Revival Of Japanese Competition:

The Revival of Japanese Competition Policy and Its Importance for EU-Japan Relations Stephen Wilks, 1994 This paper asserts that Japanese competition policy is in a period of activism and that the Fair Trade Commission and the European Commission Directorate General IV have become a force to be reckoned with It argues that Japanese policy must be considered within its distinctive cultural context

Competition Law Reform in Britain and Japan Kenji Suzuki, 2003-09-02 As market competition replaces state regulation in many economic fields competition policy has become an area of increasing significance Against this background Suzuki highlights the importance of the domestic political structure for competition policy He does this through the comparative analysis of competition law reforms in Britain and Japan He argues controversially that a country's domestic political structure should be considered a major factor in causing the reform of competition law and rejects the established view that it is necessarily a result of changes in international economic and political conditions

Comparative Competition Policy G. Bruce Doern, Stephen Wilks, 1996 This book provides definitive and in some cases unique studies of the six model regimes of the USA Germany Japan the United Kingdom and the European Union Each chapter is written by eminent country specialists is based on original research and is up to date The comparative dimension is presented in explicit introductory and concluding chapters but the comparison is also set in the context of the globalization of economic activity and the internationalization of policy

Japanese Inward Investment in UK Car Manufacturing Young-Chan Kim, 2018-02-06 This title was first published in 2002 This compelling text provides fresh insight into an area that is often touched upon but rarely examined in any great detail the relationship between Multinational Enterprises MNEs and their host governments Taking Japanese Foreign Direct Investment FDI strategy arguably the model of FDI Young Chan Kim takes a revealing look at why the United Kingdom UK has dominated among the EU member states for FDI destination while ironically losing its nationalized car manufacturers Scholars of business history international business and business economics will find this work invaluable

The International Order of Asia in the 1930s and 1950s Nicholas J. White, 2016-03-03 This book reconsiders the nature and formation of Asia's economic order during the 1930s and 1950s in light of the new historiographical developments in Britain and Japan Recently several Japanese economic historians have offered a new perspective on Asian history arguing that economic growth was fuelled by the phenomenon of intra Asian trade which began to grow rapidly around the turn of the 19th 20th centuries On the other side British imperial historians P J Cain and A G Hopkins have presented their own interpretation of gentlemanly capitalism in which they emphasize the leading role of the service sector rather than that of British industry in assessing the nature of the British presence overseas In order to assess and test these new perspectives this volume addresses three key issues The first is to reconsider the metropolitan peripheral relationship in Asia focusing particularly on the role of the sterling area and its implications for Asian economic development The second is to examine the formation of inter regional trade relations within

Asia in the 1930s and their revival and transformation in the 1950s The final issue is the comparison of the international order of Asia of the 1930s with the 1950s and the degree to which the Second World War represented a break point in Asia's economic development Dealing with issues of trade economy nationalism and imperialism this book provides fresh insights into the development of Asia during the mid twentieth century Drawing on the latest scholarship it will prove invaluable to all who wish to better understand the position of countries such as Japan China India Singapore Malaysia and Korea within the wider international order

The European Union, the United Nations, and the Revival of Confederal Governance

Frederick Lister, 1996-07-11 Before it became a federation the United States was briefly a confederation a much looser union composed of states rather than of peoples Unions of states to promote economic well being and to prevent war are now being revived Mr Lister analyzes modern confederalism and how it is functioning in the single market of the European Union and how it might function if the collective security system of the United Nations could be carried out as originally planned by a confederal style partnership of the world's independent states Political scientists have traditionally classified voluntary polities as confederations federations or unitary states But they have ignored the first of these classes perhaps because Alexander Hamilton wishing to mobilize support for the new federal constitution discredited not only the United States Confederation but the whole class of confederations as a viable method of governance More than 200 years later confederation as a form of governance is still under a cloud Yet it has been resurfacing largely unrecognized for what it is in the repertory of government In the treaties of Rome and Maastricht and in the collective security system of the Charter the European Union and the United Nations are already involved in forms of governance that are confederal in all but name Lister's book describes confederal governance and how such unions of states differ from intergovernmental organizations on the one hand and federations on the other Meticulously researched and carefully argued it draws upon his five years of study of confederal unions from Ancient Greece through the 19th century Germanic Confederation and the German Zollverein But his book is not a history of confederations Instead it shows how long term alliances sometimes evolve into unions of states and in time into communities of the peoples who live in those states It also shows how the ties of confederal union have been institutionalized in modern times in the EU and how they might be institutionalized in a global collective security body L L Finally the book stresses the urgency of moving in this direction because we shall face a very serious security problem in the next century With the steady leakage of nuclear materials in Russia the non proliferation approach to controlling weapons of mass destruction appears to be breaking down Lister argues that if and when governments are confronted with this looming problem perhaps in the not too distant future the confederal model may be the one that they will need to have updated and at their disposal

