**Empowerment as Ceremony** William Epstein, 2017-07-28 Many people in the United States are poor lead marginal lives and need jobs as well as basic services such as education medical care and housing Multitudes in other parts of the world in addition to being poor are jailed tortured and killed for being members of the wrong ethnic group or expressing political opinions Those who argue for empowerment claim it is a

magic bullet It can liberate the oppressed largely through self organization self motivation self invention and even self clarity William M Epstein sees contemporary empowerment practice in the United States as a civic church of national values one better in performing its ceremonial role than god based houses of worship By itself empowerment is not worth the effort of commentary since it achieves none of its goals and has not even generated a respectable critical literature But Epstein argues that empowerment practice and American social welfare both embody prescriptive cultural preferences Like art and music empowerment opens windows into deeper social meaning The social sciences have carved out roles for themselves by looking for simple remedies ones that are inexpensive and compatible with contemporary social arrangements Epstein shows that those in social work practices have not only deluded themselves into thinking that these services have real instrumental value but really operate at cross purposes This accessible work will attract critical attention among these professional groups It bases its carefully documented insights upon informed sociological and anthropological theory The Person-Centered Approach Doug Bower,2000-11-16 For nearly 50 years the approach of Carl Rogers and his colleagues has been used to help others in counseling psychotherapy and education This project takes that work into the realms of Religion Politics Alcohol treatment Incest Mental Disabilities Sandtray therapy Philosophy and Person Centered history theory *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), **One Nation Under Therapy** Christina Hoff Sommers,Sally Satel,2025-08-22 Americans have traditionally placed great value on self reliance and fortitude In recent decades however we have seen the rise of a therapeutic ethic that views Americans as emotionally underdeveloped psychically frail and requiring the ministrations of mental health professionals to cope with life s vicissitudes Being in touch with one s feelings and freely expressing them have become paramount personal virtues Today with a book for every ailment a counselor for every crisis a lawsuit for every grievance and a TV show for every conceivable problem we are at risk of degrading our native ability to cope with life s challenges Drawing on established science and common sense Christina Hoff Sommers and Dr Sally Satel reveal how therapism and the burgeoning trauma industry have come to pervade our lives Help is offered everywhere under the presumption that we need it in children s classrooms the workplace churches courtrooms the media the military But with all the help comes a host of troubling consequences including The myth of stressed out homework burdened hypercompetitive and depressed or suicidal schoolchildren in need of therapy and medication The loss of moral bearings in our approach to lying crime addiction and other foibles and vices The unasked for grief counselors who descend on bereaved families schools and communities following a tragedy offering dubious advice while billing plenty of money The expansion of Post Traumatic Stress Disorder from an affliction of war veterans to nearly everyone who has experienced a setback Intelligent provocative and wryly amusing *One Nation Under Therapy* demonstrates that talking about problems is no substitute for confronting them
