Revolution In Military Affairs Implications For Canada And Nato:

Revolution in Military Affairs Elinor C. Sloan, 2002-04-18 Although the RMA has been the subject of much discussion in the United States for over a decade it has not received the same level of analytic attention in Canada and other NATO and allied countries Sloan examines the RMA in the context of Canada Australia France Germany and the United Kingdom in addition to assessing the transformation efforts of the United States Military She concludes that small and medium military powers such as Canada must at a minimum take selected concrete measures to maximize their military capabilities through the RMA if they are to avoid operational and political marginalisation in the promotion of international peace and security

The Revolution in Military Affairs Elinor Camille Sloan, 2002 *Revolution in Military Affairs* Elinor Camille Sloan, Raoul-Dandurand Chair of Strategic and Diplomatic Studies, 2002 The campaign in Afghanistan the Gulf war and Kosovo show how advances in information technology are driving a high tech revolution in military affairs RMA This text outlines elements of the RMA and examines efforts of the US and NATO **Reassessing the Revolution in Military Affairs** Andrew Futter, Jeffrey Collins, 2015-10-12 A generation after the First Gulf War and in the wake of a decade of counterinsurgency operations and irregular warfare this book explores how the concept of the Revolution in Military Affairs continues to shape the way modern militaries across the globe think about plan and fight wars *Information and Revolutions in Military Affairs* Emily O. Goldman, 2013-09-13 Like the industrial revolution before it the information technology revolution appears to be creating a new ruling class a new economy and a new society Information technology is also transforming military operations and warfare A vast literature on the revolution in military affairs or RMA cites the important indeed dominant role of information technology in enabling a new military revolution This volume challenges conventional wisdom not by claiming that information's impact on military operations is not positive or transformative but by claiming its impact is not new Previous periods of military revolution can also be characterized as information revolutions Through the close examination of six case studies of military transformation during the industrial age the contributors to this volume demonstrate how the employment of emerging information systems was critical to realizing a major boost in military effectiveness The most successful adaptations to the new environment were made by the most skillful users of information This volume draws upon the expertise of leading military historians political scientists and defense practitioners to craft a set of original essays that provide the first retrospective examination of how information affects the process of military revolution This book was previously published as a special issue of the Journal of Strategic Studies *Militarizing Artificial Intelligence* Nik Hynek, Anzhelika Solovyeva, 2022-07-01 This book examines the military characteristics and potential of Artificial Intelligence AI in the new global revolution in military affairs Offering an original perspective on the utilization imagination and politics of AI in the context of military development and weapons regulation the work provides a comprehensive response to the question of how we might reflect on the AI revolution in warfare and what can be said about

the ways in which this has been handled In the first part of the book AI is accommodated both theoretically and empirically in the strategic context of the Revolution in Military Affairs RMA The book offers a novel understanding of autonomous weapons as multi layered composite systems pointing to a complex non linear interplay between evolutionary and revolutionary dynamics In the second section the book provides an impartial analysis of the related politics and operations of power whereby increases in military budgets and R D of the great powers are met and countered by advocacy networks and scientists campaigning for a ban on lethal autonomous weapons As such it moves beyond popular caricatures of killer robots and points out some of the problems which result from over reliance on such imagery This book will be of much interest to students of strategic studies critical security studies arms control and disarmament science and technology studies and general International Relations NATO Review ,1999 **Killer Robots** Armin Krishnan,2016-04-22 Military robots and other potentially autonomous robotic systems such as unmanned combat air vehicles UCAVs and unmanned ground vehicles UGVs could soon be introduced to the battlefield Look further into the future and we may see autonomous micro and nanorobots armed and deployed in swarms of thousands or even millions This growing automation of warfare may come to represent a major discontinuity in the history of warfare humans will first be removed from the battlefield and may one day even be largely excluded from the decision cycle in future high tech and high speed robotic warfare Although the current technological issues will no doubt be overcome the greatest obstacles to automated weapons on the battlefield are likely to be legal and ethical concerns Armin Krishnan explores the technological legal and ethical issues connected to combat robotics examining both the opportunities and limitations of autonomous weapons He also proposes solutions to the future regulation of military robotics through international law Security and Defence in the Terrorist Era Elinor Camille Sloan,Université du Québec à Montréal. Centre d'études des politiques étrangères et de sécurité,Raoul-Dandurand Chair of Strategic and Diplomatic Studies,2005 This book assesses Canadian security and defence requirements post September 11

