The Sectoral Foundations of China's Development Shahid Javed Burki, Shahid Yusuf, 1992 **The Sectoral Foundations of China's Development** Shahid Javed Burki, Shahid Yusuf, 1992 **Developing Effective Employment Services** David Fretwell, Susan Goldberg, 1993-01-01 Employment services promote the efficient allocation of labor by among other things promoting labor mobility and improving productivity This paper assesses the cost effectiveness of services designed to expedite the exchange of labor between job seekers and employers The authors find that the benefits of employment services are not uniform Benefits may be reduced in small countries with a large informal sector or when the economy is stagnant and the demand for labor is depressed even though the need for the services may be greater under such conditions The authors advocate a balance between public and private sector delivery of employment services They favor opening the private market for what they term support services which increase productivity and include income support and retraining Such support services are distinct from what the authors call core services provision of which they believe is properly left to the public sector Core services to assist job seekers include job placement services relocation assistance counseling and skills assessment The authors find that core services are cost effective and that public sector providers can ensure that such services are delivered to unemployed low skilled or semiskilled workers whose needs may not be met by the private sector The paper reviews the justification for and development of employment services over time and compares various approaches to the provision of such services It reviews the various types of employment services and examines the differences between public and private sector delivery **Proceedings of a Conference on Currency Substitution and Currency Boards** Nissan Liviatan, 1993-01-01 Eighteen well known policymakers and economists discuss the rising use of currency substitution in Latin America They examine the effects of currency boards on substitute currencies and on national stabilization programs Latin American countries including Argentina Bolivia Peru and Uruguay increasingly use dollars as a substitute for domestic currency The experts debate whether the region should encourage or resist this trend Topics include the effects of substitution on inflation liquidity and exchange rates The discussions on Argentina Peru and Brazil focus on the ways in which currency boards have affected stabilization in these countries They consider whether such boards can strengthen fiscal discipline and speed economic adjustment A currency board issues money that is converted into a foreign reserve currency at a fixed exchange rate This independent institution takes over the central bank s role as the sole issuer of base money It also manages the exchange rate to keep the currency stable and convertible Issues for Infrastructure Management in the 1990s Arturo Israel, 1992-01-01 **Borrower Ownership of Adjustment Programs and the Political Economy of Reform** John H. Johnson, Sulaiman S. Wasty, 1993-01-01 China has done much to reform its price system achieve macroeconomic stability and restore growth Nevertheless price distortions remain in three key areas This study suggests further price reforms for the energy grain and transport sectors It explains why energy price adjustments should

have only a modest effect on consumer prices but a highly positive effect on the economy It discusses why China may have to reduce consumer subsidies to achieve the necessary reforms for grain prices The study describes what the government must do to strengthen commodity markets generate competition and make allowances for seasonal price variations China's transport sector has been a critical development bottleneck The paper reviews tariff adjustments and other reforms that would modernize the transport system and help it meet growing demand These reforms also would encourage energy conservation and help integrate the national economy Education and Development in India Jandhyala B.G.

Tilak,2018-09-15 Drawing on empirical interdisciplinary research this book presents a critical review of some of the major issues that are of interest to researchers policymakers and planners in developing as well as advanced countries including specifically in India It provides an in depth review of some of the major development policy issues in education in general and in India in particular over the past 2 3 decades Besides presenting an overview of the educational developments in India that reflects issues such as growth equity efficiency foreign aid decentralization center state relations financing and cost recovery the book puts forward in depth analyses of education poverty interrelations between education and poverty low level of outcomes in elementary education effects of structural adjustment policies and approaches on education south south cooperation etc It also critically discusses changes in policies relating to financing higher education external assistance for education and how the growth of private higher education is affecting society at large The dichotomy between public policy and action is also highlighted in many chapters On the whole while the importance of education is being increasingly recognized the state does not seem to be as willing to foot the bill for education as the households and even the private sector Occasionally contrasting with international evidence on for example financing higher education private higher education or the effects of neo liberal policies the book offers an interesting read for a wider audience The Political Economy of the Chinese Coal Industry Tim Wright,2012-03-12 Coal mining is one of China's largest industries and provides an excellent case study through which to consider the broader issues of China's transition from socialism to capitalism focussing on the shift to a market economy the rise of rural industry and the situation of China's working class Coal was one of the pillars of the planned economy but the author argues its shift to market based operations has been protracted and difficult particularly in moving from the artificially low prices of the planned economy to market prescribed prices a change that had a major impact on the industry's financial performance The book goes on to consider the growth of small rural coal mines as part of the Township and Village Enterprises TVEs programme these small mines have brought prosperity to areas where small manufacturing enterprises are not competitive but at the same time have been the cause of many social and environmental problems It also examines the situation of coal miners arguably one of the most vulnerable segments of the Chinese working class under socialism and under capitalism paying particular attention to the issue of work safety and coal mine disasters The book provides a comprehensive and coherent treatment of these issues from the establishment of the

People's Republic up to 2010 *Korean Industrial Policy* Danny M. Leipziger, Peter A. Petri, 1993 The World Bank is changing the way it does business in the energy sector This Policy Paper is one of two that outlines the Bank's new policies for the sector The review was prompted by concern about the effects of power generation on the environment and on populations that may be resettled to make way for projects Another stimulus was the macroeconomic reality of fewer investment resources in many countries And many developing countries are becoming more receptive to reforming the way energy is produced and consumed This paper credits the public monopoly approach of the last 30 years with facilitating expansion of power supplies capturing technical economies of scale and making effective use of scarce managerial and technical skills Nonetheless it recommends several new policies to improve the performance of the electric power sector in developing countries These reforms will guide future Bank activities in the sector Bank loans for electric power will go first to countries clearly committed to improving the performance of their power sectors The Bank will also discourage subsidies on energy prices and will encourage private investment in utilities And it will provide financing to help the least developed countries import power where local generation is not practical The efficiency of production and use of electric power in developing countries is examined in a companion paper *Energy Efficiency and Conservation in the Developing World* The World Bank's Role The World Bank's Role in the Electric Power Sector is also available in Spanish *La función del Banco Mundial en el sector de la electricidad Políticas para efectuar una reforma institucional regulatoria y financiera eficaz* ISBN 0 8213 2451 9 Stock No 12451 7 95 Price code 007 Spanis **Participatory Development and the World Bank** Bhuvan Bhatnagar, Aubrey C. Williams, 1992-01-01 Participatory development is an end and a means It is an end because participation builds skills and enhances people's capacity for action and for enriching their lives It is a means because participation contributes to better development policies and projects As a development agency the World Bank is primarily concerned with exploring how individuals communities and public and private institutions can contribute to making development prospects better and more lasting This report reflects the outcome of a workshop intended to explore some difficult issues such as whether the Bank is approaching the idea of participation in the right way how and to what extent external agencies can encourage participatory development This book is a guide to the learning process The main messages of the introductory chapter reflect further thinking of the learning groups since the workshop
