Seeking Success in E-Business Kim Viborg Andersen, Steve Elliot, Paula M.C. Swatman, E.M. Trauth, Niels Bjørn-Andersen, 2013-06-29 In the foreword to this volume of conference proceedings for IFIP Working Group 8.4 it is appropriate to review the wider organization to which the Working Group belongs. The International Federation of Information Processing (IFIP) is a non-governmental non-profit umbrella organization for national societies working in the field of information processing that was established in 1960 under the auspices of UNESCO. IFIP's mission is to be the leading truly international apolitical organization which encourages and assists in the development, exploitation and application of Information Technology for the benefit of all people. At the heart of IFIP lie its Technical Committees that between them count on the active participation of some two thousand people world wide. These Groups work in a variety of ways to share experience and to develop their specialised knowledge. Technical Committees include TC 1 Foundations of Computer Science, TC 2 Software Theory and Practice, TC 3 Education, TC 6 Communication Systems, TC 7 System Modelling and Optimization, TC 9 Relationship between Computers and Society, TC 11 Security and Protection in Information Processing Systems, TC 12 Artificial Intelligence and TC 13 Human Computer Interaction. The IFIP website www.ifip.org has further details. Technical Committee 8 (TC8) is concerned with Information Systems in organisations. Within TC8 there are different Working Groups focusing on particular aspects of Information Systems. *ECIW2006-Proceedings of the 5th European Conference on i-Warfare and Security* Dr Dan Remenyi, 2006

E-government and Public Sector Process Rebuilding Kim Viborg Andersen, 2006-02-23 E-government and Public Sector Process Rebuilding: Dilettantes, Wheelbarrows and Diamonds provides an input to rebuild and improve the processes in which the public sector performs activities and interacts with the citizens, companies and the formal elected decision makers. Through eleven chapters the book emphasizes information systems (IS) as the vehicle for redirecting the public sector towards its key customers. The book stresses serious capability challenges inhibiting the digital transformation using activity and customer-centric applications. The dilettantes in the public sector are in need of upgrading, rethinking and refocusing their use of IS. There is a need to revisit the extensive use of digital wheelbarrows to transmit data and complement the transactional focus with IT-enabled analysis of the activities. There is also a need to recognize that IS are not just flashy and shining diamonds to be shown off on special occasions; IS are as most diamonds, manufactured products, part of the activities and intended for replacement whenever the diamonds are no longer suitable for serving their purpose; diamonds do not last forever.