The Rise of Neoliberalism in Advanced Capitalist Economies M. Howard,J.E. King,2008-06-24 In this unique and dramatic account of the rise of neoliberalism Howard and King consider the major features of historical materialism the factors which resulted in 19th and 20th century thinkers incorrectly predicting the long term decline of the market and the prospects for a reversal of neoliberalism in the 21st century **Towards a Francophone Community** Robin S. Gendron,2006-04-18 Using extensive archival research Gendron rebuts the argument of Quebec nationalists and scholars that the Canadian government's neglect of French Africa forced Quebec to develop its own international identity Towards a Francophone Community shows that there had been active federal interest in French African affairs since the late 1940s within the context of developments in NATO and the Cold War the vagaries of Canada's relations with France and the Quiet Revolution in Quebec **Carnage and Connectivity** David Betz,2015-11-15 The burgeoning of global connectivity in recent decades is without historical parallel and the wiring up of the world continues apace even in the poorest regions Flux and ever quickening change are the

leitmotifs of the information age across a swathe of human enterprise from industry and commerce through to politics and social relations This is no less the case for the patterns of war where change has been disorientating for soldiers and statesmen whose confidence in the old the traditional and the known has been shaken David Betz s book explains the huge and disruptive implications of connectivity for the practice of warfare The tactical ingenuity of opponents to confound or drop below the threshold of sophisticated weapons systems means war remains the realm of chance and probability Increasingly though the conflicts of our time are less contests of arms than wars of hearts and minds conducted on a mass scale through multimedia communications networks The most pernicious challengers to the status quo are not states but ever more powerful non state actors *US Foreign Policy in a Challenging World* Marco Clementi, Matteo Dian, Barbara

Pisciotta, 2017-07-18 This book examines how the US is dealing with the challenge of reconciling its global interests with regional dynamics and how it is able to produce and sustain order at the system level and within regional subsystems The book comprises four parts the first of which addresses global issues such as nonproliferation trade and freedom of the seas US policies in these areas are carefully analyzed considering whether and how they have been differently implemented at the regional level The remaining parts of the book focus on the US posture toward specific regions Europe the Middle East and East Asia The policies adopted by the US to confront the most relevant challenges in each region are identified and the ways in which policies in a specific region influence or are influenced by challenges in another region are explored The book is a rich source of knowledge on the nature of the balance that the US has pursued between global and regional interests It will be of much interest to scholars to practitioners to postgraduate PhD students of international relations theory and American foreign policy and to all with an interest in the ability of the US to produce international order **Rethinking the Nature**

of War Isabelle Duyvesteyn, Jan Angstrom, 2005 Have globalization virulent ethnic differences and globally operating insurgents fundamentally changed the nature of war in the last decade Interpretations of war as driven by politics and state rationale formulated most importantly by the 19th century practitioner Carl von Clausewitz have received strong criticism Political explanations have been said to fall short in explaining conflicts in the Balkans Africa Asia and the attacks of 11 September 2001 in the United States This book re evaluates these criticisms not only by scrutinising Clausewitz s arguments and their applicability but also by a careful reading of the criticism itself In doing so it presents empirical evidence on the basis of several case studies addressing various aspects of modern war such as the actors conduct and purposes of war

