Revolution in Time David Saul Landes,1985 **Revolution in Time** David S. Landes,1983 **The Mental Universe of the English Nonjurors** John William Klein,2021-09-21 The Glorious Revolution of 1688 which pushed James II from the throne of England was not glorious for everyone in fact for many it was a great disaster Those who had already taken an oath of allegiance to James II and to his heirs and lawful successors now pondered how they could take a second oath to William and Mary Those who initially refused to swear the oaths were called Nonjurors In 1691 Archbishop Sancroft eight bishops and four hundred clergy of the Church of England as well as a substantial number of scholars at Oxford and Cambridge were deprived removed from their offices and their license to practice removed The loss of this talent to the realm was incalculable Ten different paradigms shaped the English Nonjurors worldview Passive Obedience was paramount the Apostolic Succession essential a Cyprianist mentality colored everything they held a conscientious regard for oaths the Usages Controversy brought Tradition to the fore printing presses replaced lost pulpits patronage was a means of protection and proliferation they lived with a hybridized conception of time creative women spiritual writers complemented male bishops and a global ecumenical approach to the Orthodox East was visionary These ten operated synergistically to create an effective tool for the Nonjurors survival and success in their mission The Nonjurors influence out of all proportion to their size was due in large measure to this mentality Their unique circumstances prompted creative thinking and they were superb in that endeavor These perspectives constituted the infrastructure of the Nonjurors world and they help us to see the early eighteenth century not only as a time of rapid change but also as an era of persistent older religious mentalities adapted to new circumstances Revolution in Time David S. Landes,1983 Making Time Gavin Lucas,2021-04-25 Making Time grapples with a range of issues that have crystallized in the wake of 15 years of discussion on time in archaeology since the author s seminal volume The Archaeology of Time synthesizing them for a new generation of scholars The general understanding of time held by both archaeologists and non archaeologists is often very simple a linear notion where time flows along a single path from the past into the future This book sets out to complicate this image to draw out the key problems and issues with time that impact archaeological interpretation Using concrete examples drawn from different periods and places the book challenges the reader to think again Ultimately the book will suggest that if we want to understand what archaeological time is then we need to accept that things do not exist in time they make time The crucial question then becomes what kinds of time do archaeological materialities produce Written for upper level undergraduates and researchers in archaeology the book is also accessible to non academics with an interest in the topic The book is relevant for cognate disciplines especially history heritage studies and philosophy **Routledge Handbook of Historical International Relations** Benjamin de Carvalho,Julia Costa Lopez,Harvard Leira,2021-06-28 This handbook presents a comprehensive concise and accessible overview of the field of Historical International Relations HIR It summarizes and

synthesizes existing contributions to the field while presenting central themes approaches and methodologies that have driven the development of HIR providing the reader with a sense of the diversity and research dynamics that are at the heart of this field of study The wide range of topics covered are grouped under the following headings Traditions Demonstrates the wide variety of approaches to HIR Thinking International Relations Historically Different ways of thinking IR historically share some common concerns and areas for further investigation Actors Processes and Institutions Explores the processes actors practices and institutions that constitute the core objects of study of many HIR scholars Situating Historical International Relations Critically reflects about the situatedness of our objects of study Approaches Examines how HIR scholars conduct and reflect about their research often in dialogue with a variety of perspectives from cognate disciplines Summarizing key contributions and trends while also sketching out challenges for future inquiry this is an invaluable resource for students academics and researchers from a range of disciplines particularly International Relations global history political science history sociology anthropology peace studies diplomatic studies security studies international political thought political geography international law

Force,2001-07-31 The influence of millenarian thinking upon Cromwell s England is well known The cultural and intellectual conceptions of the role of millenarian ideas in the long 18th century when so the official story goes the religious sceptics and deists of Enlightened England effectively tarred such religious radicalism as enthusiasm has been less well examined This volume endeavors to revise this official story and to trace the influence of millenarian ideas in the science politics and everyday life of England and America in the 17th and 18th centuries **The Upright Thinkers** Leonard

Mlodinow,2015-05-05 A few million years ago our ancestors came down from the trees and began to stand upright freeing our hands to create tools and our minds to grapple with the world around us Leonard Mlodinow takes us on a passionate and inspiring tour through the exciting history of human progress and the key events in the development of science In the process he presents a fascinating new look at the unique characteristics of our species and our society that helped propel us from stone tools to written language and through the birth of chemistry biology and modern physics to today s technological world Along the way he explores the cultural conditions that influenced scientific thought through the ages and the colorful personalities of some of the great philosophers scientists and thinkers Galileo who preferred painting and poetry to medicine and dropped out of university Isaac Newton who stuck needlelike bodkins into his eyes to better understand changes in light and color and Antoine Lavoisier who drank nothing but milk for two weeks to examine its effects on his body Charles Darwin Albert Einstein Werner Heisenberg and many lesser known but equally brilliant minds also populate these pages each of their stories showing how much of human achievement can be attributed to the stubborn pursuit of simple questions why how bravely asked The Upright Thinkers is a book for science lovers and for anyone interested in creative thinking and in our ongoing quest to understand our world At once deeply informed accessible and infused with the author s trademark wit this

Millenarianism and Messianism in Early Modern European Culture J.E. Force, R.H. Popkin, 2013-04-17 Thanks to the work of legions of scholars the millenarian expectations within large segments of the population in Cromwellian England have been carefully examined The widespread belief that England with its messianic leader 1 Cromwell heralded the millennium is well known Less well examined perhaps has been the cultural conceptions of the role of millenarian and messianic ideas in the long eighteenth century Especially during the stable Hanoverian era until the American and French Revolutions the common place millennial expectations of the English Civil War appeared to recede By the end of the eighteenth century with the Napoleonic wars millenarian views and interpretations underwent a minor renaissance but with nothing like the fervor it is commonly thought of the Puritan era when so many believed that the end was near By the end of the eighteenth century so the official story goes the religious sceptics and deists of Enlightened England such as David Hume had done too well their work of tarring such religious radicalism with the brush of enthusiasm Happily this official interpretation of the events of the early modern period in which scholars have too often taken their cue from writers such as Hume and simply ignored millenarian contexts and expectations in the Age of Reason has undergone a marked shift in the past twenty years *The Future of Privacy: Private life and public policy* Perri 6, 1998
