**Showing Off** Philip L. Wagner, 2010-01-01 Hardly a place exists on earth that has not been shaped in some way by human beings Every day we modify and even sweep away natural landscapes as we build places to live and work But why we react and interact as social beings intent on exercising ecological dominance poses an endlessly compelling puzzle for everyone from novelists to geographers In *Showing Off* distinguished geographer Philip L Wagner offers a persuasive hypothesis Drawing on a lifetime of inquiry travel and teaching he asserts that the strive for Geltung personal standing recognition acceptance esteem and influence shapes all of our interactions and defines the unique social character of human beings Wagner applies the Geltung hypothesis to a wide range of human activities from falling in love and spreading gossip to buying goods and making war His examples demonstrate how communication and display showing off impel geographic change as they reveal how and why people with the most Geltung tend to occupy the most desirable places This broad vision draws insights from many fields A major contribution to cultural geography the book also sheds new light on individual psychology and psychopathology and suggests new themes for cognitive science and even philosophy Sure to stir lively debate in many circles it will be provocative reading for everyone fascinated by the continuum between people and places

**Explorations in Environmental Political Theory** Joel Jay Kassiola, 2015-03-04 The contributors to this volume focus on the political and value issues that in their shared view underlie the global environmental crisis facing us today They argue that only by transforming our dominant values social institutions and way of living can we avoid ecological disaster **Spell**

**of the Urubamba** Daniel W. Gade, 2015-10-05 This work examines the valley of the Urubamba River in terms of vertical zonation Incan impact on the environment plant use the history of exploration and the notion of discovery the idea of land reform and cultural contact with the European world Winding its path northward from the Andean Highlands to the Amazon the valley has served as the stage of pre Columbian civilizations and focal point of Spanish conquest in Peru Gade left behind not only a superb body of scholarly work but a network of colleagues and students who remain indebted to his example This book should serve as an inspiration for all scholars who wish to pursue the Sauerian counter enlightenment or post development agendas of understanding and respecting particular places in all their historical and cultural complexity including ambiguities and contradictions *The Geographical Review* American Geographical Society [German English](#)

*Landscape* William M. Denevan, Kent Mathewson, 2009-05 Perhaps one of the most distinctive and studied geographers of the

twentieth century Carl O Sauer 1889 1975 had influence that extends well beyond the confines of any one discipline With a focus on historical and cultural geography Sauer s essays have garnered praise from poets natural historians and social scientists alike who continue to explore Sauer s work In Carl Sauer on Culture and Landscape editors William M Denevan and Kent Mathewson have compiled thirty seven of Sauer s original works including rare early writings articles in now largely inaccessible publications and transcriptions of key oral presentations that remain little known A student of the relationships between land and life people and places Sauer helped establish landscape studies in cultural geography and paved the way for paradigmatic shifts in the scholarly assessment of Native American history By strongly advocating a land ethic a responsible stewardship of the sustaining earth for his own and for future generations Carl Sauer supplied an esthetic rationale and a historical perspective to the environmental movement The volume opens with two extended essays on Sauer s critics and his works Essays by prominent geographers and other authorities on Sauer introduce each section of the book adding a contemporary element to the presentation and interpretation of Sauer s life and scholarship in areas such as soil conservation man in nature and cultivated plants A complete bibliography of his publications and an extensive compilation of commentaries on his life and work make this an indispensable reference Carl Sauer on Culture and Landscape sheds new light on Sauer s contributions to the history of geographic thought sustainable land use and the importance of biological and cultural diversity all of which remain key issues today Cultural Encounters with the Environment Viola Haarmann,2000 In Cultural Encounters with the Environment a distinguished group of contributors offers a fresh and original view of contemporary geography The authors explore the role of four traditional themes in the New cultural geography O the interplay between the evolution of particular biophysical niches and the activities of the culture groups that inhabit them the diffusion of cultural traits the establishment and definition of culture areas and the distinctive mix of geographical characteristics that gives places their special character in relation to one another By examining how cultural space is constructed how environment is remade understood and imaged as a consequence and how people lay claim to place this volume establishes a compelling case for the importance of these enduring concepts to present and future trajectories in cultural geography Fifty Years of Good Reading University of Texas Press,2000 50 year since founding the University of Texas they have witnessed major evolutions in the world of publishing **Nation, State, and Territory** George W. White,2007-04-26 Globalization seems to be making nation states increasingly irrelevant yet their number has continued to grow in recent years New nation states emerged out of the ruins of the Soviet Union and Yugoslavia more still may come as Palestinians Kurds Chechens and other peoples struggle tenaciously to establish their own Nation State and Territory shows that national identities are as potent as ever Today many conflicts rage over places and territories of historical linguistic and religious significance Many analyses however only consider the economic and geostrategic value of territory George W White shows that national identity is intimately bound to specific places and territories Nation state and territory are mutually

