth study of Gaelic literature It investigates the complex interplay between Celticity Gaeldom Scottish and British national identity and international colonial and postcolonial discourse It situates post colonial

Harding,2004-08-26 The Iron Age in Northern Britain examines the impact of the Roman expansion northwards and the native response to the Roman occupation on both sides of the frontiers It traces the emergence of historically recorded communities in the post Roman period and looks at the clash of cultures between Celts and Romans Picts and Scots Northern Britain has too often been seen as peripheral to a core located in south eastern England Unlike the Iron Age in southern Britain the story of which can be conveniently terminated with the Roman conquest the Iron Age in northern Britain has no such horizon to mark its end The Roman presence in southern and eastern Scotland was militarily intermittent and left untouched large tracts of Atlantic Scotland for which there is a rich legacy of Iron Age settlement continuing from the mid first millennium BC to the period of Norse settlement in the late first millennium AD Here D W Harding shows that northern Britain was not peripheral in the Iron Age it simply belonged to an Atlantic European mainstream different from southern England and its immediate continental neighbours [Irish Economic and Social History](#) ,2004 **F. Rural Society in the Age of Reason Chris J. Dalglish, 2006-04-11 My interest in the archaeology of the Scottish Highlands began long before I had any formal training in the subject Growing up on the eastern fringes of the southern Highlands close to Loch Lomond it was not hard to stumble across ruined buildings old field boundaries and other traces of everyday life in the past This is especially true if you spend much time as I have done climbing the nearby mountains and walking and driving through the various glens that give access into the Highlands At the time I had no real understanding of these remains simply accepting them as being built and old After studying archaeology for a few years at the University of Glasgow itself only a short commute from the area where I grew up I became acutely aware that I still had no real understanding of these familiar yet enigmatic buildings and fields This and a growing interest in Scotland's historical archaeology drove me to take several courses on the subject of rural settlement studies These courses allowed me to place what I now knew to be houses barns mills shieling transhumance settlements rig and furrow cultivation and other related remains in history Overwhelmingly they seemed to date from the period of the last 300 years I also began to understand how they all worked together as component parts of daily rural life in the past
