Revealing Image Analytical Art Psychotherapy In Theory And Practice:

The Revealing Image Joy Schaverien, 2021-11-18 Schaverien painstakingly describes and defines processes which have so far only been intuitively known to art therapists p6 by introducing and elaborating the psychoanalytical concepts of transference and countertransference in relation to the use of visual art objects The authors stated intention in this book is to attempt to bridge the perceived gap between the practice of art therapy and analytical forms of psychotherapy p 229 The epistemological base of this venture includes the fields of philosophy anthropology and aesthetics as well as psychoanalysis Schaverien suggests that analytical art psychotherapy is a way of working analytically with patients who are unsuitable or unready for psychotherapy giving examples of psychotic and borderline patients children and patients in psychiatric settings This is primarily a book about an analytical approach within art therapy which may be of interest in itself The material also raises issues of interest to analysts and psychotherapists whether or not they work with art in the clinical setting The book clarifies areas of similarity between the disciplines and also makes areas of difference apparent For example most analysts would agree that visual art like dream material and other non verbal representations of the inner world can at times articulate and communicate meanings which for one reason or another cannot be verbally articulated at the time and that this can be pertinent to the aim of analysis However I think few analysts would include facilities in their consulting rooms for the kind of art processes described in the book When the analyst is working with materials in this form the book will be extremely helpful in sorting out the complexity of the transference situation and the role of interpretation The book is so strongly grounded in experiences emerging in the presence of actual art processes and objects that I think it will be of most interest to those who are interested in the specific clinical issues involved in relating to the making and use of actual art objects within the setting Schaverien not only describes the processes involved in detail but also presents technical approaches to the making and handling of art objects within the setting which will inform the capacity of those who are not trained as art therapists to relate to this kind of material in the consulting room **The Revealing Image** Joy

Schaverien, 1992 Starting with the assumption that there is an innate healing potential in the artist's relationship to his or her own work this work explores how this interacts with the healing potential of the therapeutic relationship *The Changing Shape of Art Therapy* Andrea Gilroy, Gerry McNeilly, 2000 Including contributions from some of the leading art therapists in Britain this important book addresses the key issues in the theory and practice of art therapy The fundamental significance of the art in art therapy practice permeates the book close attention being paid by several writers to the art making process and the aesthetic responses of therapist and client Other authors explore the tensions between art and therapy images and speech subjectivity and objectivity arguing that the dynamic interplay between these elements is inherent to the practice of art therapy The role of containment is another theme that is explored by contributors in a variety of ways to highlight the importance not only of the therapeutic containment of the client by the therapist but also the

containment of the therapist The physical contexts of the session within an art room and within the larger working environment are identified as important arenas where conflict and tension is experienced and must be explored if art therapy is to continue to develop Group Analytic Art Therapy Gerry McNeilly, Malcolm Pines, 2006 This book offers an illuminating insight into McNeilly's theories and practical applications of group art therapy in the context of significant developments in the field

clinical practice and client's art **Revisiting Feminist Approaches to Art Therapy** Susan Hogan, 2012-06-15 Art therapy has been slow to embrace the critical and theoretical viewpoints including feminism that have made a huge impact on other areas of the humanities and social sciences. Art therapists are ideally situated however to respond to the growing awareness of how language, media and images influence gender inequality and the pressures that can lead to poor mental health and diminished well-being among women. The contributors explore the ways in which gender issues can be addressed through art therapy. By being sensitive to the socio-cultural dimensions of women's lives, therapists can become more receptive to the needs of their female clients. The case studies included here illustrate how issues of class, ethnicity and gender introduce a social element into what is sometimes described as a purely personal cathartic process. By discussing empowerment, sexuality, pregnancy and childbirth, this volume provides a comprehensive survey of women's issues within art therapy and will prompt a reevaluation of current training and practice in the field.
