**Corporate Security Management** Marko Cabric, 2015-03-30 Corporate Security Management provides practical advice on efficiently and effectively protecting an organization's processes, tangible and intangible assets and people. The book merges business and security perspectives to help transform this often conflicted relationship into a successful and sustainable partnership. It combines security doctrine, business priorities and best practices to uniquely answer the Who, What, Where, Why, When and How of corporate security. Corporate Security Management explores the diverse structures of security organizations in different industries. It shows the crucial corporate security competencies needed and demonstrates how they blend with the competencies of the entire organization. This book shows how to identify, understand, evaluate and anticipate the specific risks that threaten enterprises and how to design successful protection strategies against them. It guides readers in developing a systematic approach to assessing, analyzing, planning, quantifying, administering and measuring the security function. Addresses the often opposing objectives between the security department and the rest of the business concerning risk, protection, outsourcing and more. Shows security managers how to develop business acumen in a corporate security environment. Analyzes the management and communication skills needed for the corporate security manager. Focuses on simplicity, logic and creativity instead of security technology. Shows the true challenges of performing security in a profit-oriented environment, suggesting ways to successfully overcome them. Illustrates the numerous security approaches and requirements in a wide variety of industries. Includes case studies, glossary, chapter objectives, discussion questions and exercises.

**Universal Security Management Systems Standard 2017** M.J.W. Spit, CPP, MSec, NSAC, 2017-08-14 This Standard states the requirements for implementing and operating a dedicated Security Management System (SMS) for the security and safety of people and of the interests and assets of the organisation against malicious adversaries such as criminals and terrorists. In this Standard, Security Management is described as a process that is risk-based, stakeholder-driven and continually improved with a Plan-Do-Check-Act (PDCA) cycle. Tasks and outputs for Strategic, Tactical and Operational Security Policies and Objectives are specified. 80 aspects of 20 Security topics with some 300 Key Controls are listed for pragmatic and concise development and implementation. Reviewing and auditing with these controls will assist you in raising the maturity levels for Security in your organisation. This Standard is drafted in accordance with the High Level Structure for management systems of ISO. This ensures compatibility and smooth integration with other management systems such as ISO 22301 Business Continuity Management, ISO 27001 and ISO 27002 Information Security Management and ISO 55000 Asset Management. This Standard includes the protection of all parts, processes, sites, infrastructures, systems and tangible and intangible assets and interests of an organisation. This Standard specifies the requirements that may be used for the certification of a Security Management System.
