Reversing The Tide Priorities For Hiv Aids Prevention In Central Asia:

Reversing the Tide, 2005 **Reversing the Tide**, 2005 **Reversing the Tide** Joana Godinho, 2005 Although the number of reported cases of HIV in Central Asia is very low the growth rate of the epidemic about 500 cases in 2000 to over 12 000 in 2004 is a cause for serious concern This study identifies critical gaps and makes recommendations for further action that will ensure effective early prevention of HIV AIDS in Central Asia Public Health Aspects of HIV/AIDS in Low and Middle Income Countries David Celentano, Chris Beyrer, 2008-09-11 It has now been 25 years since the apocryphal report in the CDC Morbidity and Mortality Weekly Report dated June 5 1981 entitled Pneumocystis Pneumonia Los Angeles which announced what was to become HIV AIDS HIV has now affected virtually all countries that have looked for it and has had a devastating impact on the public health and medical care infrastructure around the world HIV AIDS has also disproportionately affected nations with the least capacity to confront it especially the developing world nations in Sub Saharan Africa South and Southeast Asia and the emerging republics of Eastern and Central Asia The pandemic unlike any other disease of our time has had profound impacts on the practice of public health itself bringing affected communities into decision making demanding North South partnerships and collaborations and changing the basic conduct of clinical and prevention trials research While much has been written in scholarly publications for medical epidemiologic and disease control specialists there is no comprehensive review of the public health impact and response to HIV AIDS in the developing world This edited volume seeks to systematically describe the emergence and form of the epidemics epidemiology the social community and political response and the various measures to confront and control the epidemic with varying levels of success Of particular importance are strategies that appear to have been useful in ameliorating the epidemic while contrasting the situation in a neighboring country or region where contrasting prevention or care initiatives have had a deleterious outcome Common to all responses has been the international multi sectoral response represented by the Global Fund for HIV AIDS Malaria and Tuberculosis the President s Emergency Plan for AIDS Relief and the Gates Foundation among others to promote HIV pharmacologic therapy in resource poor settings The chapter authors will explore the political challenges in meeting HIV AIDS prevention and care in concert with the public health realities in specific country and regional context *HIV/AIDS in Europe* World Health Organization. Regional Office for Europe, 2006 Tells the story of HIV AIDS in Europe from a broad variety of perspectives bio medical social cultural economic and political The authors are leading experts from across the region and include both the infected and the affected be they doctors or former drug users United Nations employees or gay men public health researchers or community activists They describe how from the first documented cases in 1981 to the present era of antiretroviral management controlling the human immunodeficiency virus in Europe has provided elusive HIV/Aids in the Western Balkans, 2005-01-01 In recent years Europe and Central Asia has experienced the world s fastest growing HIV AIDS epidemic Yet in the Western Balkan countries the HIV prevalence rate is

under 0.1 percent which ranks among the lowest. This may be due to a low level of infection among the population or partly due to inadequate surveillance systems. All major contributing factors for the breakout of an HIV/AIDS epidemic are present in the Western Balkans. HIV/AIDS disproportionately affects youth: 80 percent of HIV-infected people are 30 years old or younger. Most of the Western Balkan countries have very young populations.

Drugs and Public Health in Post-Soviet Central Asia Muiassar Turaeva, 2022-08-27. The book outlines post-Soviet style of health management in Central Asia. Regional studies on Central Asia to date have focused on states, politics, religion, and inter-ethnic relations but not on the health system within the region. Soviet-style policies have also covered only other aspects relevant for the region. This book highlights the public health situation of the region with a focus on drug abuse, HIV/AIDS in the context of increased mobility and drug trafficking routes which became even more porous after the break-up of the Soviet Union. Based on a qualitative study, the empirical data in the book was collected during long-term fieldwork conducted in Uzbekistan and Turkmenistan in 2010-2011, as well as shorter stays in Uzbekistan between 2012-2016. The analysis of the empirical material largely draws on the works of Foucault, particularly his concept of biopolitics when analyzing Soviet-style health management that is still practiced in the region. Applying the Foucauldian genealogical method, this study has been structured to trace the genealogy of epidemics to understand the historical path of drug abuse in the region as well as the discursive genealogy of drug politics and drug abuse. Applying the same genealogical method of Foucault, the formative and discursive trajectory of the institution of Uchyot was traced to contextualize the health governance methods that have historical legacy of Soviet-style governance and control of the total population. *Drugs and Public Health in Post-Soviet Central Asia: Soviet Style Health Management* is a unique resource for academic specialists, practitioners, professionals, and advanced undergraduate and graduate students in public health as well as a range of scholars and professionals in sociology, political science, anthropology, and anyone with an interest in the Central Asia region, drug addiction, or HIV. The book also could appeal to international donors in the field of HIV drug addiction who are working in the region.

