becomes unbroken     *The Moscow Times Business Review* ,2000     *Freshwater* James Fargo Balliett,2014-12-18

Freshwater is our planet's most precious resource and also the least conserved. Freshwater makes up only 3 percent of the total water on the planet and yet the majority 1.9 percent is held in a frozen state in glaciers, icebergs and polar ice fields. This leaves approximately one half of 1 percent of the total volume of water on the planet as freshwater available in liquid form. This book traces the complex history of the steady growth of humankind's water consumption which today reaches some 9.7 quadrillion gallons per year. Along with a larger population has come the need for more drinking water, larger farms requiring extensive irrigation and more freshwater to support business and industry. At the same time such developments have led to increased water pollution. Three detailed case studies are included. The first looks at massive water systems in locations such as New York City and the efforts required to protect and transport such resources. The second shows how growth has affected freshwater quality in the ecologically unique and geographically isolated Lake Baikal region of eastern Russia. The third examines the success story of the privatized freshwater system in Chile and considers how that country's water sources are threatened by climate change.     *Mongolia Today* Shirin Akiner,2023-10-13 First published in 1991

*Mongolia Today* presents a collection of essays by leading scholars in the field and gives important insights into the economic, political, legal and military systems of Mongolia. The Mongolian People's Republic, formerly known as Outer Mongolia, is three times the size of France but has a population of just two million. Sandwiched between Russia and China, this remote heartland of Asia has long been one of the most inaccessible places in the world, its isolation preserved by political as well as geographical barriers. The modern history of Mongolia has been dominated by its two great neighbours, strong economic and political ties with the erstwhile Soviet Union and problematic relations with China. Relations with the West have been slow to develop. Post-cold war Mongolia is willing to explore new relationships with other parts of the world and transform this once isolated land into a trading partner of international potential. This is an essential read for scholars and researchers of Central Asian studies, Asian politics and Chinese studies.     *Soviet Life* ,1972-07     *Russian Life* ,2003     *Blue Book of 16mm Films* ,1952

**and Europe in the Early Middle Ages** András Róna-Tas,1999-03 Lavishly illustrated, the book contains seventy-five historical maps and colour plates which visualize the historical background of Hungary and introduces its early history to a broader readership. The early history of Hungarians is embedded into the history of Eurasia and special attention is given to the relationship of the Hungarians with the Khazars and the Bulghar Turks. The first part deals with methods and sources which can be used for elucidating the ancient history of the Hungarians, relying on research into linguistics, archaeology, anthropology and natural history. The second part traces how the Hungarians came into the Carpathian Basin and answers such questions as who are the Magyars, from where did they come and how did they conquer the land. It reconstructs and

examines their early political and social structure the economy and religion and compares the Hungarian medieval process with the ethnogenetic processes of the Germanic Slavic and Turkic people     Collier's ,1944-07     *Encyclopedia of World Art: Shamanism to Terror and the Malign* ,1967     *Journal - Royal Anthropological Institute of Great Britain and Ireland*