defining and reinforcing phenomena and through careful analysis White examines their origins evolutions and relationships to provide a better understanding of the interactions and conflicts of the world's nation states *What Price Fame?* Tyler Cowen, 2000 In a world where more people know who Princess Di was than who their own senators are where Graceland draws more visitors per year than the White House and where Michael Jordan is an industry unto himself fame and celebrity are central currencies In this intriguing book Tyler Cowen explores and elucidates the economics of fame Fame motivates the talented and draws like minded fans together But it also may put profitability ahead of quality visibility above subtlety and privacy out of reach The separation of fame and merit is one of the central dilemmas Cowen considers in his account of the modern market economy He shows how fame is produced outlines the principles that govern who becomes famous and why and discusses whether fame seeking behavior harmonizes individual and social interests or corrupts social discourse and degrades culture Most pertinently Cowen considers the implications of modern fame for creativity privacy and morality Where critics from Plato to Allan Bloom have decried the quest for fame Cowen takes a more pragmatic optimistic view He identifies the benefits of a fame intensive society and makes a persuasive case that however bad fame may turn out to be for the famous it is generally good for society and culture *Nationalism and Territory* George W. White, 2000 Why do nations come into conflict What factors lead to the horrors of ethnic cleansing This timely book offers clear eyed answers to these questions by exploring how national identity is shaped by place focusing especially on Serbia Hungary and Romania Moving beyond studies of nationalism that consider only the economic and geostrategic value of territory George W White shows that the very core of national identity is intimately bound to specific places Indeed nations define themselves in terms of spaces that have historical linguistic and religious meaning as Serbs have clearly demonstrated in Kosovo These territories are concrete expressions of a nation's identity both past and present With his detailed analysis of the places that define national identity in Southeastern Europe White convincingly shows why territorial disputes so often escalate into war *Taking Tourism to the Limits* Michelle Aicken, Stephen J. Page, Chris Ryan, 2006-08-11 The concept of margins and limits is often referred to within the tourism academic literature and includes subjects as diverse as carrying capacities peripheral economies technological advancement adventure tourism dark tourism and socially marginalized communities After identifying a number of ways in which limits might be defined *Taking Tourism to the Limits* explores concepts and challenges facing contemporary tourism in five main sections namely in tourism planning and management nature based tourism dark tourism adventure and sport tourism and the accommodation industry Drawing upon case studies current research and conceptualizations these different facets of the limits are each introduced by the editors with commentaries that seek to identify themes and current practice and thinking in the respective domains The picture that emerges is of an industry that reinvents itself in response to changing market parameters even while core issues of stakeholder equities and political processes remain problematic International in scale the book links with its companion piece *Indigenous Tourism* the

commodification and management of culture also published by Elsevier as an outcome of the very highly successful conference Taking Tourism to the Limits hosted by the University of Waikato Department of Tourism Management in 2003

**Keeping it Living** Douglas Deur, Nancy J. Turner, 2005 The European explorers who first visited the Northwest Coast of North America assumed that the entire region was virtually untouched wilderness whose occupants used the land only minimally hunting and gathering shoots roots and berries that were peripheral to a diet and culture focused on salmon Colonizers who followed the explorers used these claims to justify the displacement of Native groups from their lands Scholars now understand however that Northwest Coast peoples were actively cultivating plants well before their first contact with Europeans This book is the first comprehensive overview of how Northwest Coast Native Americans managed the landscape and cared for the plant communities on which they depended Bringing together some of the world's most prominent specialists on Northwest Coast cultures Keeping It Living tells the story of traditional plant cultivation practices found from the Oregon coast to Southeast Alaska It explores tobacco gardens among the Haida and Tlingit managed camas plots among the Coast Salish of Puget Sound and the Strait of Georgia estuarine root gardens along the central coast of British Columbia wapato maintenance on the Columbia and Fraser Rivers and tended berry plots up and down the entire coast With contributions from ethnobotanists archaeologists anthropologists geographers ecologists and Native American scholars and elders Keeping It Living documents practices many unknown to European peoples that involve manipulating plants as well as their environments in ways that enhanced culturally preferred plants and plant communities It describes how indigenous peoples of this region used and cared for over 300 different species of plants from the lofty red cedar to diminutive plants of backwater bogs Quill & Quire, 1996 *Showing Off* Philip L.
