Economic Man Ulla Grapard,Gillian Hewitson,2012-04-27 In this book economists and literary scholars examine the uses to

which the Robinson Crusoe figure has been put by the economics discipline since the publication of Defoe's novel in 1719. The authors' critical readings of two centuries of texts that have made use of Robinson Crusoe undermine the pervasive belief of mainstream economics that Robinson Crusoe is a benign representative of economic agency and that he like other economic agents can be understood independently of historical and cultural specificity. The book provides a detailed account of the appearance of Robinson Crusoe in the economics literature and in a plethora of modern economics texts in which for example we find Crusoe is portrayed as a schizophrenic consumer-producer trying to maximize his personal well-being. Using poststructuralist, feminist, postcolonial, Marxist, and literary criticism approaches, the authors of the fourteen chapters in this volume examine and critique some of the deepest fundamental assumptions neoclassical economics hold about human nature, the political economy of colonization, international trade, and the pervasive gendered organization of social relations. The contributors to this volume can be seen as engaging in the emerging conversation between economists and literary scholars known as the New Economic Criticism. They offer unique perspectives on how the economy and economic thought can be read through different disciplinary lenses. Economists pay attention to rhetoric and metaphor deployed in economics and literary scholars have found new areas to explore and understand by focusing on economic concepts and vocabulary encountered in literary texts.

Theorising Literary Islands Ian Kinane, 2016-11-16

Theorising Literary Islands is a literary and cultural study of both how and why the trope of the island functions within contemporary popular Robinsonade narratives. It traces the development of Western islandomania or our obsession with islands from its origins in Daniel Defoe's *Robinson Crusoe* right up to contemporary Robinsonade texts focusing predominantly on American and European representations of fictionalized Pacific Island topographies in contemporary literature, film, television, and other media. *Theorising Literary Islands* argues that the ubiquity of island landscapes within the popular imagination belies certain ideological and cultural anxieties and posits that the emergence of a Western popular culture tradition can largely be traced through the development of the Robinsonade genre and through early European and American fascination with the Pacific region.
