Revealing Chicago An Aerial Portrait:

Revealing Chicago Terry Evans, Charles Wheelan, 2005-06-01 Dramatic aerial images by a renowned photographer celebrate Chicago one of the world's foremost cities at the outset of the 21st century An aesthetic tour de force this volume highlights the importance of making decisions today that will enable Chicago to sustain its prominence into the future

Body Geographic Barrie Jean Borich, 2019-05-15 A memoir from the award winning author of *My Lesbian Husband* Barrie Jean Borich's *Body Geographic* turns personal history into an inspired reflection on the points where place and person intersect where running away meets running toward and where dislocation means finding oneself One coordinate of Borich's story is Chicago the prototypical Great Lakes port city built by immigrants like her great grandfather Big Petar and the other is her own port of immigration Minneapolis the combined skylines of these two cities tattooed on Borich's own back Between Chicago and Minneapolis Borich maps her own Midwest a true heartland in which she measures the distance between the dreams and realities of her own life her family's and her fellow travelers in the endless American migration Covering rough terrain from the hardships of her immigrant ancestors to the travails of her often drunk young self longing to be madly awake in the world from the changing demographics of midwestern cities to the personal transformations of coming out and living as a lesbian *Body Geographic* is cartography of high literary order plotting routes real and imagined and putting an alternate landscape on the map

The Chicago "L" Greg Borzo, 2007 Offers a history of the world famous Chicago L the elevated railroad that has operated since 1892 and has been ridden by more than ten billion people

Aereality William Fox, 2009-05-01 William Fox's writing for the last several years has been focused on how we construct aerial views either physically by flying or in our imaginations In *Aereality* he flies over earthworks in Nevada and Utah soars through the world's largest open pit mine and surveys Los Angeles circumnavigating large swaths of true American urban sprawl On the East Coast he examines the elevated art of the Hudson River Valley and New York City And finally in Australia Fox examines the history and current practice of both Euro Australian and Aboriginal aerial views and searches for the cognitive roots of our aerial imagination Accompanying Fox throughout his travels is a rolling cast of enlightened fliers geographers museum curators landscape photographers anthropologists and artists He traverses the sky in prop planes helicopters and hot air balloons all with the ultimate goal of knowing and experiencing the earth from the air

Photography and Flight Denis Cosgrove, William L. Fox, 2010-04-01 Used for everything from geographic evaluation to secret spy missions aerial photography has a rich and storied history ably recounted here in *Photography and Flight* Aerial photography is marked by its dependency on technological developments in both photography and aerospace and the authors chart the history of this photography as it tracked the evolution of these technologies Beginning with early images taken from hot air balloons fixed platforms and subsequent handheld camera technology Denis Cosgrove and William Fox then explain how military reconnaissance and governmental projects were instrumental in catalyzing these and other innovations in the field They

examine pivotal historical moments in which aerial photography began to establish itself as essential tool such as in World War II military strategies high altitude photography taken from postwar rockets and aircraft and the use of aerial photography during the cold war and the Cuban Missile Crisis The book also explores the advancement of geographic scholarship through aerial photography ranging from military excursions into Antarctica to the images of the curvature of the earth taken during the Apollo space missions While digital technology and remote sensing have changed the landscape of photography Photography and Flight argues that they have not diminished the significance of aerial photography in providing images of the earth Rather new technologies and resulting innovations such as Google Earth have enabled the mass democratization of access to such information Photography and Flight ultimately reveals how the camera lens from far away continues to unearth telling details about the land and those who live upon it

Building the City of Spectacle Costas Spirou,Dennis R. Judd,2016-10-27 By the time he left office on May 16 2011 Mayor Richard M Daley had served six terms and more than twenty two years at the helm of Chicago s City Hall making him the longest serving mayor in the city s history Richard M Daley was the son of the legendary machine boss Mayor Richard J Daley who had presided over the city during the post World War II urban crisis Richard M Daley led a period of economic restructuring after that difficult era by building a vibrant tourist economy Costas Spirou and Dennis R Judd focus on Richard M Daley s role in transforming Chicago s economy and urban culture The construction of the city of spectacle required that Daley deploy leadership and vision to remake Chicago s image and physical infrastructure He gained the resources and political power

necessary for supporting an aggressive program of construction that focused on signature projects along the city's lakefront including especially Millennium Park Navy Pier the Museum Campus Northerly Island Soldier Field and two major expansions of McCormick Place the city's convention center During this period Daley also presided over major residential construction in the Loop and in the surrounding neighborhoods devoted millions of dollars to beautification efforts across the city and increased the number of summer festivals and events across Grant Park As a result of all these initiatives the number of tourists visiting Chicago skyrocketed during the Daley years Daley has been harshly criticized in some quarters for building a tourist oriented economy and infrastructure at the expense of other priorities Daley left his successor Rahm Emanuel with serious issues involving a long standing pattern of police malfeasance underfunded and uneven schools inadequate housing opportunities and intractable budgetary crises Nevertheless Spiro and Judd conclude because Daley helped transform Chicago into a leading global city with an exceptional urban culture he also left a positive imprint on the city that will endure for decades to come

Artifacts and Illuminations Tom Lynch, Susan Naramore Maher, 2012-04-01 Loren Eiseley 1907-77 is one of the most important American nature writers of the twentieth century and an admired practitioner of creative nonfiction A native of Lincoln Nebraska Eiseley was a professor of anthropology and a prolific writer and poet who worked to bring an understanding of science to the general public incorporating religion philosophy and science into his explorations of the human mind and the passage of time As a writer who bridged the sciences and the humanities Eiseley is a challenge for scholars locked into rigid disciplinary boundaries *Artifacts and Illuminations* the first full length collection of critical essays on the writing of Eiseley situates his work in the genres of creative nonfiction and nature writing The contributing scholars apply a variety of critical approaches including ecocriticism and place oriented studies ranging across prairie urban and international contexts Contributors explore such diverse topics as Eiseley's use of anthropomorphism and Jungian concepts and examine how his work was informed by synecdoche Long overdue this collection demonstrates Eiseley's continuing relevance as both a skilled literary craftsman and a profound thinker about the human place in the natural world
