Seed Money The Guggenheim Story:

Seed Money Milton Lomask,1964-01-01 **The Guggenheim** Francesco Dal Co,2017-01-01 The captivating tale of the plans and personalities behind one of New York City's most radical and recognizable buildings. Considered the crowning achievement of Frank Lloyd Wright, 1867-1959, the Solomon R. Guggenheim Museum in Manhattan is often called iconic. But it is in fact iconoclastic, standing in stark contrast to the surrounding metropolis and setting a new standard for the postwar art museum. Commissioned to design the building in 1943 by the museum's founding curator, Baroness Hilla von Rebay, Wright established residence in the Plaza Hotel in order to oversee the project. Over the next 17 years, Wright continuously clashed with his clients over the cost and the design, a conflict that extended to the city of New York and its cultural establishment. Against all odds, Wright held fast to his radical design concept of an inverted ziggurat and spiraling ramp built with a continuous beam, a shape recalling the form of an hourglass. Construction was only completed in 1959, six months after Wright's death. The building's initial critical response ultimately gave way to near universal admiration as it came to be seen as an architectural masterpiece. This essential text offering a behind-the-scenes story of the Guggenheim, along with a careful reading of its architecture, is beautifully illustrated with more than 150 images, including plans, drawings, and rare photographs of the building under construction.

Fifty Years in Public Causes Brian O'Connell,2005 Stories from a fascinating life devoted to providing opportunities for citizens to improve their lives, strengthen their communities, and empower democracy.

The Oxford Encyclopedia of Economic History Joel Mokyr,2003 What were the economic roots of modern industrialism? Were labor unions ever effective in raising workers' living standards? Did high levels of taxation in the past normally lead to economic decline? These and similar questions profoundly inform a wide range of intertwined social issues whose complexity, scope, and depth become fully evident in the Encyclopedia. Due to the interdisciplinary nature of the field, the Encyclopedia is divided not only by chronological and geographic boundaries but also by related subfields such as agricultural history, demographic history, business history, and the histories of technology, migration, and transportation. The articles, all written and signed by international contributors, include scholars from Europe, Latin America, Africa, and Asia. Covering economic history in all areas of the world and segments of economies from prehistoric times to the present, *The Oxford Encyclopedia of Economic History* is the ideal resource for students, economists, and general readers, offering a unique glimpse into this integral part of world history.

Civil Society Brian O'Connell, John William Gardner,1999 O'Connell offers an action guide for citizen leaders and teachers must know information to help ensure that the democracy will last another century.

Philanthropists and Foundation Globalization Joseph Kiger,2017-07-28 The modern American foundation, as an instrumentality for charitable and philanthropic giving, is in many ways a unique and complex social, economic, political institution. This is particularly the case for foundations with large assets. As a social phenomenon, the foundation has deep roots in the past. At the beginnings of any degree of civilization, charitable giving and rudimentary forms of foundations

emerge This is the case in many regions of the world The pattern is consistent once enough property or wealth beyond primitive human needs is accumulated some of it begins to be set aside for what the donors of such wealth consider worthwhile purposes The serious literature contributing greatly to public perception of philanthropy and foundations has been relatively sparse Much of what is available is quantitative and statistical in nature There has been limited objective attention to the motives or reasons spurring individual philanthropists to engage or not to engage in creating foundations such motivation needs historical and comparative analysis Major investigations and studies of foundations together with ancillary national regional and international organizations to facilitate such study have received spotty consideration Philanthropists and Foundation Globalization addresses three interrelated aspects of foundation history First it reviews biographical historical profiles of the founding philanthropists and their heirs engaged in international giving Second it discusses major governmental and non governmental investigations and studies of foundations including domestic ones and also foreign ones in which U S participants have played a prominent role spanning the period 1912 to the present Third it chronicles foundation developments and activities in Europe at the close of the twentieth century The volume provides a historical account of some U S foundations international activity in a particular region in a specific time period and their a

