R sum de l diteur **Ideology and Organization in Communist China** Franz Schurmann, 2023-11-10 In 1949 a powerful political military movement led by the Chinese Communist party gained control of war ravaged China inheriting a disorganized administration and a society eroded by decades of revolution Within a short time China was so radically transformed politically economically and socially that it appeared to have cut all links with the past The instruments of that transformation were ideology and organization Today seventeen years later the ideology and the organizational network despite changes remain as powerful as they were in 1949 They still hold that vast country together politically and determine its economic and social development This book after a discussion of ideology in its first part attempts to answer the question how Chinese Communist organization functions and why it is so successful The second part analyzes the organization of Party and government emphasizing methods of command and administration The third part looks at industrial organization the problems of management and control especially the continuing struggle between the professionals and the politicians The fourth part investigates the Chinese Communist methods of organizing their cities and villages tracing the history of village organization from traditional times through the Yanan period the land reform of the late 1940s and the collectivization of the mid 1950s to communization in 1958 Although organization has been constantly changing in China basic patterns are apparent The book analyzes the most characteristic pattern in all aspects of organization the conflict between two incompatible elements or in the Chinese Communist terms

contradictions The basic contradiction is that between professional expert and political red elements This contradiction dominates the two distinctive periods in the short history of Communist China the First Five Year Plan 1953 1957 and the so called Great Leap Forward 1958 1960 The book describes how the Chinese Communists attempted during the former period to emulate the Soviet organizational experience with stress on techniques and technology and during the latter period to use their own organizational methods to achieve economic progress The presentation of the contrast between these two models of organization sheds light on the significant differences between the Soviet Union and Communist China This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1966

**Self-Organization and the City** Juval Portugali, 2012-12-06 Cities first came into existence more than five thousand years ago How to deal with these partly fascinating partly frightening creatures of mankind both practically and intellectually concerns all of us and in particular presents areal challenge to city planners Each historical epoch has had its own particular attitudes associated with the Zeitgeist Accordingly the planning and steering of cities were based on quite different criteria

But in spite of these differences the concept of planning and steering was and still is the cornerstone of our dealing with cities Nevertheless the planner's dilemma is becoming more and more visible cities and megacities seem to be unplannable In this book Juval Portugali introduces a new idea Cities are self organizing systems To substantiate his revolutionary concept he uses several interlinked methods On the one hand and to my own delight he employs in his arguments theoretical tools developed in the interdisciplinary field of synergetics On the other hand jointly with his co workers he has performed detailed model calculations on cellular nets It has been a great pleasure and a wonderful experience for me to discuss these concepts with Juval Portugali over a number of years I was repeatedly and deeply impressed by the way he established profound and often surprising links to other fields of science