Naval War College Review , 2003 *Military Robots* Jai Galliot, 2016-04-22 Philosophers have wrestled over the morality and ethics of war for nearly as long as human beings have been waging it The death and destruction that unmanned warfare entails magnifies the moral and ethical challenges we face in conventional warfare and everyday society Intrinsically linked are questions and perennial problems concerning what justifies the initial resort to war who may be legitimately targeted in warfare who should be permitted to serve the military the collateral effects of military weaponry and the methods

of determining and dealing with violations of the laws of war This book provides a comprehensive and unifying analysis of the moral political and social questions concerning the rise of drone warfare

Canada's Mechanized Infantry Peter Kasurak, 2020-02-01 Canada's Mechanized Infantry explores the largely ignored development of the infantry in the Canadian Army after the First World War Although many modern studies of technology and war focus on tanks and armour soldiers from the Second World War onward have discovered that success really depends on a combination of infantry armour and artillery to form combat teams Peter Kasurak demonstrates how the army implemented successful infantry vehicles and doctrine to ultimately further its military goals during the Second World War In the postwar period however progress was slowed by a top down culture and an unwillingness to abandon conventional thinking on the primacy of foot infantry and regimental organization This insightful book is the first to examine the challenges that have confronted the Canadian Army in transforming its infantry from First World War foot soldiers into a twenty first century combat force integrating soldiers vehicles weapons and electronics

Transformation of the Indian Armed Forces 2025 A K Lal, 2012-03-01 Transformation should lie at the heart of our new approach to defense The development of transformational capabilities processes and force structures should be given strategic focus to meet the principal challenges under our defense strategy India is already ceased with the necessity of transformation albeit without any documented national security guidelines or operating instructions which are legislated or have the validation of at least the Cabinet Committee on Security CCS In other words the first step would be to create a draft security strategy based on many assumptions like the foreign policy or the cumulative emerging threat scenario as appreciated by the Defence Intelligence Agency DIA This well researched book is a result of the project allotted by the USI under the Field Marshal K M Cariappa chair The book is therefore more as an idea or a theoretical construct basically to bring in more clarity to the various options available for this great transformation of the Indian military The author has deliberated upon various landmarks of transformation milestones achieved so far by the three services and given recommendations to further build upon ongoing modernization plan and shift to a higher plane of transformational activities

The Palgrave Handbook of Canada in International Affairs Robert W. Murray, Paul Gecelovsky, 2021-04-29 This book argues that Canada and its international policies are at a crossroads as US hegemony is increasingly challenged and a new international order is emerging The contributors look at how Canada has been adjusting to this new environment and resetting priorities to meet its international policy objectives in a number of different fields from the alignment of domestic politics along new foreign policies to reshaping its international identity in a post Anglo order its relationship with international organizations such as the UN and NATO place among middle powers management of peace operations and defense role in G7 and G20 climate change and Arctic policy development and relations with the Global South Embracing multilateralism has been and will continue to be key to Canada's repositioning and its ability to maintain its position in this new world order This book takes a comprehensive look at Canada's role in the world and the various political and policy

variables that will impact Canada's foreign policy decisions into the future Chapter 22 is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)

Resource Allocation and Management in Defence: Need for a Framework, 2013-01-15 The question that faces governments and militaries the world over is how best to allocate resources for management of defence in the new age This book by Shri A K Ghosh who has an economics background explores the framework for change in resource allocation and capability building It emphasises the importance of introducing programming in Indian defence to serve as a link between defence planning and budgeting There is match between defence planning and budgeting needs to be connected by the introduction of resource constrained budgeting having a multi year perspective The RMA force modernisation cost benefit analysis management of risks and internal and external audits are among the many issues the author has provided a perspective on It is argued by the author that defence needs to be viewed as a giant business and where possible business practices should be introduced The book is recommended reading for planners and decision makers of defence management and will benefit readers from the armed forces as well The lay readers interested in the subject of national defence and security will also find it useful and interesting