Humanitarian Aid in Post-Soviet Countries Laetitia Atlani-Duault, 2008-01-07. Published originally in French, this revised and updated English edition presents an original and insightful approach to the problem of humanitarian aid in the Central Asian and Caucasus region.

AIDS Epidemic Update, December 2006 Joint United Nations Programme on HIV/AIDS (UNAIDS), World Health Organization, 2006. This annual update reports on developments in the global HIV/AIDS epidemic and draws on the most recent data available to give global and regional estimates of its scope and human toll. Despite promising developments in global efforts to address the AIDS epidemic, including increased access to effective treatment and prevention programmes, the number of people living with HIV continues to grow, as does the number of deaths due to AIDS. Findings for 2006 include: the total number of people living with HIV is estimated at 39.5 million; 4.3 million new cases during the year; and an estimated 2.9 million deaths. Sub-Saharan Africa continues to bear the brunt of the global epidemic, with 63 per cent of all adults and children with HIV globally and with its epicentre in southern Africa. In the

past two years the number of people living with HIV increased in every region in the world with the most striking increases in East Asia Eastern Europe and Central Asia where the number of people living with HIV in 2006 was over 21 per cent higher than in 2004

Health Systems and the Challenge of Communicable Diseases: Experiences from Europe and Latin America Richard Coker, Rifat Atun, Martin McKee, 2008-05-16 This is an excellent book well written and well documented The editors have succeeded to bring together a large number of knowledgeable authors to cover comprehensively the vast area public health actors dealing with infectious diseases both at central and local level whether in research teaching or practice as well as professionals working in diagnostic and therapeutic health services notably in microbiology and infectious diseases could greatly benefit from reading the book Politicians and lay administrators with responsibility in the field would be well advised to do the same European Journal of Public Health Health systems everywhere face constant change as they seek to respond to evolving patterns of disease This is especially true with communicable diseases where humanity is engaged in a constant evolutionary struggle with micro organisms that are able to adapt rapidly to a changing world This problem can be for example exemplified recently by the growth of antibiotic resistant infection This fascinating book confronts this challenge looking at two regions where the pace of change is especially rapid Europe and Latin America places where health systems many themselves undergoing rapid organisational transition must find ways of adapting to an ever changing context The book begins with an historical overview recalling how humans and micro organisms have always competed at times with profound historical consequences before examining the current status of this evolutionary struggle It assesses the extent to which human societies and their governments are prepared for the challenges ahead and reviews the experiences of countries in Europe and Latin America in developing effective responses Health Systems and the Challenge of Communicable Diseases will be of interest to those engaged in the development of health policy in high and middle income countries and to those who are studying the creation and implementation of health policy

Martha Ainsworth, Denise Vaillancourt, Judith Hahn Gaubatz, 2005 This evaluation assesses the development effectiveness of the World Bank's country level HIV AIDS assistance defined as policy dialogue analytic work and lending with the explicit objective of reducing the scope or impact of the AIDS epidemic The evaluation identifies findings from this experience and makes recommendations to improve the relevance efficiency and efficacy of ongoing and future activities This is the first comprehensive evaluation of the World Bank's HIV AIDS support to countries from the beginning of the epidemic through mid 2004 Because the Bank's assistance is for implementation of government programs by government it provides important insights on how national AIDS programs can be made more effective

International encyclopedia of adolescence

Jeffrey Jensen Arnett, 2007 Publisher description Central Asia Human Development Report Johannes F. Linn, Martha Blaxall, 2005 This report is a comprehensive analysis of the many challenges that confront Central Asia including high trade costs environmental devastation increased inequality rising migration the rapid spread of HIV AIDS and poor governance

