Nathaniel Gates, 2021-12-24 First published in 1998 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racial categories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinary resource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider range of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Thermal Energy Yatish T. Shah, 2018-01-12 The book details sources of thermal energy methods of capture and applications It describes the basics of thermal energy including measuring thermal energy laws of thermodynamics that govern its use and transformation modes of thermal energy conventional processes devices and materials and the methods by which it is transferred It covers 8 sources of thermal energy combustion fusion solar fission nuclear geothermal microwave plasma waste heat and thermal energy storage In each case the methods of production and capture and its uses are described in detail It also discusses novel processes and devices used to improve transfer and transformation processes *Emergent Micro- and Nanomaterials for Optical, Infrared, and Terahertz Applications* Song Sun, Wei Tan, Su-Huai Wei, 2022-10-27 Driven by continuing pursuits in device miniaturization and performance improvement emergent micro and nanomaterials hold the keys to enabling next generation technologies in optical infrared and terahertz applications owing to their unique properties and strong responses in these frequency bands Development of these fascinating materials has triggered a number of opportunities in the applied sciences and some have even made their impact

Simmons,2000 Using interpretations of the French Revolution as a model Eyes Across the Channel asks what history meant to Victorian Britain how events became enshrined with the authority of history and how such cultural assumptions might help us to read nineteenth century British literature Britain and France are now joined by a tunnel yet the narrow stretch of sea that divides the two countries has for centuries represented both closeness and difference Eyes Across the Channel argues that between the July Revolution of 1830 and the actual beginning of the construction of a Channel Tunnel in 1882 Britons more frequently interpreted France s role as their closest continental neighbour historically and politically than geographically Fundamentals of Biofilm Research, Second Edition Zbigniew Lewandowski,Haluk Beyenal,2013-12-16 The six years that have passed since the publication of the first edition have brought significant advances in both biofilm research and biofilm engineering which have matured to the extent that biofilm based technologies are now being designed and implemented As a
