Constructing a Language Michael Tomasello, 2005-03-31 The author presents a comprehensive usage based theory of language acquisition based on evidence that children possess a linguistic ability interwoven with other cognitive abilities rather than a self contained language instinct

Constraints on Language Acquisition Helen Tager-Flusberg, 2014-02-25 After decades of research most scholars generally agree that language acquisition is a complex and multifaceted process that involves the interaction of innate biologically based mechanisms devoted to language other non linguistic cognitive and social mechanisms linguistic input and information about the social and physical world Theoretical work in the field of language acquisition now needs to focus in greater depth and detail on some specific aspects of this general model which is the main goal of this book The chapters in this volume provide some new insights into one of the most remarkable accomplishments achieved by almost all children The particular questions that are raised by contributors include What kinds of constraints operate on the process of language development Which aspects of the acquisition process depend on language specific mechanisms Are there critical brain structures necessary for the acquisition of language What role do cognitive and social mechanisms play in language development How critical is perceptual input about the physical and social world What is the specific role played by linguistic input in the child s construction of a linguistic system Questions are addressed from the perspective of children who come to the task of acquiring language with many hurdles to overcome including deafness and blindness mental retardation autism and prenatal or perinatal brain damage involving the left hemisphere Each section contributes some insight on how an innate language specific biological substrate interacts with cognitive and social factors as well as external information to support the child s construction of a linguistic system Studies of atypical children offer a singular contribution to this enterprise by allowing us to see the specific influences of each component and in turn they shed new light on how all children are able to acquire language so effortlessly and during such a brief period of development

Learning To Read Laurence Rieben, Charles

A. Perfetti, 2013-12-16 How does a young child begin to make sense out of squiggles on a page Is learning to read a process of extending already acquired language abilities to print What comprises this extension How children learn to read and especially how children are taught to read are problems of sustained scientific interest and enduring pedagogical controversy This volume presents conceptual and theoretical analyses of learning to read research on the very beginning processes of learning to read as well as research on phonological abilities and on children who have problems learning to read In so doing it reflects the important discovery that learning to read requires mastering the system by which print encodes the language The editors hope that some of the work offered in this text will influence future research questions and will make a difference in the way instructional issues are formulated