There has been recent progress towards regional cooperation but the barriers created by borders negatively affect peoples lives It is contended that increased cooperation among the Central Asian republics Kazakhstan Kyrgyzstan Tajikistan Turkmenistan and Uzbekistan would produce substantial political and economic gains including income increases of 50 percent to 100 percent over the next ten years The cost of non cooperation is continued deterioration in income distribution social services and general living conditions according to the Report and possibly a descent into the vicious cycle of economic crisis and corrupt governance that often leads to social unrest

Harm Reduction in Substance Use and High-Risk Behaviour Richard Pates,Diane Riley,2012-05-31 Harm Reduction is a philosophy of public health intended as a progressive alternative to the prohibition of certain potentially dangerous lifestyle choices Recognising that certain people always have and always will engage in behaviours which carry risks the aim of harm reduction is to mitigate the potential dangers and health risks associated with those behaviours Harm Reduction in Substance Use and High Risk Behaviour offers a comprehensive exploration of the policy practice and evidence base of harm reduction Starting with a history of harm reduction the book addresses key ethical and legal issues central to the debates and developments in the field It discusses the full range of psychoactive substances behaviours and communities with chapters on injecting dance drugs stimulant use tobacco harm reduction alcohol use and sex work Written by an international team of contributors this text provides an essential panorama of harm reduction in the 21st century for educators and researchers in addiction and public health postgraduate students and policy makers

The World Bank Research Program, 2005-2007 ,2008 This pocket sized reference on key environmental data for over 200 countries includes key indicators on agriculture forestry biodiversity energy emission and pollution and water and sanitation The volume helps establish a sound base of information to help set priorities and measure progress toward environmental sustainability goals

Stakeholder Relationships And Sustainability Gulnaz Isabekova,2023-11-20 This open access book analyses how stakeholder relationships impact the sustainability of health aid It does this by providing an overarching analytical framework which allows for a systematic analysis of sustainability relationships and a possible causal link between these phenomena The book goes beyond universal paradigms and detailed single case studies by offering a thorough analysis of development projects to identify the factors that are also applicable to similar initiatives in comparable contexts Empirically it focuses on two health initiatives both implemented in the Kyrgyz Republic a country pursuing a sector wide approach to health aid Unique primary material provides insights into a geographic region that is mostly neglected and will be of interest to students and researchers of social policy development studies international health and those focusing on the post Soviet region and Central Asia

Capitalizing on the Demographic Transition ,2011-06-02 Increasing life expectancy in South Asia is resulting in a demographic transition that can under the right circumstances yield dividends through more favorable dependency ratios for a time With aging the disease burden shifts toward noncommunicable diseases NCDs which can threaten healthy aging

However securing the gains expected from the demographic dividend where developing countries working and nondependent population increases and per capita income thus rises is both achievable and affordable through efficiently tackling NCDs with prevention and control efforts This book looks primarily at cardiovascular disease CVD and tobacco use since they account for a disproportionate amount of the NCD burden the focus is strategic rather than comprehensive The goal of this book is to encourage countries to develop adopt and implement effective and timely country and where appropriate regional responses that reduce both population level risk factors and the NCD burden The work develops i an NCD burden and risk factor profile for all countries and the region as a whole ii a rationale for public policy and action for NCDs iii a framework to guide the formulation of public policies and strategies for NCDs iv a country profile including capacity and ongoing NCD activities as well as policy options and actions for NCDs that will help stimulate policy dialogue within and among countries and v a regional strategy for NCD prevention and control where regional collaboration offers added value The achievements of this book are i developing a framework for policy options to identify key areas for strategic country and regional level policy and actions ii bringing together demographic and aging trends disease and risk factor burden data alongside analyses of capacities and accomplishments to tackle NCDs and iii using these inputs to develop policy options for country and regional strategies

Plagues in World History John Aberth,2011-01-16

Plagues in World History provides a concise comparative world history of catastrophic infectious diseases including plague smallpox tuberculosis cholera influenza and AIDS Geographically these diseases have spread across the entire globe temporally they stretch from the sixth century to the present John Aberth considers not only the varied impact that disease has had upon human history but also the many ways in which people have been able to influence diseases simply through their cultural attitudes toward them The author argues that the ability of humans to alter disease even without the modern wonders of antibiotic drugs and other medical treatments is an even more crucial lesson to learn now that AIDS swine flu multidrug resistant tuberculosis and other seemingly incurable illnesses have raged worldwide Aberth s comparative analysis of how different societies have responded in the past to disease illuminates what cultural approaches have been and may continue to be most effective in combating the plagues of today
