Return Of The Wild The Future Of Our Natural Lands:

The Atlas of U.S. and Canadian Environmental History Char Miller,2003-08-08 This visually dynamic historical atlas chronologically covers American environmental history through the use of four color maps photos and diagrams and in written entries from well known scholars Organized into seven categories each chapter covers agriculture wildlife and forestry land use and management technology and industry polluti **Gratitude for the Wild** Nathaniel Van

Yperen,2019-06-17 Since the passage of the Wilderness Act of 1964 a hotly contested debate over the value of wilderness reveals cultural anxieties about an American society that has spurned limits Gratitude for the Wild explores how the wild known in wilderness raises our tolerance for mystery in the recognition of our limits and in the celebration of a God loved world that exceeds our grasping The idea of wilderness introduces questions about the balance between utility and appreciation and between enjoyment and restraint Wilderness is a nexus of competing and contested accounts of responsibility In conversation with the work of Doug Peacock Terry Tempest Williams James Gustafson and Martin Luther King Jr Nathaniel Van Yperen offers an original argument for how wilderness can evoke a vision of a good life in which creaturely limits are accepted in gratitude even in the face of ambiguity and mystery Through the theme of gratitude the book refocuses attention on the role of affection and testimony in ecological ethics and Christian ethics *Hunger for the Wild* Michael L. Johnson,2007 Americans have had an enduring yet ambivalent obsession with the West as both a place and a state of mind Michael L Johnson considers how that obsession originated how it has determined attitudes toward and activities in the West and how it has changed over the centuries *Proving Up* Lisi Krall,2010-03-24 On July 9 1920 William Krall a coal miner in Wyoming was shot by his neighbor in a dispute over water as he attempted to prove up and gain title to his homestead Attempting to understand her grandfather s passion and determination for making his own 160 acres of land in dry sagebrush country led Professor Lisi Krall on a unique journey through the interconnections of economy culture and land in the history of the United States She tells the story of the domestication of land in the United States a story that hinges on the market economy and the agrarian and wilderness ethos as foundational land institutions Drawing on institutional or evolutionary economics Proving Up explores in detail the rich and ever changing intermingling of culture economic and material conditions through American history Untangling the complicated history of Americans experiences with nature Krall provides a critical focus and a timely contribution to the current debate surrounding our relationship to land and nature

Existential Threats Lisa Vox,2017-07-03 In Existential Threats Lisa Vox explores the growth of dispensationalist premillennialism alongside scientific understandings of the end of the world and contends that these two allegedly competing visions have converged to create an American apocalyptic imagination

The Routledge Companion to Landscape Studies Peter Howard,Ian Thompson,Emma Waterton,Mick Atha,2013-02-15 Landscape is a vital synergistic concept which opens up ways of thinking about many of the problems which beset our contemporary world such as climate change social alienation environmental degradation loss of biodiversity and destruction of heritage As a concept landscape does not respect disciplinary boundaries Indeed many academic disciplines have found the concept so important it has been used as a qualifier that delineates whole sub disciplines landscape ecology landscape planning landscape archaeology and so forth In other cases landscape studies progress under a broader banner such as heritage studies or cultural geography Yet it does not always mean the same thing in all of these contexts The Routledge Companion to Landscape Studies offers the first comprehensive attempt to explore research directions into the many uses and meanings of landscape The Companion contains thirty nine original contributions from leading scholars within the field which have been divided into four parts Experiencing Landscape Landscape Culture and Heritage Landscape Society and Justice and Design and Planning for Landscape Topics covered range from phenomenological approaches to landscape to the consideration of landscape as a repository of human culture from ideas of identity and belonging to issues of power and hegemony and from discussions of participatory planning and design to the call for new imaginaries in a time of global and environmental crisis Each contribution explores the future development of different conceptual and theoretical approaches as well as recent empirical contributions to knowledge and understanding Collectively they encourage dialogue across disciplinary barriers and reflection upon the implications of research findings for local national and international policy in relation to landscape This Companion provides up to date critical reviews of state of the art perspectives across this multifaceted field embracing disciplines such as anthropology archaeology cultural studies geography landscape planning landscape architecture countryside management forestry heritage studies ecology and fine art It serves as an invaluable point of reference for scholars researchers and graduate students alike engaging in the field of landscape studies

Wilderness Forever Mark W. T. Harvey,2009-11-23 Winner of the Forest History Society s 2006 Charles A Weyerhaeuser Book Award As a central

figure in the American wilderness preservation movement in the mid twentieth century Howard Zahniser 1906 1964 was the person most responsible for the landmark Wilderness Act of 1964 While the rugged outdoorsmen of the early environmental movement such as John Muir and Bob Marshall gave the cause a charismatic face Zahniser strove to bring conservation concerns into the public eye and the preservationists plans to fruition In many fights to save besieged wild lands he pulled together fractious coalitions built grassroots support networks wooed skittish and truculent politicians and generated streams of eloquent prose celebrating wilderness Zahniser worked for the Bureau of Biological Survey a precursor to the Fish and Wildlife Service and the Department of the Interior wrote for Nature magazine and eventually managed the Wilderness Society and edited its magazine Living Wilderness The culmination of his wilderness writing and political lobbying was the Wilderness Act of 1964 All of its drafts included his eloquent definition of wilderness which still serves as a central tenet for the Wilderness Society an area where the earth and its community of life are untrammelled by man where man himself is a visitor who does not remain The bill was finally signed into law shortly after his death Pervading his tireless work was a deeply held belief in the healing powers of nature for a humanity ground down by the mechanized hustle bustle of modern urban life Zahniser grew up in a family of Methodist ministers and although he moved away from any specific denomination a spiritual outlook informed his thinking about wilderness His love of nature was not so much a result of scientific curiosity as a sense of wonder at its beauty and majesty and a wish to exist in harmony with all other living things In this deeply researched and affectionate portrait Mark Harvey brings to life this great leader of environmental activism

Restoration and History Marcus Hall, 2010-02-01 Once a forest has been destroyed should one plant a new forest to emulate the old or else plant designer forests to satisfy our immediate needs Should we aim to re create forests or simply create them How does the past shed light on our environmental efforts and how does the present influence our environmental goals Can we predict the future of restoration This book explores how a consideration of time and history can improve the practice of restoration There is a past of restoration as well as past assumptions about restoration and such assumptions have political and social implications Governments around the world are willing to spend billions on restoration projects in the Everglades along the Rhine River in the South China Sea without acknowledging that former generations have already wrestled with repairing damaged ecosystems that there have been many kinds of former ecosystems and that there are many former ways of understanding such systems This book aims to put the dimension of time back into our understanding of environmental efforts Historic ecosystems can serve as models for our restorative efforts if we can just describe such ecosystems What conditions should be brought back and do such conditions represent new natures or better pasts A collective answer is given in these pages and it is not a unified answer

The Self-destruction of the West Damien François, 2007 Voil d sormais plus de 10 000 ans que la civilisation occidentale s est install e et voil 10 000 ans qu elle viole le sens m me de la nature la vie En s appropriant sans concession ce qui l entourait l homme de l Ouest a vu son

horizon ployer sous la charge de la destruction qu'il lui avait lui-même réalisé. Sommes-nous des lycanthropes ou des vampires? Ces monstres si terrifiants qui sortent de notre imagination sont-ils en réalité la copie de notre comportement d'ivrogne? Prédicateurs nous pompons sans remords les énergies qui nous entourent. Jusqu'où ira-t-on?
