Revolutionary Currents Nation Building In The Transatlantic World 1688 1821:

Empire to Nation Joseph W. Esherick, Hasan Kayali, Eric Van Young, 2006-04-27 The fall of empires and the rise of nation states was a defining political transition in the making of the modern world Here ten prominent specialists discuss the empire to nation transition in comparative perspective Chapters on Latin America the Middle East Eastern Euro **The Birth of Modern Mexico, 1780-1824** Christon I. Archer, 2007 The Birth of Modern Mexico 1780 1824 investigates the roots of the Mexican Independence era from a variety of perspectives The essays in this volume link the pre 1810 late Bourbon period to the War of Independence 1810 1821 analyze many crucial aspects of the decade of conflict and illustrate the continuities with the first years of the independent Mexican nation Christon I Archer has assembled the most important scholars of the Independence era in Mexican history Each essay addresses a central theme and brings new perspectives to the topics under consideration They all contribute to a nuanced view of the period from roughly the 1790s to the 1830s the different conceptions of legitimacy between the popular masses and the elite the skill and importance of pro Spanish propaganda the process of organizing conspiracies the survival and thriving of a mercantile family before during and after the creation of the republic the causes of failing mines the role of religious thought in the supposed secular state an exhortation to recall the positive contributions of Iturbide the viceroy's military strategy and differing conceptions of authority by the legislature and the executive The authors address the basic issues that are key to students understanding Who fought in the Independence movement why and where Yet the cutting edge interpretations in the essays make the book equally valuable for more advanced study In addition information is provided on the major personalities including Augustín Iturbide Félix Calleja and Father Hidalgo giving The Birth of Modern Mexico a fascinating human dimension Unlike many edited volumes the essays in this book offer a seamless approach to the period that underscores new research and innovative ideas that will reinforce the significance of the Independence era One of the few readable concise books on the topic of independence this volume probes the birth of modern Mexico in a crisply written style that is sure to appeal to historians and students of Mexican history Contributions by Timothy E Anna Christon I Archer Virginia Guedea Hugh M Hamill John E Kicza Jaime E Rodríguez O Anne Staples Paul J Vanderwood and Eric Van Young *The Oxford Handbook of the French Revolution* David Andress, 2015 The Oxford Handbook of the French Revolution brings together a sweeping range of expert and innovative contributions to offer engaging and thought provoking insights into the history and historiography of this epochal event Each chapter presents the foremost summations of academic thinking on key topics along with stimulating and provocative interpretations and suggestions for future research directions Placing core dimensions of the history of the French Revolution in their transnational and global contexts the contributors demonstrate that revolutionary times demand close analysis of sometimes tiny groups of key political actors whether the king and his ministers or the besieged leaders of the Jacobin republic and attention to the deeply local politics of both rural and urban populations Identities of class gender

and ethnicity are interrogated but so too are conceptions and practices linked to citizenship community order security and freedom each in their way just as central to revolutionary experiences and equally amenable to critical analysis and reflection This Handbook covers the structural and political contexts that build up to give new views on the classic question of the origins of revolution the different dimensions of personal and social experience that illuminate the political moment of 1789 itself the goals and dilemmas of the period of constitutional monarchy the processes of destabilisation and ongoing conflict that ended that experiment the key issues surrounding the emergence and experience of terror and the short and long term legacies for both good and ill of the revolutionary trauma for France and for global politics

Nationalism in the New World Don Harrison Doyle, Marco Antonio Vilella Pamplona, 2006 Nationalism in the New World brings together work by scholars from the United States Canada Latin America and Europe to discuss the common problem of how the nations of the Americas grappled with the basic questions of nationalism Who are we How do we imagine ourselves as a nation Debates over the origins and meanings of nationalism have emerged at the forefront of the humanities and social sciences over the past two decades However these discussions have been mostly about nations in Europe the Middle East Asia or Africa In addition their focus is usually on the violence spawned by ethnic and religious strains of nationalism which have been largely absent in the Americas The contributors to this volume Americanize the conversation on nationalism They ask how the countries of the Americas fit into the larger world of nations and in what ways they present distinctive forms of nationhood Such questions are particularly important because as the editors write the American nations that came into being in the wake of revolutions that shook the Atlantic world beginning in 1776 provided models of what the modern world might become American nations were among the first nation states to emerge on the world stage As former colonies with multiethnic populations American nations could not logically rest their claim to nationhood on ancient bonds of blood and history Out of a world of empires and colonies the independent states of the Americas forged new nations based on a varied mix of modern civic ideals instead of primordial myths on ethnic and religious diversity instead of common descent and on future hopes rather than ancient roots

Creating the British Atlantic Jack P. Greene, 2013 In these essays Greene explores the efforts to impose Old World institutions identities and values upon the New World societies being created during the colonization process He shows how transplanted Old World components political legal and social were adapted to meet the demands of new economically viable expansive cultural hearths Green argues that these transplantations and adaptations were of fundamental importance to the formation and evolution of the new American republic and the society it represented Back cover of paperback

Cycles of Conflict, Centuries of Change Elisa Servín, Leticia Reina, John Tutino, 2007-07-17 Anthology about three of the persistent crises that have wracked Mexican society throughout its modern history asking why these ruptures occurred why they mobilized Mexicans of all social classes

and why some led to significant political transformation

Generations of Women Historians Hilda L. Smith, Melinda S.

Zook, 2018-07-11 This collection focuses on generations of early women historians seeking to identify the intellectual milieu and professional realities that framed their lives. It moves beyond treating them as simply individuals and looks to the social and intellectual forces that encouraged them to study history and at the same time would often limit the reach and define the nature of their study. This collection of essays speaks to female practitioners of history over the past four centuries that published original histories, some within a university setting and some outside. By analysing the values these early women scholars faced, readers can understand the broader social values that led women historians to exist as a unit apart from the career path of their male colleagues.

International Origins of Social and Political Theory Tarak Barkawi, George

Lawson, 2017-04-12 This special issue is animated by the necessary entanglement of theory and history, the cortical relationship between theory and practice, and the transboundary relations that help to constitute systems of thought and practice.