Cooperation Between Antitrust Agencies at the International Level Bruno Zanettin, 2002-10-22 The issue of international antitrust enforcement is high on the agenda for both developed and developing countries Bilateral cooperation between antitrust agencies in particular the European Commission and US agencies is the focus of this new work It first

shows how bilateral cooperation was developed as a response to the limits of the unilateral and extraterritorial application of national competition laws and how it has evolved from an instrument initially designed to avoid conflicts into a tool aimed at coordinating joint investigations of international competition cases. It then considers how bilateral cooperation could be used optimally by analysing two forms of advanced cooperation: the exchange of confidential information and positive comity, which is the only satisfactory answer competition law can provide to market access cases. It shows that the use of such instruments is limited by significant legal and political obstacles even in the context of the exemplary EC-US relationship. The book therefore argues that the efficient use of bilateral cooperation will be limited to a small number of well established competition agencies. If international anticompetitive practices are to be efficiently addressed by an increasingly large and heterogeneous group of competition agencies, horizontal cooperation between antitrust agencies must be complemented by a multilateral and supranational solution going beyond proposals currently put forward. The book concludes that only the WTO and its dispute settlement system could provide the basis for such a system. *Record of Proceedings*, 1951

International Organization and Conference Series I-IV. United States. Department of State, 1951 **Defenders of Japan**
 Garren Mulloy, 2021-12-01 Japan's post war armed forces are a paradox both embarrassing remnants of the past and valuable repositories of experience. This book charts the development of the Japan Self Defense Forces (JSDF) from 1954 as both unorthodox military institutions and servants of a civil society that decries militarism. Investigating JSDF contributions to Japanese and global security, the evolution of such contributions during and after the Cold War and their possible reconfiguration for Japan's security needs ahead. Garren Mulloy offers insight into the Forces' past, present and future. He explores the characteristics and contradictions of Japanese policy, including novel approaches in response to an increasingly assertive China, the latent threat of North Korea and contributory pressure from the US. Though the American alliance remains the core of Japanese security, new partnerships and international overtures will also shape the Forces' place in Prime Minister Abe's new vision of proactive contributions to peace. *Defenders of Japan* deconstructs how the JSDF have adapted and will continue to adapt within domestic norms caught between unresolved legacies of Japan's imperial past and a dynamically shifting balance of future global power. The Oxford Handbook of Business and Government David Coen, Wyn Grant, Graham K. Wilson, 2010-02-25 Business is one of the major power centres in modern society. The state seeks to check and channel that power so as to serve broader public policy objectives. However, if the way in which business is governed is ineffective or overburdensome, it may become more difficult to achieve desired goals such as economic growth or higher levels of employment. In a period of international economic crisis, the study of how business and government relate to each other in different countries is of more central importance than ever. These relationships have been studied from a number of different disciplinary perspectives: business studies, economics, economic history, law and political science, and all of these are represented in this handbook. The first part of the book provides an introduction to the ways in which five different disciplines

have approached the study of business and government The second section on the firm and the state looks at how these entities interact in different settings emphasising such phenomena as the global firm and varieties of capitalism The third section examines how business interacts with government in different parts of the world including the United States the EU China Japan and South America The fourth section reviews changing patterns of market governance through a unifying theme of the role of regulation Business government relations can play out in divergent ways in different policy and the fifth section examines the contrasts between different key arenas such as competition policy trade policy training policy and environmental policy The volume provides an authoritative overview with chapters by leading authorities on the current state of knowledge of business government relations but also points to ways in which this work might be developed in the future e g through a political theory of the firm

The International History of East Asia, 1900-1968 Antony Best, 2009-12-18 This book provides a broad account of the international history of East Asia from 1900 to 1968 a subject that is essential to any understanding of the modern epoch Whereas much of the scholarship on this subject has focused purely on the immediate origins and consequences of violent events such as wars and revolutions this book demonstrates the importance of also considering other forces such as ideology trade and cultural images that have helped shape East Asian international history It analyses how the development of the region was influenced by ideological competition and orientalism by both multilateral and unilateral efforts to instil order and by the changing nature of international trade It considers a number of important topics such as the concept of the open door the rise and influence of progressive internationalism in the forum of the League of Nations the development of anti colonial nationalism and anti Western internationalism in the shape of pan Asianism and the onset of the Cold War It also includes detailed case studies of subjects including the administration of the Chinese Maritime Customs Service the international effort to regulate the trade in opium and the significance of intra Asian trade Overall this book constitutes an impressive account of the international history of East Asia and is an important contribution to the interpretive study of this crucial period of history

Britain and Japan in the Twentieth Century Philip Towle, Nobuko Margaret Kosuge, 2007-04-27 After the horrors of World War II in Asia not least the systematic appalling mistreatment of Allied prisoners of war by the Japanese military few would have predicted that Britain s relationship with Japan would flourish into a booming partnership of economic interdependence by the start of the twenty first century This ambitious examination of Anglo Japanese relations over the course of the 20th century charts the fascinating history of how both nations overcame many years of prejudice and bitter conflict to form a bond fused by financial political and military cooperation In the 1930s many Japanese became convinced that their exports were being kept out of India by British tariffs and it was not until the 1980s that the British government fully accepted the futility of any protectionist impulse and encouraged Japanese

companies to invest in Britain Today each country not only assists the other economically but also no longer blames the other for its own domestic problems Britain and Japan in the Twentieth Century elucidates how both nations have struggled to achieve stability and harmony in their relations with each other in the face of contrasting cultural identities