Aerospace Engineering Education During the First Century of Flight Barnes Warnock McCormick, Conrad F. Newberry, Eric Jumper, 2004 On 17 December 1903 at Kitty Hawk NC the Wright brothers succeeded in achieving controlled flight in a heavier than air machine This feat was accomplished by them only after meticulous experiments and a study of the work of others before them like Sir George Cayley Otto Lilienthal and Samuel Langley The first evidence of the academic community becoming interested in human flight is found in 1883 when Professor J J Montgomery of Santa Clara College conducted a series of glider tests Seven years later in 1890 Octave Chanute presented a number of lectures to students of Sibley College Cornell University entitled Aerial Navigation This book is a collection of papers solicited from U S universities or institutions with a history of programs in Aerospace Aeronautical engineering There are 69 institutions covered in the 71 chapters This collection of papers represents an authoritative story of the development of educational programs in the nation that were devoted to human flight Most of these programs are still in existence but there are a few papers covering the history of programs that are no longer in operation documented in Part I as well as the rapid expansion of educational programs relating to aeronautical engineering that took place in the 1940s Part II is devoted to the four schools that were pioneers in establishing formal programs Part III describes the activities of the Guggenheim Foundation that spurred much of the development of programs in aeronautical engineering Part IV covers the 48 colleges and universities that were formally established in the mid 1930s to the present The military institutions are grouped together in the Part V and Part VI presents the histories of those programs that evolved from proprietary institutions **The Encyclopedia of the Industrial Revolution in World History** Kenneth E. Hendrickson III, 2014-11-25 As editor Kenneth E Hendrickson III notes in his

introduction Since the end of the nineteenth century industrialization has become a global phenomenon After the relative completion of the advanced industrial economies of the West after 1945 patterns of rapid economic change invaded societies beyond western Europe North America the Commonwealth and Japan In The Encyclopedia of the Industrial Revolution in World History contributors survey the Industrial Revolution as a world historical phenomenon rather than through the traditional lens of a development largely restricted to Western society The Encyclopedia of the Industrial Revolution in World History is a three volume work of over 1 000 entries on the rise and spread of the Industrial Revolution across the world Entries comprise accessible but scholarly explorations of topics from the aerospace industry to zaibatsu Contributor articles not only address topics of technology and technical innovation but emphasize the individual human and social experience of industrialization Entries include generous selections of biographical figures and human communities with articles on entrepreneurs working men and women families and organizations They also cover legal developments disasters and the environmental impact of the Industrial Revolution Each entry also includes cross references and a brief list of suggested readings to alert readers to more detailed information The Encyclopedia of the Industrial Revolution in World History includes over 300 illustrations as well as artfully selected extended quotations from key primary sources from Thomas Malthus Essay on the Principal of Population to Arthur Young s look at Birmingham England in 1791 This work is the perfect reference work for anyone conducting research in the areas of technology business economics and history on a world historical scale

The 20th Century Go-N Frank N. Magill, 2014-03-05 Each volume of the Dictionary of World Biography contains 250 entries on the lives of the individuals who shaped their times and left their mark on world history This is not a who s who Instead each entry provides an in depth essay on the life and career of the individual concerned Essays commence with a quick reference section that provides basic facts on the individual s life and achievements The extended biography places the life and works of the individual within an historical context and the summary at the end of each essay provides a synopsis of the individual s place in history All entries conclude with a fully annotated bibliography

Flight Patterns Roger E. Bilstein, Roger Bilstein, 2008-12-01 From 1918 to 1929 American aviation progressed through the pioneering era establishing the pattern of its impact on national security commerce and industry communication travel geography and international relations In America as well as on a global basis society experienced a dramatic transformation from a two dimensional world to a three dimensional one By 1929 aviation was poised at the threshold of a new epoch Covering both military and civil aviation trends Roger Bilstein s study highlights these developments explaining how the pattern of aviation activities in the 1920s is reflected through succeeding decades At the same time the author discusses the social economic and political ramifications of this robust new technology Aviation

histories usually pay little attention to aeronautical images as an aspect of popular culture Thoughtful observers of the 1920s such as Stuart Chase and Heywood Broun considered aircraft to be an encouraging example of the new technology workmanlike efficient and graceful perhaps representing a new spirit of international good will Flight Patterns is particularly useful for its discussion of both economic and cultural factors treating them as integrated elements of the evolving air age
