Security And The State In Southern Africa:

Security and the State in Southern Africa Agostinho Zacarias, 1998-12-31 Setting out the problem of security and placing it in an historical framework the author of this work picks his way through the complexities of political theory and the tangled political history of southern Africa He argues that the present formation of states has been shaped by the struggle of the African peoples for emancipation and the resistance of the European settler communities and that South Africa has attempted to maintain regional order based on principles of domination exploitation and inequality founded on a colonial past and apartheid The result has been a security system which is inherently militaristic nation focused and state centred and has led to confrontation within states and in the region Zacarius therefore explores the concept of people centred security and the legitimate state and regards these as essential building blocks in ensuring state and regional stability and security

Security and Democracy in Southern Africa Gavin Cawthra, André Du Pisani, Abillah H. Omari, 2007 A study of the ambiguity of democratization and how it can generate violence Southern Africa has embarked on one of the world's most ambitious security co operation initiatives seeking to roll out the principles of the United Nations at regional levels This book examines the triangular relationship between democratization the character of democracy and its deficits and national security practices and perceptions of eleven southern African states Based on national studies conducted by African academics and security practitioners over three years it includes an examination of the way security is conceived and managed as well as a comparative analysis of regional security co operation in the developing world The study concludes that democratization is ambiguous and uncertain and can in some cases generate violent conflict Building a common security regime in southern Africa will require moving beyond regime solidarity In particular progress will mean building multinational institutions entrenching democratic practices drawing on civil society and integrating the southern African project with that of the African Union The authors conclude with a set of policy recommendations that aim to strengthen both states and civil society within the framework of an emerging common security system

Security and Development in Southern Africa Nana Poku, 2001-04-30 With the end of white dominated South Africa many observers have argued for a positive transformation of the whole of Southern Africa based upon market integration and increased cooperation among the states of the region Poku and the contributors to this collection re examine this optimistic scenerio and they point to the problems of translating good intentions into actual policies In reality the economic imbalance between South Africa and its neighbors poses severe problems for the region Far from finding a stronger ally in regional reconstruction and development the countries in the region are finding that for many in South Africa they simply do not matter that much The analysis points to greater polarization which may imply greater marginalization of the poorer countries in the region Moreover a major widening of the gap between the richer South Africa and some or all of the weaker economies may lead to increased tensions and breakdown of regional relations even to a situation detrimental to economic development in the region A provocative

analysis by some of the leading politico economic thinkers of the region the volume will be of great use to scholars researchers and policy makers involved with Southern African development

The United States and Southern Africa Charles H. Percy,1976

Security and Politics in South Africa Peter C. J. Vale,2003 Exploring how the region is changing today as transnational solidarity and a single regional economy remove the distinctions between national and international politics he asks whether South African domination can finally be overcome and considers what sort of cosmopolitan political arrangement will be appropriate for southern Africa in the new century

BOOK JACKET

State Security in South Africa James Michael Roherty,1992 This work is a study of civil military relations in the Republic of South Africa while Pieter Willem Botha was prime minister 1978-89 The author's controversial thesis is that Prime Minister Botha recognizing that his country had reached the historical juncture when it needed to establish a new political order encompassing all of its diverse peoples moved effectively to prepare the ground for fundamental constitutional change What was needed above all were stabilization measures to assure the support of the white population for reform Botha used the South African defence force as his primary instrument By 1989 Professor Roherty maintains a striking degree of stabilization had been achieved within the country and throughout South Africa and the groundwork for epochal change had been prepared The author makes use of exclusive interviews with South Africans from the political military intelligence corporate and academic worlds

Regionalization and Security in Southern Africa N. Poku,2001-02-02 Once torn by ideological conflicts and the dominance of command economies Southern Africa is now moving towards economic liberalism and openness In general the ascendancy of market economics is acknowledged by its governments albeit with different degrees of enthusiasm Theoretically rich and empirically engaging this timely book offers a critical insight into the ensuing debate on regionalism and the process of regionalization in southern Africa
