

The background of the entire image is a deep blue night sky. In the upper center, a bright yellow comet with a long, wispy tail streaks across the sky. To the left, a large, detailed spiral galaxy is visible. To the right, another smaller, more distant galaxy or nebula glows. In the bottom right corner, the dark silhouette of a house's roof is shown, with a single window glowing with a warm yellow light. The overall scene suggests a connection between the vast universe and the viewer's home.

Freyfogle, 2003-08-08 Is private ownership an inviolate right that individuals can wield as they see fit Or is it better understood in more collective terms as an institution that communities reshape over time to promote evolving goals What should it mean to be a private landowner in an age of sprawling growth and declining biological diversity These provocative questions lie at the heart of this perceptive and wide ranging new book by legal scholar and conservationist Eric Freyfogle Bringing together insights from history law philosophy

and ecology Freyfogle undertakes a fascinating inquiry into the ownership of nature leading us behind publicized and contentious disputes over open space regulation wetlands protection and wildlife habitat to reveal the foundations of and changing ideas about private ownership in America Drawing upon ideas from Thomas Jefferson Henry George and Aldo Leopold and interweaving engaging accounts of actual disputes over land use issues Freyfogle develops a powerful vision of what private ownership in America could mean an ownership system fair to owners and taxpayers alike that fosters healthy land and healthy economies
